Alberto Terrazas, Eldest son of Mexican millionaire, who hopes to prevent brother's execution by Villa.

To FREE TERRAZAS, JR.

Help to Millions Will Surrender to Villa to Prevent Brother From Being Executed.

(By DIRECT WIRE TO THE TIMES.)

EL PASO, Dec. 27.—[Exclusive Dispatch.] To prevent his brother from being executed by Villa, Col. Alberto Terrazas, commander of the Irregulars at Ojinaga, has resigned from the army and come here to the conference with his son, Col. Luis Terrazas, before he goes to Chihuahua City to attempt to save the life of his brother, Louis Terrazas, Jr.

Col. Terrazas is the heir to the Terrazas millions and was Governor of the state at one time. Learning of his brother's plight, he hurried to Ojinaga and will insist upon going to Chihuahua to give himself up instead if Villa will not liberate Luis upon the payment of the \$500,000 ransom which was demanded of his father.

Luis Terrazas, Jr., is in health and it is feared that he will die if confined in the palace longer. He was arrested by Villa when the rebels entered Chihuahua and he is being held for ransom by the rebel chief.

Villa has insisted that Gen. Terrazas, his son, come to Chihuahua personally, but, because of his advanced age, Gen. Terrazas has been unable to go and his son, Col. Terrazas, will go instead.

HERMOSILLA (Son.) Dec. 27.—[Exclusive Dispatch.] Although great secrecy is being maintained regarding the future movements of the Constitutional army in Northern Sonora, it was made plain tonight by the regular order of the day that some sort of a change was being contemplated by the officials and that within forty-eight hours the entire army will be on the march.

According to popular report Gen. Carranza has decided to go to Culiacan in order to settle certain difficulties among the local commanders after which he is expected to cross over to Chihuahua either by the way of Cananea or over the mountain ridge separating Hermosillo from the state. He will not admit to the control of Gen. Francisco Villa.

The naval supply ship McLean arrived at Topolobampo on the west coast of Mexico last Wednesday and sailed again yesterday. In regard to these movements the captain of the ship made no mention of famine among the American colony there although he had ample provisions aboard to meet any probable needs.

An offer of Japanese army officers to help to subdue Villa in Mexico, which the Mexican war office says it received through its embassy in Tokio, has not been made known to the State Department.

Whether this offer could be accepted by the Constitutionalists was not mentioned.

It is expected that the Constitutionalists will be permitted to leave Chihuahua, for some reason the promise has not been kept and it is assumed that they are being held as hostages. Further news will be brought to bear in their regular order of the day.

CHICAGO BUREAU OF THE TIMES

Dec. 27.—(Exclusive)

Behind the universal wish

for a prosperous and happy new year

in the opinion of Chicago

merchants and brokers tangible results

are expected such hope will be realized

in the new currency and banking law

the feeling of uncertainty which

had a retarding influence on business

for several months past has

now given the Federal banking system

the understanding that will do

much to restore confidence

in the currency and banking law

which is given President Wilson

the attitude he has taken toward

business.

This has smoothed

the way for the resumption of

all enterprises of a legitimate

nature.

The irrigation necessary for

industrial growth and agri-

culture is flowing more freely

in the way.

William T. Fenton

president of the National Bank

today emphasized the im-

portance of the new currency

and banking law.

The new currency and banking law

will undoubtedly put out

a large sum of money for

improvement of roads and

irrigation.

The new currency and banking law

will become easier early in

the year in which case the railroads

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

will be given a larger share

of the currency and banking law

and the new currency and banking law

THE DOCTORS WHO CURE ECZEMA

DO NOT LOSE HOPE BECAUSE OTHERS FAIL. Even though you have treated a long time and received no relief, Dr. Shores and Dr. Shores will give you the result of their Twenty Years' exclusive specialty practice—an honest opinion on your case FREE, and a cure if the case is treatable.

Catarrh of Head and Throat
This form of catarrh is most common in children, especially in colds. Successfully treated with little cost by Dr. Shores.

Is your nose stopped up?
Do your nose are and tender?
Is there pain in front of the head?
Do you hawk and clear the throat?

OF THE EAR
Cataract often comes from the throat, along the Eustachian tubes into the ear, causing pain and temporary deafness. Is your hearing failing?

Do your ears discharge?
Is the wax dry in the morning?
Do you sleep with your mouth open?

Is there time to be cured?
don't let it run into complications.

OF THE EYES
Cataract often comes from the throat, along the Eustachian tubes into the ear, causing pain and temporary deafness. Is your hearing failing?

Do your ears discharge?
Is the wax dry in the morning?
Do you sleep with your mouth open?

Is there time to be cured?
don't let it run into complications.

ASTHMA
No one but an asthmatic can appreciate the terrible distress of this disease. Gasping, smothering, panting for breath, suffocating, losing control of the body at night, are but a few of the terrible symptoms of an Asthma victim. If you are an Asthma victim, let not another day pass until you try our wonderful treatment. You will find immediate relief and lasting benefits. Call or write.

DECEMBER 28, 1913.—[PART I]

SUNDAY MORNING.

The Climax. "CHIEF SANTA" IS JOY GIVER.

Thousands of Poor Made
Glad in Central Park.

Splendid Close of a Week's
Programme of Cheer.

First Public Christmas Tree
Decided Success.

Dressed in Old Santa's regulation
suit of red woolen with white cotton
edging, the Chief of Police yesterday
afternoon started the ball rolling and
began the work of dispensing presents
to the children of the poor of Los
Angeles. Chief Santa soon doffed his
headgear, old enough to walk, over to the
side where he found bright-colored
bags of candy. Her thin,
shabby coat and threadbare skirt
told of the struggle against poverty,
but had this little boy's peaked face
and well-cut shoes been direct
evidence. The young woman who placed an
arm about the mother's shoulder and
hugged her across to where the toys for
little boys were piled, is just a small
part of the Christmas tree. The
rest of the tree is the 1000
children who give as well as those
who received. All through the afternoon
these splendid women worked
with a will, and always with a smile
and a pleasant word for the mothers
and the tots that clung to their
skirts.

"Oh, darling, look!" whispered a
thin-faced mother as she hugged one
little baby to her breast, and with
the other arm drew another baby
head, old enough to walk, over to the
side where he found bright-colored
bags of candy. Her thin,
shabby coat and threadbare skirt
told of the struggle against poverty,
but had this little boy's peaked face
and well-cut shoes been direct
evidence. The young woman who placed an
arm about the mother's shoulder and
hugged her across to where the toys for
little boys were piled, is just a small
part of the Christmas tree. The
rest of the tree is the 1000
children who give as well as those
who received. All through the afternoon
these splendid women worked
with a will, and always with a smile
and a pleasant word for the mothers
and the tots that clung to their
skirts.

"A little remembrance for you," ac-
companied by a smile, was the form
of greeting and made the gift doubly
acceptable, and those who helped
in the work of the tree made it a
joyful task to heartily congratulate. In
the light of the thousands who re-
ceived Christmas cheer, one sees that
a real Kris Kringle would have worn
on such an occasion remained on his
face all through the long afternoon,
while with his able assistants, he
passed all gifts to more than those
children.

During the afternoon a splendid
musical programme was given.
Among those assisting in the pro-
gramme were Miss Esther Rawlins,
Madame Touron, Mrs. Ellin Yarnell,
the Ad Club, the orchestra from the
Ad Club and the girls' programme
from the Sunday school choir of the
Church of the Good Shepherd, with
Morton Kibble and Earl Lawrence,
violinists.

It was a wonderful sight, and one
long to be remembered by the thousands
who passed by to see the dis-
play. The children who had
climbed the steps of the big platform
received a present of some sort and a bag of candy, while
the splendid management of the
women of the Million Club, who have
had most of their earnings for the
good of the tree.

Long before the hour appointed,
the children, sometimes accompanied
by parents and many times not,
crowded the walls of the hall and
the platform, while the work of dispensing
the gifts was swiftly carried out and in three hours
had passed over the platform and
received a bit of Christmas cheer.

Mothers and babies stood for
hours waiting their turn, and in fact
as they could singled out they were

placed in the front of the line.
With the arrival of the 1000th of the Million
Club gave out cards for free, there
were only those in line who really
needed the candy and gifts. The good
this municipal tree will mean to the
hundreds of families cannot be esti-
mated.

"Oh, darling, look!" whispered a
thin-faced mother as she hugged one
little baby to her breast, and with
the other arm drew another baby
head, old enough to walk, over to the
side where he found bright-colored
bags of candy. Her thin,
shabby coat and threadbare skirt
told of the struggle against poverty,
but had this little boy's peaked face

Women's Clubs.

MOTHER HUBBARD AT THE CLUB.

Settlement Youngsters Are Royally Entertained.

All Children of Sierra Madre Are Club Guests.

Music, Munching and Mirth for College Women.

According to hollow and time-honored custom the Ebell Club yesterday afternoon entertained about 250 of the settlement children of Los Angeles in the clubhouse with a delightful presentation of the playlet, "Christmas Eve at Mother Hubbard's" and immediately after this made happy the hearts of the audience with many toys and other more substantial gifts.

The children were brought from their homes and returned in machines by members of the club, in itself a worthy holiday treat. The play was presented by a group of child amateur actors. They represented "Little Miss Muffet," "Jack Horner," "Little Boy Blue," "Peter Pan," "Jack and Jill," "Simple Simon," "Old Mother Hubbard" and a number of other quaint characters of childhood. Those who took part were Curtis Englar, George Moore, Frank Gaido, Eddie Cushing, Eddie Fernando, Mary Grade Cleveland, Una Fleming, Tony Palestrina, Leah Son and Lincoln Stedman. A group of animated toys was presented by William Morris, Eddie Cleveland, Leslie Leveridge, Burwell Harran, Rosalynn Jones and Brint Durham. When it was all over these young folks mingled with the little boys and girls in the hall.

The four ladies who were in direct charge of affairs were Mrs. Reuben T. Shettler, Mrs. William Reed, Mrs. George P. Thresher and Mrs. George A. Brock.

The calendar for January was issued yesterday and if all months in 1914 are to be as busy as the one at hand, the members will have little time to rest at the time of the formal Mother Hubbard meeting, which will begin on January 5, at which time the session will be devoted to business. Various amendments proposed to the charter will be discussed and passed. The different committees will submit reports of their annual work and a reception by the officers to the members will conclude the afternoon.

The following Monday will be devoted to a lecture on "Composers I Have Met" by Sydney F. Hoben, pianist and graduate of the Royal Conservatory of Music, who will be succeeded by George C. Craig, lyric poet. On January 12, Prof. Charles F. Holder and Dr. Ormsby Phillips will give an illustrated lecture on "Necessity for the Conservation of Fish." The final Monday will be given to a reading of "Lucky Pelt" by Lillian Quinn Stark.

The department work will occupy the majority of other days of the month. Next Friday, December 28, will be the time of interest in the book-study club. Works of Carmen Sylva of Roumania, of the late Queen Victoria and of Princess Alice will be taken up by Miss MayNeill, Mrs. Charles F. Patterson and Mrs. C. S. Ward. The luncheon will be in charge of Mrs. W. S. Cross.

Christmas Fun. The Sierra Madre Woman's Club entertained yesterday afternoon at a children's party in its clubhouse. Mrs. N. W. Tarr was in charge of the affair, which included the distribution of toys from a pretty tree. The guests were not only children of the members of the club, but all of the children of the members of the club were invited. After the distribution of the gifts the children told stories and played a number of games, finishing the afternoon with a dancing party.

Daughters of Confederacy Ball. Members of the Wade Hampton Chapter, Daughters of the Confederacy, with a real southern ball on Tuesday evening at the home of Mrs. R. B. Salyer, No. 970 St. Andrew's place. In addition to the hostess, there are on the Reception Committee Mrs. J. M. Black, president of the chapter; Mrs. M. E. Marvin; Mrs. John W. Burton; Mrs. Marvin Johnson; Mrs. Tom Brown; Miss Alice Eager; Mrs. R. H. Hutchison; Mrs. V. F. Fahy; Mrs. M. Blood and Miss Elizabeth Mathews.

Music, Munching and Mirth. Three things are scheduled for the time to be at the annual January Jinks of the College Woman's Club of Los Angeles, at the Wednesday Morning Club, this week. All sorts of novelties are promised and the latest dances that have entered into the community from Paris to Santa Barbara will be presented by some of the club members. Russian ballet, Spanish toe dances, French Apache steps, and all things new and novel in the tango will be produced. This portion of the program will be in charge of Mrs. G. M. Montgomery and Miss Ruth Hutchinson, and the various numbers will be under the direction of the Stanford members. A long list of new members from schools and universities in all parts of the country had just been added to the club roster.

A musical comedy written by Mrs. Isabel Mettenhoffs Gray will be staged on the evenings of January 7 and 8 in the auditorium of the Polytechnic High School. The presentation will be in charge of the dramatic section of the club, which is under

BE NOT DECEIVED

By the Bragging Match or the Legal Scrap Between the Hearst and Earl Papers.

The following is an accurate record of the total number of separate "Liners," printed in each of the six Los Angeles newspapers for the first twenty-two days of the current month:

FIRST, THE TIMES	48,542
Second Morning Newspaper	30,789
Third Morning Newspaper	16,571
First Evening Newspaper	14,618
Second Evening Newspaper	9,894
Third Evening Newspaper	2,263

The Times is a Consistent Actor and a Developing Factor

the supervision of Miss Margaret Phillipson.

Dances of All Ages. The dances of all the ages, from the time that man lived in caves to the present highly enlightened era, will be presented for the benefit of the Southern California Woman's Press Club on Tuesday evening at the Clubhouse. Norma Gandy and Ted Shaw, assisted by a group of five young women, will appear in solo and chorus dances. Miss Helen Tappe, pianist, and Alfred Walper, violinist, will assist.

The program will include a German, an Oriental, a Russian, and other dances, and such ancient classic dances as those portrayed in a recent film, produced at the suggestion and under the direction of Thomas A. Edison. At the end of the evening a group of members present and their friends will conclude the evening in some of the modern methods of Teutonic entertainment.

Everything Quiet.

Aside from the Christmas entertainment of the various clubs there has been very little to do in club circles and the demand for home entertainment during the remainder of this week will preclude any notable events. Practically all of the clubs have arranged a rest over the holidays and some of them will emerge from this vacation until the middle of January, after which time until Easter, the programmes of all devoted club expeditors will be built up. The spring of 1914 will be one of the most active that has ever been recorded in club circles of Southern California.

GLIMPSES OF SAN FRANCISCO.

(Special Correspondence of The Times.)

SAN FRANCISCO. Dec. 26.—

Christmas has come and gone, but in respect that it is no different from its many predecessors. All had a good time, except those who didn't have time to be in. The clubs are in session to a certain extent, but the kids found everything the same as ever. There was a bit of a storm at times, but around the clubs it was always fair weather when the good folks got together. On the whole, it is the opinion of most of us that the customs ought not to be abolished for a time at least.

When it comes to advertising our services, it is to be noted that we are resourceful. Sometimes it is bathing in the ocean in midwinter, but that is old-fashioned, so the craze now is dancing in the street to music by the Municipal band. The couples frequently do this, but as a result the thing the dancers are most proud of is the tango of a trolley car.

Common folks may indulge in paving dancing, but the rich do the tango. The girls, and their salatory efforts are confined to the stage, with top-notch prices for admission out of front. Disappointed because she saw no front, the girl who is in the lead has consoled herself with the plan of having an adorable China boy as an attendant.

It is not safe to wish Happy New Year to W. W. Shannon, once State Printer. A Judge has decided that he must pay \$500 for champagne consumed in two days. In vain the unfortunate man alleged that he had only been drinking beer, but he must have drunk that much in forty-eight hours. His offer to pay \$5 was scorned, and now he is almost sure that California will go dry in 1914.

The tides may come and the tides may go, but the land is there always, and according to the decision of the Supreme Court, it belongs to the State. It is welcome judgment, and already plans are on foot to put in use this hitherto untried property.

Sometimes it is hard to understand we persist in decimating our forests, and we persist in sending Wall Street an income of millions while he indulges in living in England, where he is regarded as sane. In order to get him back with us we have to pay him to call him a scat, and then we have to pay him to bring him back.

In connection with the Griffith Park highway a permanent water system has been installed at a cost of about \$1100. The water is pumped from near Tropico and is carried over the mountains with surface pipes.

This will be tapped at frequent intervals and will be available at all points. In doing this the commission had in mind the probability that a large number of trees and vines will be planted along the roadside to further beautify the drive.

OFFICIALS HAVE SYSTEM.

Deputy District Attorney Keetch Doesn't Believe in Keeping Prisoners Waiting to Know Their Fate.

The District Attorney's office is keeping up its "celerity" record in disposition of criminal cases. Deputy District Attorney Keetch, now in charge of arraignments and ex parte work in the courts of Judges Willis and Craig, is assisted by Deputy District Attorney Powell, who has been assigned to the bench.

Sometimes it is hard to understand we persist in decimating our forests, and we persist in sending Wall Street an income of millions while he indulges in living in England, where he is regarded as sane. In order to get him back with us we have to pay him to call him a scat, and then we have to pay him to bring him back.

WOULD ANNUAL ASSESSMENTS.

Property Owners Say Hill-street Tunnel Should Be Paid for by Entire City.

This week a suit is to be filed in the Superior Court asking that the assessment upon properties for the Hill-street tunnel be set aside. More than 250 persons have joined in the movement to bring this court action.

Property owners directly interested had seven million dollars in Hill-street properties, of which I. W. Hollingsworth is the chairman, to contest the city's assessment.

The total amount involved in this assessment is about \$124,000 and the assessments reach more than \$800 per person.

The case will bring to issue a point that has not been decided upon by the court.

The attorneys will take the stand under the city charter and the general State laws governing street improvements, there is no power within the city to levy special charges against specifically assessed property for the purpose of paying for tunnel construction, but that this should have been paid for by an assessment or tax upon the entire city.

SAVAN SCALP BY SECONDS.

Visit to This City Veteran of Two Wars and Hero of Hair-Raising Experience.

A deep scar on the head is evidence of how near the Indians came to scalping Edward Spitz, a wool buyer of Abiquiu, now a guest at the Alexander Inn. Spitz was a Union soldier in the Civil War and an Indian scout in the late '60's on the plains of the Middle West.

Spitz was captured by a band of warriors near Pawnee Rock, on the plains of Kansas. The savages did a war-dance around him and the Indians, who were scalping him, were scalping him when a party of soldiers came up just in time.

An Indian standing over Spitz with a knife was killed by one of the soldiers. The Indians then scattered and Spitz recovered a round. Spitz believes that the Indian could have completed the scalping operation had he been allowed two or three seconds more of life.

Spitz was a pioneer traveling salesman in the Middle West and on the Pacific Coast. In 1878 he made the trip between Colorado Springs and El Paso in a covered wagon. His line was

to tell the truth and accept long sentences.

It is enough to give peaceable citizens the shivers to read daily of the crimes committed here. The newspapers are making sensational copy of it, and are interested on the subject.

The residents of the Imperial Valley are expecting the coming season to be the greatest in the history of the district," said B. G. Walker, a ranchman of El Centro, yesterday at the opening of an ordination school, the price of gas being \$1,000 a thousand feet, and the gas settled out of the United States District Court, and will be struck from the calendar tomorrow. The rate paid by consumers was \$1.25 a thousand feet, and when the new Council imposed ordinances reducing it to \$1, the corporation vainly endeavored to prevent by injunction the enforcement of the ordinance.

GAS-RATE CASE SETTLED.

The old pending case brought by the Santa Barbara Gas and Electric Company against the city of Santa Barbara and the City Council of that municipality, to enjoin the enforcement of an ordinance fixing the price of gas at \$1,000 a thousand feet, was settled out of the United States District Court, and will be struck from the calendar tomorrow.

KEEPING BUSY.
Los Angeles people will have to step lively this week if they keep in touch with the fine offerings of our many handsome theaters. There is not to be a dark house in the city, and three of the engagements are by stars of the first magnitude. It would be a treat to have any one of them instead of the luck to get all three at once.

THE EXCEPTION.
They say a woman was the inspiration of the Southern Pacific bandit's crime. This may or may not be true. Men are often criminals in spite of the women who live them than on account of them. We hear a lot about the woman in the case where a man goes wrong, but the world is full of spineless males who are kept from the gallows and prison by the women they don't deserve.

THE WORLD KNOWS.
Claude Lorraine once gave Great Britain a number of his best paintings on condition that they should be hung in the National Gallery at London beside those of Turner, whom he regarded as a jealous rival. What vanity for a great man! Why should people care to compare themselves with others? Is not each man's expression peculiar to himself? Would you save yourself bitterness? Would you accomplish your best ends? Then put your hand to your task without regard to what your neighbor accomplishes. Have you forgotten the parable of the servant who did not enter the field until the eleventh hour?

THE POINT OF VIEW.
In speaking of a man who had been sent to jail for thirty days because his automobile was going faster than the regulations allow, a man we know remarked: "Serve him right! The judge was too lenient. He should have given the man sixty days." Another man near him said: "Well, it was tough luck. Perhaps the fellow lost control of his machine. Anyway, it's come to a pretty pass when a man must beat rocks like a slave for a month simply because his enthusiasm made him forget for a moment the exact number of rods to the minute which the ordinance decrees his machine may go." The last man who spoke is the owner of an automobile. The first man is a chronic pedestrian.

THE AMERICAN GAME.
Poker is sometimes called the great American indoor sport. The world has never ceased to wonder at its fascination. Perhaps poker is not fun, but discipline. Its purpose may be to convince the player that others are drawing in the game of life besides himself. The selfishness or blindness that overlooks this important point is always penalized. A nice discrimination as to the possible interests and values of the other fellow would save trouble in poker and out of it. There is not near as much bluff, percentage nor judgment about poker as the average person is led to believe by superficial comments on the game. Neither of these points is so important as the trick of remembering that you are not the only man who is playing. You may forget this if you want to, but there are people all around you who won't. In the draw, the other man has the same chance to get what he is after that you have, and it is wisdom to give him the benefit of the doubt. A good respect for the ability, intentions, courage and good luck of others would save us all from much embarrassment.

UPBUILDING REPUBLICAN PARTY.
The three absolute requisites for the upbuilding of the Republican party are, as emphasized by Senator Root, program, organization and solidarity. The last is as essential as the first and the second as necessary as either.

Organized efficiency must have a programme, affirmative and for advancement, else it remains a purposeless force. Unless there is organized efficiency, a programme becomes purpose without effort. An efficient organization cannot be maintained without solidarity, loyalty, capacity for the subordination of individual ambitions.

With the three requisites named, the Republican party can be solidly upbuilt and be as successful in the future as in the past. The constructive programme it has always had, and has now. It has been suffering in recent times from lack of the solidarity, without which there cannot be efficiency of its organization.

But the spirit of loyalty, which makes for solidarity, is reviving, say the Journal of Albany, N. Y. There are indications that the ultimate purpose will be fully accomplished, and the Republican party once more will present a united front to those who oppose themselves to its principles, will act as a whole, as a party must, to be fit to govern.

Senator Root said: "If men who are elected upon a party ticket recognize the party only until the count is ended, and then go their own way, without regard to the general opinion of the party, the party will necessarily go to pieces and fall. The man who takes office by the nomination and confidence of his party and then repudiates his honorable obligation to act as a member of the party, is obtaining office by false pretenses."

That is axiomatic, but there has been much straying from self-evident truths. The public mind needs to be brought back to the way of thinking that is straight.

THE SURETY OF PUNISHMENT.
On the night of December 1, Ralph Paras, alias John Bostick, scarcely more than a youth, robbed a passenger train near Los Angeles and killed a man who refused to throw up his hands.

On December 27, and less than three hours after his arraignment in court, the death penalty was imposed.

The deterrent value of punishment is in direct ratio to the surety and promptness with which it comes. There is not a criminal within the radius of the news dealing with the fate of John Bostick (or Ralph Paras, rather,) but will be shocked into a feeling of awe and respect for the law and its officers by the swiftness of justice. There is no man who gambles with crime for its reward but feels that his chance of escape is worthy of the risk endured. Let that chance be reduced to the minimum and crime will proportionately decrease.

The officials of Los Angeles county have earned high commendation for the effectiveness of their methods and the directness of their efforts. There has been no frumpery and red-tape, no pomp and spectacular show, so pleasing to the apprehended criminal whose vanity is bloated if a fuss is made over him. We doubt if ever before in the United States so short a time has elapsed between the crime and sentence of death, and to the best of our recollection there has never been so rapid a disposal of a similar case between the time of apprehension and the sentencing to be hanged.

It is apparent that crime is receiving slight encouragement in Los Angeles. A Mexican attempted to hold up a bank at Eagle Rock and was captured a few hours later. An 18-year-old boy laid a careful plot and succeeded in killing a messenger from whom he took \$30 and was caught in less than twenty-four hours. The I.W.W.'s and associates started a riot and defied the police, and soon found themselves helpless, while many were locked in cells.

It is also significant that the more vicious crimes are being committed by boys and young men. Bostick was aged 23 years; the Mexican bank robber was but 18; the boy murderer also 18. There was no occasion for any of them to be desperate—they were not starving; they were not in poverty. In two cases they turned to crime to secure money for a girl. They wanted to be "sports" and needed money.

We recognize that the proper, or at least the most desirable, place to check crime is in teaching those who have criminal tendencies their responsibility to society and thus eradicating instead of having to suppress lawlessness. But Utopia is a distant land, and, under the conditions in which we live, the only effective deterrent possible is to make punishment swift and sure so that criminals will have a wholesome respect for the law and its officers.

JOHNSON TO SPEAK.

Among the things that the New Year will bring to us will be a statement from the lips of Gov. Johnson as to what political movements he will make in 1914. The subject is momentous, too momentous to be revealed as the dying year threads its way into mystic maze of old annals. Therefore, the Governor with impressive dignity has issued a formal statement to the effect that on January 1, or shortly after, he will let it be known whether he intends to retire from politics, run for Senator, or again seek the Governorship.

In the name of Plumwood! One would think that our Governor was some officially-recognized Sir Oracle drawing inspiration from the Parcae, that as he wished, everything should be, whether the citizens of the commonwealth willed or not. As for this little matter of retiring into private life, we have a fancy based on certain observations that if Mr. Johnson does not do so with his own volition he will do so because he cannot do otherwise. No man has yet become big enough—the Governor's opinions to the contrary—to pick and choose his political offices as his desire dictates. The people as the average person is led to believe by superficial comments on the game. Neither of these points is so important as the trick of remembering that you are not the only man who is playing. You may forget this if you want to, but there are people all around you who won't. In the draw, the other man has the same chance to get what he is after that you have, and it is wisdom to give him the benefit of the doubt. A good respect for the ability, intentions, courage and good luck of others would save us all from much embarrassment.

THE PHILIPPINES AND MEXICO.
Do we want the islands in the Pacific to duplicate conditions as they exist today in Mexico? If so, we can pursue no surer course for accomplishing this end than by withdrawing our authority from the Philippines. We can thus effectually undo the splendid work of civilization so ably and so actively on the way.

The Democratic administration may add this fatal folly to the supposed humanitarian principles that have dictated their so-called Mexican policy. In the Philippines, however, they have no semblance of a pretext for leaving the unsaved to work out their own salvation with rifle, machete and cold-blooded slaughter. "Hands off Mexico," till the last rag of hope has been stripped from her bleeding body, or till exhausted nature compels her to call for the services of a physician, is a policy at least sanctioned by international custom, seeing that Mexico is an independent nation.

But to remove the shoulder from the wheels of the car of civilization in the Philippines is a different matter. For we should be here actually shrinking an obligation we undertook under the eyes and with the approval of every nation in the world. We are not responsible for the chaos into which Mexico has been flung by her own misrule, but we should be directly and terribly responsible for any reign of anarchy in the Philippines, if we deliberately removed our protecting care.

The Filipinos are not a nation any more than the Zulus or the Maoris or the Kanakas are a nation. Yet the Maoris have thrived under the white man's rule in New Zealand. They have their share in the government just as the Filipinos have his share in the administration of the islands, according to his capacity for using it. No doubt the natives under the guidance of the higher Caucasian type will be capable in time of taking a greater part in this combined government. But they will always require an established power, like the national government in Washington, to stand behind them.

If the present Democratic administration demands a back-down and a reversal to a wilder type, sooner or later some other power will step into the vacancy. One ambitious and aggressive power, we know, stands watching at her very gates. It is to be the Philippines for the west or for

Outlook for 1914.

HAVING A GOOD TIME.

BY GORDON RAY YOUNG.

Kipling says that "the heathen in his lig- norance bows down to wood and stone." Stupid heathen! He should become civilized and bend the suppliant hinges of the knees to the artistic delites enshrined in cafes and the material images exposed by the fashion plates.

It is more than a puzzle, it has come to be more than a problem—it is beginning to be a tragedy—this "having a good time." We are scrabbling for pleasure as though our lives depended upon it. We find that our jobs and other duties break in annoyingly on our enjoyments.

This is the age of joy-ride, caviare, champagne and clothes. "Omnia vanitas!" Happiness is measured by gilt. We implicate the "idle rich"—not because they take bread out of our mouths, but because they take enjoyments that are over our heads. For since we judge ourselves by what other think of us, we cannot be content unless we are smeared with gold, and is it not the quintessence of asininity to suppose that one can have a good time and not be stylish?

As into the apple that was pressed to the lips of Eve, we have bitten the fruit of luxury and the taste lingers. The apple caused Eve and Adam to pine for clothes, for they looked upon their nakedness and were ashamed. The fruit of luxury has made us pine for clothes, for we have looked upon our shabbiness and are humiliated. Indeed, so that life may be endurable we must dine on concoctions that have fancy names, and strange spices, and drink beverages that have a reputation, and smoke totaclos that are established by elite patronage, and gather in an attire that is conspicuously stylish to madly dance queer quadrilles in the imitation of the most grotesque. It is pleasure we crave—pleasure about which is the aneurysm of extravagance.

It has become a wild rush for gewgaws, a stampede for tinsel, a tumultuous clamor for spangles. And we blame our impoverished bank accounts and slim pay rolls onto the high cost of living. A clever satirist has said that it was rather the cost of high living.

Now are the most of the pleasures on this earth the most satisfying and the least expensive is conversation. But, like letter writing, it seems to have become a lost art. Pick out any reception; play eavesdropper in any cafe, or be ill-mannered enough to sit back and let your friends talk naturally for a time and then just listen and think of what they say and how little it means.

Like the planets about the sun, their adjectives revolve about the "good time" they have had, are going to have, or that some one else has had. Even those superior creatures known as men, who boast that they are frightfully bored by the gossip and trivialities of women, are hopelessly tangled in the web of "good time" verbiage. Yes, even Mother Grundy fascinates the average man. Stoutly deny it he will, but what of that? Duplicity should be in the masculine gender.

The whole of the conversational bubble and we always prattle, like children, of those things that most vitally interest us—centers around something that has expense "good time" attached. Every topic that makes the tongue wag frequently must have a mercenary value. Besides, average persons talk of themselves if encouraged; of other people if polite. And though it all runs the motif of yellow metal: "She wore that—it looked cheap—I wore that—it was spindly—He paid so much—That cost less—Mrs. X entertains well—gorgeous decorations—it was high-priced, but—" and there you are!

Inject into the ordinary group a serious subject and watch what happens to it. It will either be cut to pieces by indifference or kicked out by flippancy. As well try to interest a group of Esquimaux in metaphysics.

It is not native ignorance on the part of people that makes it so. It is not a lack of intelligence. It is simply a lack of interest.

Matches—Be sure your match is out before you throw it away. Matches whose heads glow after the flame is out are dangerous.

Tobacco—Throw pipe ashes, and cigar or cigarette stumps in the dust of the road, and stamp or pinch out the fire before leaving them. Don't throw them into brush, leaves or needles.

Making Camp—Build a small camp fire. Build it in the open, not against a tree or log. Scrape away the trash from all around it.

Breaking Camp—Never leave a camp fire, even for a short time, without quenching it with water or earth.

Bonfires—Never build bonfires in windy weather or where there is the slightest chance of their escaping from control. Don't make them larger than you need.

Fighting Fires—if you find a fire, try to put it out. If you can't, get word of it to the nearest United States forest ranger or State fire warden at once. Keep in touch with the rangers.

Where the Actor Fell Down.

[Philadelphia Telegraph:] Here is a little story that was told by Congressman S. Hubert Dent of Alabama, when one of the speakers at a recent dinner referred to the stock market.

His heart being filled with great generosity a certain esteemed citizen once loaned an amount of money to the speaker and the actor friend being more or less elusive under certain conditions that was the last the esteemed citizen saw of him until another change came in the style of the calendar.

Six years ago rice growing was started in Arkansas. Now there are nearly 100,000 acres of rice land under cultivation. For

formerly rice was raised almost exclusively in the swamps of Louisiana, Florida and the Carolinas. Now rice is raised on high, well-drained plateaus. The ground is prepared exactly as for wheat. When ripe the rice is cut by ordinary self-binding sheaves just as wheat is.

Rice grown on the uplands is drought-proof. It is watered by pumps which get water from an inexhaustible underground supply. It is estimated that a 150-acre rice farm completely equipped with pumping plant will cost but little more than a corn or wheat farm of similar size and the profit of rice-growing is greater than of any other grain.

An instance is given in an Arkansas journal of a farmer who planted ninety acres to rice last year at a total cost, including pumping, of \$1800. His yield was 5964 bushels, which sold at an average price of \$1.05 per bushel, or \$6282.50 for the whole crop, a net profit of \$4462.20 on ninety acres.

The most advantageous condition for rice culture appears to be land that can be abundantly supplied with water at times and that can be perfectly drained at other times. There are vast tracts of unappropriated mesa lands on both sides of the Colorado River admirably situated for the growing of rice. A dam and power plant might lift the river water to reservoirs on

the tableland from whence it could be distributed by aqueducts to rice farms.

Rice raised in California and Arizona would have a special and profitable market of its own. The Times would be glad to note the organization of a local rice-growing colony.

WE TOLD YOU SO.

From time to time we have insisted that Long Beach was a good town in spite of long hairs. It has been too close to Los Angeles not to grow and be prosperous.

Besides, the secretary of its Chamber of Commerce has been so much alike that we have sometimes been tempted to refer to Frank Wiggins as the Blabbe of Los Angeles. Well, our prophecies have been fulfilled. In so far as the postal authorities at Washington are concerned Long Beach is now twice its former size and is as big as it has always thought it was. Of course Long Beach persisted in the mistake of spelling the name as one and not two words.

THE SIX RULES

For the Prevention of Fires in the Mountains.

Matches—Be sure your match is out before you throw it away. Matches whose heads glow after the flame is out are dangerous.

Tobacco—Throw pipe ashes, and cigar or cigarette stumps in the dust of the road, and stamp or pinch out the fire before leaving them. Don't throw them into brush, leaves or needles.

Making Camp—Build a small camp fire. Build it in the open, not against a tree or log. Scrape away the trash from all around it.

Breaking Camp—Never leave a camp fire, even for a short time, without quenching it with water or earth.

Bonfires—Never build bonfires in windy weather or where there is the slightest chance of their escaping from control. Don't make them larger than you need.

Fighting Fires—if you find a fire, try to put it out. If you can't, get word of it to the nearest United States forest ranger or State fire warden at once. Keep in touch with the rangers.

It is estimated that a 150-acre rice farm completely equipped with pumping plant will cost but little more than a corn or wheat farm of similar size and the profit of rice-growing is greater than of any other grain.

An instance is given in an Arkansas journal of a farmer who planted ninety acres to rice last year at a total cost, including pumping, of \$1800. His yield was 5964 bushels, which sold at an average price of \$1.05 per bushel, or \$6282.50 for the whole crop, a net profit of \$4462.20 on ninety acres.

Arroyo de la Brea.
FORM DRAIN
PROTEST GROWS.

Be Filed With City
Council Tuesday.

ous Campaign Secures
Many Signatures.

the District Frontage Is
Represented.

time for filing of protest against
assessment for construction of the
Arroyo de la Brea storm drain was
Tuesday. The City Council has
the ordinance of intention to
act on this work, and next Tues-
day will be the proper time for
the filing of the protest. The
voluminous protest is to be
a protest of such magnitude
as is not likely the Council will
take to override it. Should it
do so, however, there is
doubt that the frontage will be
overruled and a restraining
protest campaign is under the
management of the Northwest
Improvement Association. It has offices
in the Higgins building. Second
and Main streets.

special campaign at these of-
fices is on for only two and a
half days, yet the results are such
as the managers of the campaign
are confident they will secure at least
one cent of the property owners
in the assessment district on their
assessment.

Arroyo de la Brea storm drain
assessed to cost \$650,000. The
frontage within the assessment
district proposed comprises \$75,000
and there are more than 800
property owners in the district.

district extends to Sunset bou-
levard on the north. Wilmer street
is east. Fifteenth street on the
west. It extends westerly in trun-
cations to Third avenue.

At the time of closing the
district the frontage had been
affectionately known as the "frontage
of the protest." On the protest, repre-
sented by the frontage, were 450
feet of frontage. In addition
there are twenty other
frontages, these being circulated
by the Improvement Association
and filed with the City Clerk.

morning, a majority petition or protest
was filed in the court, where the
protests are set forth

as follows:

the construction of said storm
drain at this time would work a
burden upon the property in the
said district, for the reason
that the property is taxed and assessed
improvements to such an ex-
tent, to some, as to render the
improvement, to some, not
necessary. That the im-
provement, the character and mag-
nitude of which should be
by the entire city, and not by
any particular district, it being for
the improvement of the entire city
with an improvement that
the property would benefit there-
fore for other reasons too numer-
ous to mention, which we in-
clude in the petition.

grounds of protest are as follows:

the construction of said storm
drain at this time would work a
burden upon the property in the
said district, for the reason
that the property is taxed and assessed
improvements to such an ex-
tent, to some, as to render the
improvement, to some, not
necessary. That the im-
provement, the character and mag-
nitude of which should be
by the entire city, and not by

Features of the new rice industry.
The pictures were taken on S. R. Smith's ranch, six miles west of Wasco, in Kern county. More than a score of ranchers in this district are preparing to plant rice in the coming spring.

In Kern County.

TO PLANT THOUSAND ACRES IN RICE SOON.

ENCOURAGED by the successful experiments of John Sward, R. R. Smith and others in growing rice, more than a score of ranchers beyond Wasco, Kern county, are preparing to plant the white grain the coming spring. The enthusiastic land owners believe that enough will be under cultivation in the next year to justify the erection of a rice mill in the district.

Smith, who is manager of the Crown Columbia Paper Company of this city, owns 1600 acres six miles west of Wasco. He was one of the first to plant rice. Two years ago he became convinced that the land in the district was suited to rice and he sent samples to the California State Board of Agriculture in Washington and asked for advice.

Acting upon the suggestion of Smith, the governor of the state sent samples to the district. He reported the land around Wasco well adapted to rice culture. It is believed the entire Big Field ranch, owned principally by Angelinos, and the territory about it, is rice land.

Smith first planted three acres, the crop averaged \$2000 pounds to the acre, a very satisfactory yield. The next season he devoted fifteen acres to rice and harvested an average of \$4000 pounds to the acre.

The two experiments convinced him that the crop can be raised with profit and he has ordered special harvesting machinery and is making arrangements to plant a large field of rice this spring.

Rice is a special binder with heavy wheats and of heavier construction than the wheat binders. The rice in the district was threshed with a wheat thresher last season but there is a loss of grain by this method. The growers now have a special rice thresher in the district by next fall.

Smith and others have discovered that Japanese rice is the variety best adapted to the soil and climatic conditions of Kern county. Jessie Peters, who assisted Smith, and others in their experiments, is giving a special study to rice culture.

The ranchmen around Wasco are thoroughly convinced that they can grow rice profitably. Smith said recently: "The men are experimenting to plant rice the coming season. That indicates that they will very soon have enough acreage to justify the building of a rice mill. Some of the ranchers already have ordered special machinery for planting and harvesting rice."

"The soil in the district seems to be ideal for rice. It is heavy and holds water. Last year I used the waste irrigation water of a number of alfalfa fields on my rice. Other ranchers could follow this plan to advantage."

"The land around Wasco has trebled in value since it became known that it is adapted to rice culture. Interest in rice is increasing and I believe that the locality will become noted for its rice."

"Rice straw has a value. It makes good feed for cattle and it is valuable for paper making. A government expert told me that the straw could be

Night Letters About Love

(Continued from First Page.)

... until Monday afternoon at 3 o'clock. The night letter! Over the wire it would be possible to ask the siren, this Gaby Deslys, the love of whom King Manuel is smitten with having lost his kingdom, what a woman! ... and when he married under difficulties, but then he could be found more competent to give an opinion than this doll-faced, orange-haired sprite who turns somersaults topsy turvy and is reputed to have more costly clothes and gems than any other woman in the world, and who doesn't think \$5000 a week is much of a salary after all? ... surely it was worth trying.

NIGHT LETTERS INTERVIEW.

Mademoiselle, what is love?

It is easy to picture the sudden parting of those pursed coral lips when she got that message, but the answer was prompt, and, oh, so naive!

"You a woman, monsieur, it is when she sees the man who is handsome."

Thus wired Gaby, and in answer to a message: "What is a handsome man?" came the following, charged to the wire: "A man of \$5000 a week, and he has made Gabrielle of the Lillies a spendthrift."

The man loved by a woman, it is impossible to describe him. Some are stout—yes, very stout—and short. Sometimes tall and thin, dark or light blue eyes, brown or blue, and light or dark hair—yes, never, even red hair sometimes.

"It cannot be told, but every woman knows. When she sees the man she loves he suddenly becomes handsome—the handsome man in all the world. I am sure that when she sees a handsome man she loves him more than anything else in the world. Today one—tomorrow another. That's why an actress should be married."

DON'T BELIEVE IN MARRIAGE.

Naturally I wired Deslys and put it to her satisfaction: "Then you do not believe in marriage, not for love, not for money, it might be? Even for a throne?"

"Not for an actress—no, not even for a queen," came the prompt response. "I would not marry a King if I could marry no man. Not to sit in any throne would be to abandon my art, my life, on the stage. To sit in all there is in the world, all except love, and love is at least inconvenient when one is married."

"Tell you and Manuel—" It was all I dared write. Maybe right here Deslys would terminate this otherwise though expensive interview by wire. But no.

"I will not refute the statements, but I must say the newspapers of the world have not been kind to me. They say I am a woman, and that I am a siren, a monster. They will separate my private life from my public life. They should speak of me as an artist in the theater—the rest belongs to me."

"Except a jump from, say, \$200 to \$500, it was المالية but she wouldn't stop reply prepared?

"Actress, they do not credit me with being good. I am good; ah, yes, very good. I always go to church on Sunday. I was always a Catholic, and all my people are. When a little girl first called me the 'big ecclesiastic,' because I was so good. Then I went up to Paris and began to sing on the stage, and now for my things that are not kind, they do not know what a quiet life I lead."

LIKES AMERICAN MEN.

More Chaperon wired Anthony to his, down in the south. Chaperon wired King Leopold of Belgium around her jeweled fingers, and in the public eye a woman is more interesting as a connoisseur than Gaby Deslys.

It is asked what people she liked for her.

"The American men," was the quick response. "Don't think," she added, "it is because I am in America, for I do not like the American men. Perhaps they are beautiful, they are good citizens, and they do not like them. I do not like them better than the French men."

GABY'S LOGIC.

"It is not necessary to know people to like them. It is not necessary for a woman to know a man well to like him. Perhaps they do not all look like monsters, but women love them, and they are handsome and American men are handsome."

"They are not polite—no, no; they are not as polite as the French, German, Portuguese or any of the European nations, but they are sincere and honest, and I admire them very much."

"But I would not marry an American—I would not marry any man."

The actress must meet many entertainers, it is her business to be faithful to her husband. Perhaps other women are not the actress.

"Do not misunderstand what I mean by 'faithful,' for I understand that different of that word in America. Here, I am told, a woman does as she pleases, if her actions are what the world desires of her."

"Now, I think different. By a wife's goodness to her husband I believe that thoughts must be only for her. Too, it is impossible when I am a headless man to admit the truth and the newspapers are writing about Gaby. You understand?"

"Old, and being Christmas week, that is no more questions."

MEN AND EVENTS.

After a severe windstorm had broken the house of Mrs. A. C. Weston in North Bend, B. C., 100 neighbors and friends contributed the materials for repair, but took a day off and rebuilt the house.

There were 500 guests at the Christening of Dick Wah Moy, son of a Chinese immigrant merchant, of the richest, Nottingham, after a family which occupied three days, and included as many guests, cost the father \$2000.

John Lee Smith is the oldest inhabitant of Pacific City (Oregon) and one of the richest. Notwithstanding his 80 years, he still has his grit and energy, and in September he made a Great South Bay in a boat, half a gale blowing at the time, and crossed a couple of hours off his land.

When George Schwartz, a farmer in Marion, Pa., cut down an oak tree he found imbedded in its heart a chest containing \$1652.

Some of the members of the Port Police force are capable police officers, of them, a Norwegian, a German, a Danish, a Norwegian, and a German. Thomas Foley can speak English, Italian, Portuguese, and German, while Antonio Pasquale is fluent in Polish, Russian, German, and Hebrew, besides the English.

"Thinking is the short cut to the household," said Sir John. "No girl should be allowed to enter into the holy state unless she has a certain amount of money, can not only cook and a chop, but iron a sheet and a stocking."

BABY'S HEAD BEGAN TO FESTER

Eruption Like Ulcerated Pimple.
Itched and Irritated Awfully. Hair
Fall Out. Cuticure Soap and Oint-
ment Cured in Three Weeks.

P. G. Box 55, Garment City. — "My
little baby boy, two months old, had
a sore on the back of his head and it
caused, distressing
quite a headache. I thought it would
heal right away, so I didn't take
it up and waited. It
got worse and worse
and I had to take
it to the doctor. He
told me to wash it
out with water and
then to put a poultice
on it. After a few
days it began to fester and
the sore came over it. This continued
on his neck and gradually spread to the top of
his head. The eruption was like blisters
and itched and irritated him
awfully, especially at night. When he would
try to dig his head, I had hard work
to hold him from doing this. His
head fell out when the sore would
dig into it.

"The sore looked red and mortified. I
had all his hair cut close to his head so
I could get the Cuticure. I did this
night and morning and I washed his head
well with the Cuticure Soap. In just
one week it was healed nicely and in three weeks it
was cured and there is not even a scar."

Central Miss. A. H. Walker, Dec. 17, 1913.

Cuticure Soap and Ointment
are sold everywhere. Largest supply of
both mailed free with 25¢ p. Skin Book. Ad

A GLANCE AT NEW PLAYS.

"The Five Frankforters" a Piece of Real Literature; "The Great Adventure" An Amusing Satire Of The English
By An Englishman.

BY HENRY CHRISTENSEN WERNACK.

"THE FIVE FRANKFORTERS" are not sausages. That is only the name which Carl Rosessler has given to the clear and brief romance which he has artistically woven around the house of Rothschild and of which we are given a beautiful and accurate translation by J. Fuchs.

Rosessler calls the sons of old Amesch and Gudula the Five Frankforters because they are the great men who came from "Jew's Lane" in the ghetto of Frankfort. His play is printed in New York, where it has been produced on the stage with success.

It is first of all, a superb presentation of the ideal family unit. Next, it is a shrewd interpretation of basic principles.

After that, its virtues and values are many. One of these is, statesmanlike. The work has a fine swing in spite of an exalted stride which never falters. Few contemporary works of its length are so well balanced. Finally, it is a contribution to the literature of pure comedy. It is devoid of that undue emphasis which dams so many otherwise fair creations and it contains no strained situations. It makes no false appeal to prejudices. It is a good comedy, it is unfair to its wide variety of characters. Indeed, a man would have to write an exceedingly good book and to make an exceptional play based on some theme which occurred in America in order to make it fit for a wide audience in this country. To undertake to command the attention of the public with no special dramatic assurance, but with a simple and effective plot, is a difficult task. In which I feel that Rosessler has been happily and entertainingly successful.

The princess, in addressing her cousin Eveline, tells her that she "realizes that hers of almost eighteen years is a career of a woman who has ceased to be young without having made up her mind to confess defeat." Turning to Count Lehrenberg, she says, "Don't put yourself to the constraint of being nice; you are not that kind of a woman." Lehrenberg replies, "It was only about that the brilliancy of your gray eyes is reminiscent of the beauty, so infinitely dear to me, of gray cavaliers." To the same question, "You may believe for once in the sincerity of this compliment. Gorramizing comparisons, with our cavaliers, beoken genuine emotion."

Pretty Eveline, Salomon's daughter, confides to the duke that his confessor, who is a man of a household management is a good general task, one in which I feel that Rosessler has been happily and entertainingly successful.

I would rather let the book speak for itself than make any comment of my own on its intention or expression. The best I can offer is

this must be a few living fragments which can hardly do either the play or the reader justice. One of the brothers says to a young woman, "Your chief aim must be to take firm root in the soil by unimpeachable solidity. You must rest content for years with small transactions, mark time, improve, multiply, and then, when the great moment comes, concentrate all your energies; follow your opportunity, heedless of party considerations, in grand style and the grand manner."

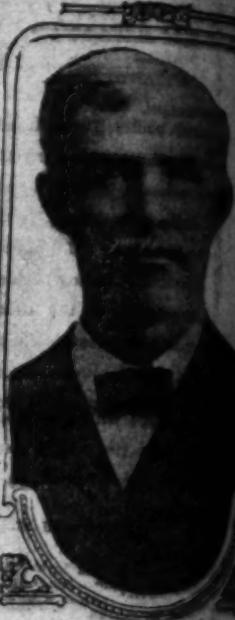

When Salomon arrives with a patent of nobility, creating them hereditary barons, he tells them that knighthood costs blood or money. In speaking of his daughter's possible marriage, he says, "It is a good match. It is a shrewd match. It is a shrewd match."

The duke, in describing Salomon, says, "His bad manners are so perfectly free from every trace of embarrassment as to impress one almost like good manners." This same talk personified in coming out on a certain occasion. "He administered spiritual consolation by courting her in a quite secular fashion."

The princess, in addressing her cousin Eveline, tells her that she "realizes that hers of almost eighteen years is a career of a woman who has ceased to be young without having made up her mind to confess defeat." Turning to Count Lehrenberg, she says, "Don't put yourself to the constraint of being nice; you are not that kind of a woman." Frank Smith
Mayor-elect of Santa Barbara
confronts a stormy crowd.

Antagonists.

NEW MAYOR HAS A FIGHT AND

SANTA BARBARA COUNCIL CAUSES HIM TROUBLE

While Smith, Mayor-elect, is ushered into office by the overwhelming majority of the city council, he is confronted by a stormy crowd.

SANTA BARBARA The outcome of the election of the new mayor is now known. Frank Smith, Mayor-elect, term of office will begin on Jan. 1. It is not what the new mayor will do, but what he will be able to do with a Council, the members of which were elected on a ticket opposed to that on which he ran.

When Mr. Smith accepted nomination for Mayor it was an urgent invitation of the independent men, practically all of whom gave him their support. He was not formally inducted into office, but he was received by the Council, who see that he was generally accepted by them. Opposing Mr. Smith was Mr. H. H. Henck, whose candidate was defeated by the Clean City League.

At the election Mr. Smith, as Mr. Henck, an independent, was defeated by the Clean City League.

At the election Mr. Smith, as Mr. Henck, an independent, was defeated by the Clean City League.

As most municipal offices work under a big budget, the Clean City League opposed him.

Councilman C. C. Clegg, a Clean City League man, laid down by Mr. Smith, accepted the judgment of the Clean City League.

Mr. Smith, as the Clean City League candidate, was defeated by the Clean City League.

Mr. Smith is one of the best men in Santa Barbara, coming from a good family. He is a Clean City League man, and he held the position of Clean City League president for two years.

He is a graduate of the University of California, and he is a Clean City League man, and he held the position of Clean City League president for two years.

He is a graduate of the University of California, and he is a Clean City League man, and he held the position of Clean City League president for two years.

He is a graduate of the University of California, and he is a Clean City League man, and he held the position of Clean City League president for two years.

He is a graduate of the University of California, and he is a Clean City League man, and he held the position of Clean City League president for two years.

Frank Smith,
Mayor-elect of Santa Barbara,
confronts a stormy administration.

Antagonistic.

NEW MAYOR HAS
A FIGHT AHEAD

SANTA BARBARA COUNCIL
CAUSES HIM TROUBLE

While Smith, Mayor-Elect, was ushered into office by an overwhelming Majority the Council for Council on His Ticket Was Left at the Post.

SANTA BARBARA. Dec. 28.—Local interest is centered on the outcome of the administration of Frank Smith, Mayor-elect, who goes into office this morning. It is not what the new Mayor will do, but what he will be able to do. The Council, the majority of whom are elected on a ticket diametrically opposite to that on which he went is the point for conjecture.

When Mr. Smith accepted the nomination for Mayor it was upon an invitation of the leading business men, practically all of whom gave him their support. While he was not formally endorsed by the business men, he was generally supported by the opposition.

Opposing Mr. Smith was John Hancock, whose candidacy was endorsed by the Clean City League and the churches.

At the election Mr. Smith defeated Mr. Hancock by an overwhelming majority, but the Clean City League candidates for the City Council succeeded in getting a majority of the men, practically all of whom gave him their support. While he was not formally endorsed by the business men, he was generally supported by the opposition.

January 1, 1914, a new year begins—a year of new hopes, new ambitions, new accomplishments.

IT IS our earnest wish—and it will be our untiring endeavor to offer our patrons throughout the coming year, a service entirely in keeping with our record of the forty-five years past.

And if it be possible in any way to improve this service—we will bend every energy to this improvement.

We will be pleased to have you visit our store. Devote an hour or so to a leisurely inspection of our art department, the entire second floor—a noteworthy assemblage of rare pieces from the great art centers of the world.

A DEBUTANTE'S LETTER.

LOS ANGELES, December 24.

Anthony darling:
We certainly get home in time for Christmas, notwithstanding the allurements of New York, and thus the dear pater was saved from that particular form of domestic martyrdom which brings such resentful delight. What a merciful thing it is that the Lord invariably makes us love our shackles! Freedom is a much over-praised happiness.

It was good to see everyone again, dear. We felt as if we had been away for years. We dined often on the paté de poussin, for all the world as though he had driven us forth into the cold, cruel nowhere, and had now relented and given us permission to come home. He blinks and a shivering comes in the nervous fashion and we all declared we would never, never be parted again. So I suppose I shall have to take them with me on my honeymoon now.

We were very stylish this year in our Xmas presents, for most of them were, naturally, imported and enhanced in value by the skillful way we dodged the customs at New York and Jeannine's home port. You know they make you write a list of everything you have bought while abroad and sign it as correct within your knowledge and memory, etc. After \$100 worth, which must be fairly necessary to meet immediate wardrobe and personal requirements, you pay duty. All kinds of presents, either those received by you or those you are giving to other people, must be paid for. It is a most separate schedule. It was really pathetic to see us all sitting round the saloon sucking our pens and trying to make the prices fit in under the hundred.

Those unfortunate at New York knew every trick and put the most embarrassingly personal questions. They also take a fiendish delight in raking out any soiled linen you may be having in your trunk, and most of us had to wash laundry at least awaiting urgent attention. The only consolation is that everyone is so busy and miserable trying to hide their own shame that they haven't time to notice ours.

Those unfortunate at New York know every trick and put the most embarrassingly personal questions. They also take a fiendish delight in raking out any soiled linen you may be having in your trunk, and most of us had to wash laundry at least awaiting urgent attention. The only consolation is that everyone is so busy and miserable trying to hide their own shame that they haven't time to notice ours.

It was lovely to find the tango so firmly established in the weeks while we had been gone. Of course, it was danced everywhere abroad—diligently, seriously, properly. But it had only advanced to the mere "raging" stage before we left Los Angeles. Now we find all the dowagers and grandfathers dancing it at the country clubs, and every sort of business man from the bank president, taking lessons on the quiet.

Isn't it jolly? Someone has described it as the springtime of the world, and I think that it delightsfully. It is a jolly dance, and one has the joyous feeling of living in musical comedy. The pater and mater are quite expert, and you would laugh to see the dear old pater solemnly prancing about the room from his pocket to refresh his memory upon some of the steps. I notice the fat men dance best, so far. My cup of happiness will not be full until some of the tall, handsome, dark ones come through the ballroom. All the same, of course, the tall, dark ones are rarely as interesting as they look.

But apart from the tango, what do you suppose impresses me most upon returning home? The strictly good manners of the Americans, if you please! Local hostesses are terrific sticklers for etiquette—and, once one has passed a certain desirable rubicon in age, she becomes more and more delightfully unconventional that all the less important ethics of etiquette generally go gracefully by default.

Once I heard Lady Fielding say that no one would remember to whom the lesser converses in England if it was not for the Americans and the servants—and I begin to understand what she meant since we came home. She has a witty tongue, and her bon mots are welcome from time to time.

The best art in manners seems to be in knowing them perfectly and forgetting them. It is the same with clothes. There is such an absence of self-consciousness about these aristocratic Englishwomen. They have learned the art of dressing exquisitely—and forgetting it. Nearly all American women of any standing dress well, but very few of them can forget it.

The Christmas party at the Country Club was very jolly, quite rollicking.

We had only been home two days when we took that opportunity seeing as many of the best possible. The nice Simpson boy was giving a jolly party, and I felt quite sad to be out of it. Tell me, dearest, is Ward engaged? It looked tremendously like it, but I didn't like to ask him.

Do you happen to be informed upon the tiger-skin joke? I am desperately curious. It appears that since a certain book appeared, which every body has been reading, that the tiger skins have become very fashionable in conjunction with a gentleman named Paul and a lady who holds a rose between her teeth! Allusions thereto crop up in conversation frequently and make me feel rather uncomfortable. She only laughed and said: "Oh, Elinor writes to please the men, my dear. Rotten book. Don't read it."

Delusions have their limitations, it appears. There are considerable compensations in being a married lady. It is enough to make a poor girl marry the first man that asks her.

We have the Venture cousins down to stay, and we have been talking hard ever since we came home.

The mater is feeling awfully keyed up. So you will be well advised to accept her invitation for the week after next instead of now. Then you will come for all the softened charms of memory, without any of the acidity.

Au revoir, darling—bring lots of evening dresses when you do come.

Love from BETTY.

The Home Maker.

I kiss my hand to the morning star,
And call "arise!" to the sun.
Off on my orbit I've swum afar
E'er he has his course begun.

Through opened windows the breeze
new born.

comes, rollicking, fragrant, free,
And all the stories of early morn
Are glowing for mine and me.

In cheerful kitchen the kettle sings,
There's sizzle, there's savory smell,
And all of the little homely things
Are doing their duties well.

Under the magic of my hands two
The wheat flour turns to bread,
The brown beans change to a nectar
brew.

And so are my loved ones fed.

A kiss for my good man at the gate—

That never his love fame cool;

A swift caress for each curly pate—

To shorten the road to school.

And then while my broom and

And the wash-tub sparkles foam;

I sing, "Oh, blessed of women, I;

For I am the Heart of the Home!"

—Lillian Dwyer Rice, in New

York Times.

Three popular little children,
Who will be guests of Mrs. George A. Dobinson at a King John-matinee
Saturday.

In Social THE WEEK

PARTIES, RECEPTIONS, DINNERS, WEDDINGS AND THE LIKE.

CHRISTMAS shopping filled the part of the week, and now with the holiday over the bride-to-be and debutantes will again be supreme. Miss Josephine Lass one of the most interesting of the young engaged girls, was the principal guest yesterday at a handsome luncheon party given by Mrs. O. M. Soules of No. 857 Manhattan place. Christmas decorations with a mound of Richmond roses centering the table were the attractions, together with the daintiness of the service cards. Guests at this festive party were Miss Virginia Walsh, Miss Gretchen Day, Miss Lydia Salisbury, Miss Grace Miller, Miss Sue Adela Miller, Miss Eddie Miles, Miss Mary O'Neill, Miss Madeline Soules and Miss T. Ryan.

Card Out.

Ninety members of the young set will gather, January 5, at Mrs. Lucy Lantz, who will entertain at her South Figueroa-street home with a dancing party.

Box-Opening.

Miss Mary Richardson, daughter of Mrs. Davis Richardson of West Adams street, has named February 1 as the date of her wedding to Dr. Lloyd Miller of New York, and the bride will be a young debutante. Richardson has asked her attractive sister, Miss Jane, to serve as maid of honor, while Dr. Miller will be attended by Melvin George of Hollywood.

Music Party.

Miss Joseph Maher of South Figueroa street and her son, Edward R. Maher, will entertain about thirty friends with a week-end house-party

on Saturday.

European Tour Ends.

Mr. and Mrs. Robert J. Kerr have returned from a year's trip abroad and are back again. Mrs. Kerr's mother, Mrs. George S. Cope of No. 246 Belgrave Avenue, Christmas night, was entertained with a large dinner for members of the family and to welcome the return of the travelers.

Bride and Groom.

Compliments of Mr. and Mrs. Chester W. Judson, who have returned from their honeymoon, and Mrs. Kenneth E. Preuss of West Adams street were host and hostess of a dinner party last evening, enjoyed by Judge and Mrs. George A. May, Mr. and Mrs. Walter F. and Mrs. Frank Clark and Eddie Roberta, Paul Kilmurry and pink candlesticks, a dainty appointment.

Young People Hop.

For their young daughter, Miss Margaret Johnson, Mr. and Mrs. E. P. Farnsworth, Jr. of West Twenty-eighth Street, were host and hostess of a dinner party last evening, enjoyed by Judge and Mrs. Walter F. and Mrs. Frank Clark and Eddie Roberta, Paul Kilmurry and pink candlesticks, a dainty appointment.

Brilliant Party.

Mr. and Mrs. Robert Marsh and Mrs. William Johnson, with their son, Mr. Kenneth E. Preuss of West Adams street, were host and hostess of a dinner party last evening, enjoyed by Judge and Mrs. Walter F. and Mrs. Frank Clark and Eddie Roberta, Paul Kilmurry and pink candlesticks, a dainty appointment.

Brilliant Party.

Comfort for the Living Room

THESE long, cool winter evenings are home evenings—when all the comforts of life seem to be summed up in the single luxury of lazing peacefully in a big, deep-cushioned easy chair beside the fire with a friend or a good book as a companion.

Such easy chairs you will find at the "California" in most gratifying selections and values. Great, comfortably-proportioned chairs with deep, soft cushions, into which you sink with delicious restfulness.

And you will find here all the other furnishings needed to bring your living room up to the highest ideal of home comfort—library tables, davenport, reading tables, etc.

The davenport, chairs and rockers shown by the "California" are mostly of English construction with deep double-spring seats, the cushions of real live down and finest upholstering. The frames are of selected mahogany and oak, elegantly finished, masterfully designed and constructed.

No other living room furniture can compare with these for elegance combined with the utmost comfort—and this is really the most economical furniture you can buy, for it is built to give years of satisfactory service. Come in and enjoy the luxurious ease of sitting in one of these splendid pieces and investigate our exceptional values. We court the closest comparison of our offerings.

Our windows this week show some pleasing examples of comfort furniture. Don't fail to see them.

Dr. E. Sunderland. Prices were captured by Mmes. Logan, McArthur, Mason and Messrs. Saurrat, Hindale and Dr. Sunderland.

Holiday Guests.

Mr. and Mrs. John Garnett of Calistoga, Napa county, are the house guests of Dr. and Mrs. William Garnett, No. 1824 St. Andrews place, for the holidays.

Christmas Dance.

Mr. Norman W. Hendershot, No. 212 Mariposa street, gave a Christmas dance for forty of her friends, followed by a banquet supper. The house entrance was hung with holly boughs, holly and branches of mistletoe. The ballroom was ablaze with many lights, and an orchestra played fascinating music to which many kept time.

Home from Honeymoon.

Mr. and Mrs. F. J. McCarty, who were recently married in San Francisco, have returned to this city from Santa Barbara where they spent their honeymoon, and after the first of the year they will be at home to friends at No. 922 South Vermont avenue.

Mr. and Mrs. Colton, of the bridge-lunchroom club to which she belongs, and some special friends. Poinsettias, the Christmas flower, adorned the place and scorecards. Assisting the bride were the mother and her niece, Miss Bertha Hartley. Thirty guests were present.

Christmas Fun.

Mr. A. H. Randall of No. 1428 South Burlington avenue was hostess Monday at a Christmas party planned for her daughter, Miss Juanita Bryant. The hostess was assisted by her niece, Miss Bertha Hartley. Thirty guests were present.

Bridge Luncheon.

A radiant mound of Christmas greens and holly brightened the table Friday afternoon for the luncheon given by Mrs. Lou Palmer, in her apartment at the Marwood Hotel, corner of Eleventh and Lake streets, for a dozen members of the bridge-lunchroom club to which she belongs, and some special friends. Poinsettias, the Christmas flower, adorned the place and scorecards. Assisting the bride were the mother and her niece, Miss Bertha Hartley. Thirty guests were present.

Dancing Party.

Mr. A. E. Bruer entertained with a dancing party at her home, No. 2123 West Twenty-first street, last evening, honoring her daughter, Miss Irene Bruer. The Yuletide season was suggested by the decorations of holly, branches of mistletoe and Christmas greens. This charming affair was attended by thirty-five guests, and keeping time to fascinating music played by an orchestra, the young people danced to the strains of many of the new steps. French was served throughout the evening and supper followed the dancing.

Among those included were Miss Dorothy Vanderbilt, Miss Isabella M. Bertram, Schreiber, Miss Cecile Greppi, Miss Elizabeth Merle, Miss Dorothy Whitley, Miss Auna Gillon, Miss Jeanette Schuck, Miss Margaret Polhamus, Miss Elizabeth Merle, Miss Dorothy Lightner, Miss Mary Hill, Miss Dorothy Lee, Miss Vivian Barnard, Miss Alice Cox, Miss Ethel Sutor, Miss Mary Alpaugh, Miss Eleanor Johnson, and Misses Dan McMillan, Blair Baker, Virgil Baker, George Bell, Dan McMillan, George Bell, Victor Churton, Fred Cox, Jack Howard and Herbert Fiorcken.

Evening of Cards.

One of the handsomely-appointed events of the week was the Five-Hundred-Card Evening given by Miss Tillie Sonnenman at her home, No. 922 Petree Park avenue, Friday evening. The elaborate supper served following the games a miniature tree with lighted tapers, and Christmas time, the base banked with sparkling snow, was the center of the table. Favours suggested the Yuletide.

Those enjoying the hospitality of the evening were Mr. and Mrs. G. W. Saurrat, Mr. and Mrs. John McArthur, Mr. and Mrs. E. S. Mason, Mr. and Mrs. Frank Arthur, Mr. and Mrs. Frank Arthur, Mr. and Mrs. Ed McCormick, Mr. and Mrs. Jack Dryfus, Mrs. Mae Terry Logan and Messrs. Langdon, G. Howe, Ralph Edinger, George Hindale and

cently been a guest of Mr. and Mrs. William Hough of this city.

Dr. George Lyman and Mrs. Lyman, of 1000 Franklin, have been here and have deferred their return from Europe until April. They had expected to spend Christmas with Mrs. Lyman's parents, Mr. and Mrs. F. W. Van Sicklen, but Dr. Lyman decided to remain in Berlin to assist in some professional work.

Miss Mary Helen Flinnell has returned to her home in Chico after a visit with the Misses Elizabeth and Jean Wheeler.

Mr. and Mrs. Robert L. Coleman, Miss Clara Coleman, and Mr. Robert L. Coleman, Jr., have gone to Honolulu to spend several weeks. They were accompanied by Mr. and Mrs. Coleman's brother, Mr. Harry Simpkins.

J. C. Kirkpatrick and Mrs. Kirkpatrick opened their country home in Pleasanton early in the week and have as their guests their son-in-law and daughter, Mr. and Mrs. Alan Macdonald.

Mr. Robert Louis Stevenson and his daughter, Mrs. Isabel Strong, are at Palm Springs, where it is hoped Mrs. Strong will recover from a severe cold contrasted a month ago.

Mr. Edward Salsbury Field left early in the week for New York. He will be home again Saturday. Mrs. Robert Louis Stevenson at Palm Springs.

Mrs. Stewart Walcott of Santa Barbara has gone to Chicago to spend the winter with her mother.

Mr. Henry T. Scott and his son, Mr. Robert O. Scott, left for Honolulu Saturday, and Mr. Harry Scott returned to San Francisco in time for Christmas.

Mr. and Mrs. Charles R. Johnson left Sunday for Raymond, Oregon, to spend a few weeks with their son-in-law and daughter, Mr. and Mrs. Edwin Lowe.

Mr. and Mrs. Harry Oelrichs are en route to Egypt, where they will spend the winter. Mrs. Oelrichs was formerly Mrs. George Parker, Mrs. Donald Keeler, Mrs. O. M. Morgan, Mrs. W. W. Lever, Mrs. Tom Wright, Mrs. A. T. Jenkins, Mrs. George W. Maxon, Mrs. Jenkins, Mrs. A. Wendel, Mrs. Mary E. Stilwell, Mrs. Baldwin Starr, Mrs. J. C. Brown, Mrs. Frank C. Whalen, of Ocean Beach, Mrs. Kelly, Mrs. S. S. Stevens, Mrs. Charles Bagley, and members Mrs. L. L. Vogel, Mrs. A. J. Sherman, Mrs. L. R. Ford, Mrs. Frank Boswell, Mrs. Frank A. Jay, Mrs. Ralph Hartley, Mrs. George P. Morris, Mr. William A. Morris, Mrs. E. J. Brent, Mrs. Richard Pennell, Mrs. Albert Mortenson, Mrs. Joe Zemansky and Mrs. Fred Gollum.

Brig.-Gen. John Pershing, U.S.A., has recently been relieved from command of the Department of Mindanao, and will command the Eighth Brigade in the maneuver camp in Texas.

Mr. and Mrs. Charles R. Johnson, who are at present at Ft. Worden, Washington, will command the North Pacific Coast Artillery District at Ft. Worden, Washington, for the remainder of the year.

Brig.-Gen. John P. Wissner has been ordered to command the Pacific Coast Artillery District.

Brig.-Gen. Charles J. Bailey, U.S.A., who is at present at Ft. Worden, Washington, will command the North Pacific Coast Artillery District at Ft. Worden, Washington, for the remainder of the year.

Mr. J. V. Cope of Denver is visiting Commander William M. Cross, U.S.N., and Mrs. Cross, at their home at Marin Island.

Mrs. James Raby has arrived from Guam and is visiting her sisters, the Misses Frances and Ruth Lent, who leave in March for Europe, where they will spend the summer months.

Rev. Dr. Adcock of London is visiting his son-in-law and daughter, Mr. and Mrs. H. H. Hastings, at their home in San Mateo.

Miss Frances Dillie left last week to visit friends in Washington, D. C., and New York, where she will spend several weeks before sailing for Europe.

Misses Evelyn and Geneva Cunningham have recently been the guests of Mr. and Mrs. Arthur Lord at their home in Paris.

Mrs. John Simpson has gone to Kansas City to visit her son-in-law and daughter, Bishop Partridge and Mrs. Partridge. Mrs. Simpson has re-

OUT-OF-TOWN-SOCIETY!

Pasadena.

W HILE Christmas was properly celebrated in Pasadena, there has seldom been a more festive season. Where festivities have been so exclusively confined to home and friends.

With the exception of a dinner dance Friday evening at the Pasadena Country Club, the Christmas idea was confined to a dinner and a few hours of fun.

There were no formal Christmas parties, but a number of prominent families have been here.

Miss Margaret McClure of Salt Lake City, is spending her holiday with her parents, Mr. and Mrs. James A. Miner, at Hotel Maryland.

Miss Irene Mercereau entertained Friday evening with a Christmas party which was enjoyed by a group of Stanford College men and women.

Mr. William Douglas Turner, who has lived in Pasadena many years, has returned to her parents' ranch in Lucerne Valley, San Bernardino, to remain indefinitely.

There will be an enjoyable dance at All Saints' parish-house Friday evening, January 2, given by the St. James Guild.

South Pasadena.

CHRISTMAS, with its bright

garlands and general good cheer,

brought many wanderers home to enjoy family reunions, which is made particularly delightful at the Yuletide.

Many of the young girls are here, and plans are being made to fill the hours of their winter vacations with gaiety.

Among the many delightful family parties on Thanksgiving Day were those of Mr. and Mrs. D. N. Dewart, who entertained with a dinner of twenty guests at their home, No. 424 Monterey road.

A center piece for the large table was a large tree, which was formed of crimson roses, the handles tied with bows of crimson tulip.

Guests included a number of young people, who were entertained by their families.

Miss Mary Helen Flinnell, who has returned to her home in Chico after a visit with the Misses Elizabeth and Jean Wheeler.

Miss Jean Wheeler, who has returned to her home in Chico after a visit with the Misses Elizabeth and Jean Wheeler.

Mr. and Mrs. Ernest Sutton, and their children, have gone to San Francisco, where they will be the house guests of the father and brother of Mrs. Sutton, Mr. and Mrs. G. Edgerton, for ten days. Mr. Edgerton is one of the railroad engineers.

Mr. and Mrs. P. B. Spears was another host and his wife entertained with an enjoyable dinner Thursday.

Their guests included their son and daughter, Mr. and Mrs. J. B. Woodson of Fresno, who are their house guests; and Mrs. William Garnett and Mrs. Garnett of Los Angeles.

Miss Rogers Strett of Hollywood and Mr. and Mrs. John Garnett of San Francisco, where they will be the house guests of the father and brother of Mrs. Sutton, Mr. and Mrs. G. Edgerton, for ten days. Mr. Edgerton is one of the railroad engineers.

Mr. and Mrs. P. B. Spears was another host and his wife entertained with an enjoyable dinner Thursday.

of the churches of Inglewood celebrated Christmas Eve by the singing of musical and literary exercises and by distributing from tree treats for all the chil-

lren.

Paul Kressel entertained a few friends in honor of her husband's birthday. The decorations were carried in the spirit of the Christmas tree, the delicious menu consisting of a Christmas dinner, the favors were dainty. New Year with home-made candies of the Merry-Go-Round were very pleasantly enjoyed during past week at the Mr. and Mrs. C. W. Clough street. In the game room the prizes were cap- tured by W. H. Hudson and A. F. Powers of Allen, Okla., arrived Tuesday and remained with their daughter, Mrs. Robert Powers, with whom he will spend the winter soon thereafter.

Mr. and Mrs. H. L. Sennius of Evans returned Saturday evening from his parents, Mr.

and Mrs. Charles Miller, Mr. and Mrs. Chancy Miller, Mrs. Petters, George Fetters, Mrs. Isabell Caldwell and Ralph Keyles.

German-American.

TELEPHONES BY WIRELESS
FOUR THOUSAND MILES.

BY CABLE AND A. P. TO THE TIMES.

BERLIN, Nov. 21.—The transmission of a wireless telephonic communication over a distance of nearly 4000 miles, from Neustadt-An-Rheinberg, Hanover, to New Jersey, was accomplished on October 27 by a German wireless company. A report of the fact was submitted to Admiral Emanuele to the German Shipbuilding Society.

Acrimony.

LOVE DRAMA
RAISES PROBLEM.PARIS IS INTERESTED IN A CASE
OF PSYCHOLOGY.

Young Gunsmith Accused of Murder Is Central Figure in Which Love, Revenge and Passion Play a Part Dividing the French Capital Into Two Hostile Camps.

Special Correspondent of The Times.

PARIS, Nov. 3.—In the "Affaire Warner" Paris has a morbid problem in criminal psychology after its own heart. It is founded on a drama of disappointed love, revenge and passion, and it has divided the ordinary Parisians into two bitterly hostile camps, who discuss at great length and with great acrimony the possible guilt or innocence of the accused.

The central character in the case is a young gunsmith, named Victor Warner, who on April 2 of this year, while he was transferring a number of revolvers from a case to the counter in his store, shot his wife dead. Everybody believed that it was an accident—that by some fatal mischance a revolver which had been tried by a prospective purchaser, had not been completely unloaded. He was so terribly broken down and his people so eminently restrained a big post and did not open a formal inquest nor make an autopsy on the body.

OTHER WOMAN APPEARS.

Six months later appeared on the scene the other woman, Mme. Sutory—the divorced wife of a Hindoo jeweler's agent. One night, just as she was about to go to the prefecture and asked to see a high official. She told a high official that Mr. Victor Warner had confessed to her that he had killed his wife on purpose—for love of another—she said—unconsciously. The high official asked her why the husband waited so long before she denounced M. Warner, and Mme. Sutory had to confess that it was only after her lover had left her without a cent that she had felt necessary to clear her name of the terrible secret.

All the same, the authorities arrested M. Warner on a charge of murder, which seems in the circumstances rather strong thing to do, especially as Mme. Sutory had already given the same charge against him in an obviously biased letter and retracted it fully before a commissary of police. This time she sticks firmly to her guns, and everybody in Paris is kept guessing as to what the truth really is. Mme. Sutory's position is everywhere wide by side with that of the woman who says she was murdered for "love of her."

WIFE MOST ATTRACTIVE.

As invariably in such cases, the wife is much more attractive than the other with her flat, oriental-looking face and her nose "pinned down" like a postcard, as an unattractive reporter said. The much-photographed lady has been almost interviewed; she has told the whole story of her life, and it does not make edifying reading. Told, to the last, can read, at the age of 45, she found herself two years with a wealthy and titled gentleman, who did not long survive her tempestuous love.

Then one day M. Sutory picked up her glove—an incident which he has often repeated to his friends—by his "bronzed countenance and flashing milk-white teeth," and married him only to run away a month or two afterwards, because she says she found marriage with him meant death. But M. Warner, who has also allowed himself to be interviewed at considerable length on his married life, has a different story to tell.

So far from being a slave, his wife says, she was a favorite of his mistresses. One of her favorite tricks to bring him to reason was to threaten suicide. At first it never failed, but finally one day M. Sutory, growing tired of "Wolf, wolf," said: "Well, go ahead, then." The lady sat down on her husband's bed, leaning-table, drained it, then fell writhing to the floor. Poor M. Sutory rushed for the nearest doctor, but when he returned he found his wife peacefully playing the piano. The liquid in the glass had been water.

There were, it appears, innumerable gloves in the open streets, and they generally ended with a compulsory visit to the police depot. "Once," says M. Sutory, "I went to the office of a jeweler, for a diamond ring. I was working, and struck him in the face. On another occasion she lay in wait for me, and scratched my face and broke my watch chain."

On the other hand, Marguerite made her way to have been an angel of light, a poor suffering woman pursued by malignant fate.

Largest Belt in the World.

[Engineering News:] The largest conveyor belt in the world, it is claimed, was built by the Pittsburgh Rubber Company, Ltd., of Sydenham, N. S. W., for a coal loading plant at Ft. Kembla. The belts are being made after specifications of the Public Works Department; each is approximately 150 feet long and will weigh twelve tons, being made up of seven-ply rubber and cotton in one continuous length, without joints. Thirty-six inches wide. When rolled each belt will be too large to pass through the railway lines on the way to the port. The conveyor will carry coal about 1600 feet at a rate of 1000 tons an hour.

Hamburger's
BROADWAY, EIGHTH AND HILL STS.

Model Spring Hats

—There's a lovely garden of them a-blooming in our French Room.

—An initial showing of this millinery from the best makers in the world—masterpieces from Baron of Paris and the foremost designers of New York and Chicago.

—Small close-fitting models of satins, moire and taffeta combined with narrow imported braids, some with a piquant flare suggesting the picturesque peasant headgear as their inspiration.

—For trimmings there are dashing stick-ups, a wreath of fruit—cherries, perhaps or rosy strawberries with their foliage—a galaxy of adorably Frenchy effects at prices from \$12.50 to \$35.00.

(Hamburger's Millinery Salon—Second Floor)

Linens \$1.00

Sheeting—Wear resisting linen sheeting that sells regularly for \$1.25 a yard. Fine, round thread quality, 90 inches wide, with soft finish.

Handkerchief Linen, 50c to \$1.00

—Snow white, 36 inches wide; a variety from which to choose.

(Hamburger's Linen Dept.—Main Floor)

Crinkle Crepes, 12½c

35c Scotch Flannels at 23c

—Just 1000 yards at this economy price—enough for one day's selling.

Snow white, soft finished and 36 inches wide. The popular material that requires no ironing. Better supply your spring sewing needs in this line tomorrow.

(Hamburger's Main Floor)

Hamburger's

BROADWAY, EIGHTH AND HILL STS.

A Corset Sale

—An economy occasion of first importance in the Pink Shop—savings extraordinary!

Odds and ends and lines we are discontinuing have been gathered into three assortments for a speedy clearaway. The very model to meet your individual requirements is probably included. Note these prices:

**\$1.00 Corsets—50c
\$2.00 Corsets—95c
\$4.00 Corsets—\$1.95**

—Some in the lot at 50c are worth even more than \$1.00. Such well-known makes as W. B. Warner and Royal Regent make up these groups. All sizes are represented but not, of course, all sizes in every style.

(Hamburger's Pink Shop—Second Floor)

**Fine Silk and Wool \$1.89
\$3.00 Union Suits**

We had the good fortune to secure another lot of these fine winter undergarments to sell at this feature price tomorrow.

The discriminating woman knows that a combination of wool for warmth and silk for comfort makes the ideal underwear cloth and will be quick to take advantage of this opportunity. Garments perfect in every way and in every wanted style.

(Hamburger's—Main Floor)

A Sale of Sweaters

—Two wonderful values for Monday's selling! See the windows today—then come early tomorrow morning! It is an economy that's most timely in these smart, comfortable garments—the result of a highly fortunate purchase.

5.00 Sweaters, \$3.75

—Like sketch at the left—all worsted, in cardinal, gray, maroon, brown, tan and green. Jaunty as can be, with the practical pockets and the strap effect that are a smart detail of the fastening. Snug, warm and yielding to every movement of the body, they are the ideal outer garments for the woman who indulges in outdoor sports. All sizes from 34 to 44 in the lot.

**Women's \$7.50
SWEATERS \$5**

—Like the righthand sketch. Sweaters of all-wool yarn, with the popular raglan shoulders—a feature of this season's modish sweaters. The collar is another notably smart style touch. In all the most wanted shades, and in all sizes from 34 to 44.

**—\$6.75
Angora Caps to Match, Very Chic
—\$1.00
Angora Scarfs to match**

(Hamburger's—Second Floor)

BOYS' SUITS \$6 to \$7.50 Values \$4.45

—Great inroads have been made on all our regular \$6.00 to \$7.50 lines as a result of unprecedented Christmas buying. To effect a final clearance we've assembled them all into one lot away under price.

—Shepherd plaid suits, with military or sailor collar, fancy Scotch tweeds and soft serges. All carefully designed by master makers of Juvenile clothes. Not all sizes in any one style, but all sizes from 2½ to 8 years in the lot.

(Hamburger's Boys' Dept.—Second Floor)

**25c Silk Mixtures
Colors, White Corded Stripes 15c**

—After-Christmas savings on short lines of these extremely dainty fabrics.

—Unusually attractive and firmly woven silk mixtures in rose, tan, jasper, lavender and blue grounds with white corded stripes. They lend themselves most effectively to prevailing frock and blouse modes.

50c Woven Voiles, 25c a Yard

—Shop early to share this feature saving for the quantity is limited.

—Sheer, perfectly woven and 40 inches wide—black, navy, brown and champagne. Get material for two pretty dresses tomorrow for the price you would ordinarily pay for one—but remember to come early for they will go rapidly at 25c a yard!

Crinkle Crepes, 12½c

35c Scotch Flannels at 23c

—The non-shrinkable wool flannels so desirable for the warm frock or blouse. Plain or fancy stripes on light or medium grounds.

A fortunate purchase that will create a lively interest; 25 inches wide.

(Hamburger's—Main Floor)

RANKS OF THE MILITANTS OVERRUN WITH SPIES.

[SPECIAL CORRESPONDENCE OF THE TIMES.]

LONDON, Dec. 12.—During Mrs. Pankhurst's spacious and spectacular turn through the United States, life has not gone smoothly or easily with the militant suffragettes whom she left behind in Great Britain.

A serious cleavage has arisen in her ranks owing to the differences between her daughters Sylvia and Christabel on matters of high policy in the conduct of the Women's Social and Political Union. It is, of course, being referred to with great decorum in official communications, but it is none the less clear that Miss Sylvia is firmly put outside the pale with many others who are not prepared to take orders hesitatingly from Paris.

The East London W.S.P.U., of which Sylvia is the heart and soul, is also banned, and is in the process of appealing to its friends for financial assistance to its most faithful male adherents. The W.S.P.U. has already shed the majority, and today's issue of the Suffragette is the result of a skillfully timed attack on most distinguished men of letters, hitherto to be counted among the friends and supporters of the militant organization.

The demand for extreme parties to divide and subdivide until the party is overmastering, is exemplified in history, and has frequently ended by the disbanding of family circles. The head was somewhat of a peasant, the wife was a woman of property, and the son was a soldier. The difference of policy are a good enough explanation.

—It's dull work selling papers. Some members of the union are now asking how long Mrs. Pankhurst and Miss Christabel will continue to see eye to eye.

Universal

TELL FORTUNES ALL OVER CHINA.

GREATEST PLACE IN THE WORLD FOR SUPERSTITION.

Inhabitants of the New Republic Seek the Soothsayers in All the Affairs of Their Lives—They Are of Various Grades, Cheap and Dear.

[Social Correspondence of the Times.]

SHANGHAI, Dec. 1.—There is no place in the wide world where fortune tellings flourish just now as extensively as it does in China. Perhaps she comes in the twilight hour from her work to a dreary and comfortless lodging, and she thinks bitterly of those who have friends and money to spend and a share in all the fun that goes on, while she sits in her bare room, with no one to talk to and only her own unprofitable thoughts for company.

She wonders if it is worth while to keep to herself rather than to form associates and amusements of inferior standards and ideals. It would be so easy to abandon all scruples that stand in the way and go for a good time.

Other girls are doing. She can be seen on the streets and it seems as though her heart were shackled in a joyless, sunless prison.

It is just here that she needs to learn patience, and to know what is gained by waiting. If she will but work and wait, and not lose faith, the friends of the devils incarnate who dog the footsteps of poor, frail, human nature each day and every day. Therefore, we find protecting gods dedicated to every phase of the national life in China.

—Happily, on the other hand, the Chinese is allayed by the fact that the fortune teller is always close at hand, and for a few cash will string up the most interesting absurd story it is possible to get out of the poetical language of the man in trouble.

A crowd gathers at once, jealous of the nearest fortune teller, and his result is based very generally upon the fee paid. He is asked to choose a written character from a large number and, on the basis of the face, the fortune teller discerns the character and dispels any fears his client might have regarding his immediate future.

A crowd gathers at once, jealous of the man who has paid his money, a rank jester, piker and the fortune teller drives at once a thriving trade, a couple of cents apiece.

But there are occasions upon which the fortune teller actually possesses some rudimentary knowledge of things. This is the man who charges high prices and who more or less scientifically divides the prophecy of his client's fortune under ordered heads. No chance is taken. With acuity, the gentleman will tell him he will tell you all once when you will be married, the number of children who will rise up in due course to worship at your family table, whether you will be rich or poor, and give you a second chance, and much more extremely useful information regarding life in general.

This man, immediately you go to him, looks you up and down, and is not unapt to make a good appearance that he will be a good base for his pronouncements. For instance, if you are a man with a crooked nose, he will tell you probably that it is decidedly bad thing that you had not a straight one, and his general remark, however laconic they may be, will be drawn from the crooked nose of yours.

This sort of thing could be multiplied. And the remarkable thing of the whole science of fortune telling in China is that the people professedly making such strides in other things should be so gullible in a matter so directly affecting their everyday life.

Implicit faith is placed in the man's word, and when he will choose a dignified member of the profession and repeat the performance. All through the ordinary Chinese, though evidently noted in many things, for some reason or other, the confidence placed upon the casual fortune teller, and one cannot imagine a China freed entirely from this class who would such a baneful influence.

Tiring of Stage Indian.

(Continued from First Page.)

tation that I began my globe trotting as a professional Indian.

The call of the lecture platform and the pen drew me from the stage, and I am a full-fledged author, which was confiscated in New York harbor because I refused to pay \$20 customs duty. I wonder who got the set eventually. Then the cowboy-Indian came along, and has shattered all hopes for the present of any Indian butting in successfully. Not long ago I was Indian chief in the "Queen of the Redskins" short part. Then I turned a short called "Old West." The "Flowers"—playing a double-quick change from a rollicking, irresponsible com brat to a serious Indian chief. One night the villain knocked the cowboy off his horse, and in the trade relations of the various parts of the empire, has convinced both the Colonial Office and the British Cotton Growing Association that there are prospects of cotton being grown in Northern Australia at a profit.

The commission made extensive inquiries with regard to the possibilities of Australia as a cotton-producing country, and in its report says the offer that a tribe of North American Indians would appear in the play, and that a large deposit was made with the United States government to enable them to come over. The tribe of Indians that came as independent Mohawk from Canada.

A troupe of Nigerian warriors once played in Earl's Court. They didn't use any makeup, but just their natural skins. Not long after that met one of these negroes out of work who told me the others were on tour with a western drama, playing Indians. To prove it, he showed me an advertisement in large type—*Superbly dressed North American Indians from Pine Ridge Reservation, U.S.A.*

The real Indians give England the go-by now and go direct to other European countries. A large brass band composed of Indians under the direction of Hill, an Indian, toured Europe recently giving concerts wherever they went, and came out satisfactorily—both artistically and financially.

THE OLYMPIC GAMES.

In spite of the lack of interest in the Duke of Westminster's Olympic games fund, the liveliest interest is being shown here in the International Congress which will be held in Paris next June to promulgate a code of uniform regulations for the games.

It is understood that the English delegation will make several important proposals to the congress, among them the suggestion that women be included among the competitors. Other matters to be brought before the congress will be the question of the restriction of entries; a minimum price of 12 cents per entry; Liverpool for cotton of a specified description to be taken to them, and have undertaken to superintend its sale.

MR. MARTIN'S IDEA.

England lets a "Mystery Ship" Slip Into the Sea and the Japs Also Baptize a New Cruiser.

(BY CARL A. F. TO THE TIMES.)

GLASGOW (Scotland) Dec. 15.—The British battle cruiser Tiger, the "mystery ship," was launched today at the Clyde Bank Shipbuilding works, where her keel plate was laid on June 26, 1912.

Details of the new vessel have been strictly guarded by the admiralty. Her engines are designed to give the hitherto unattempted horse power of 100,000 calculated to develop a speed which will eclipse that of any naval vessel afloat.

Official reports give the Tiger's dimensions as: Length over all, 700 feet; beam, 92 feet; displacement, 30,000 tons. Her armament is said to comprise eight 12.5-inch guns in pairs in turrets on the center line and twelve six-inch guns in casements, with two twenty-one-inch submerged torpedo tubes.

JAP CRUISER LAUNCHED.

Japan Launched a New Cruiser.

(SPECIAL CORRESPONDENCE OF THE TIMES.)

LONDON, Dec. 6.—Society's leaders own with regret that many women in the smart set have taken late to the immoderate use of strong language.

For instance, a well-known philanthropist sometimes livens up private meetings with big, big, loud and vulgar outbursts of vituperative rhetoric. An earl's daughter in the shires habitually swears at her servants. Some time ago a storekeeper refused to supply her with costumes because he did not think her language was fit for the young ladies of his fitting-room.

The Haruna is 704 feet long, 92 feet in breadth and has a draught of 27 feet 5 inches. Her displacement is 27,000 tons and she has a full rate of 1000 tons and an oil fuel capacity of 1000 tons. Her shaft horse power is 70,000.

The armament of the Haruna will consist of eight fourteen-inch guns mounted in four turrets on both sides are mounted batteries of six-inch guns.

VIRGIL INSPIRES ARCHITECT.

New Garden Plan for the Palatine in Rome Attributed to Suggestion by Poet.

(SPECIAL CORRESPONDENCE OF THE TIMES.)

ROME, Dec. 12.—In the course of his new efforts at restoration, Commissioner Boni has achieved some marvelous results on the Palatine Hill.

Otherwise, it was not possible to raise the crushed arch, piece together the strown columns, and restore to their pristine splendor the temples, baths and halls, so the wise archaeologist has appealed to nature for the restoration of the new earth and dirt of his own making and in restoring the beauty that research has temporarily banished.

Byron put on record his impressions of the Palatine thus:

"Cypress, ivy, weed and wallflower grow'd matted and mazed together, hillocks heaped.

On what were chambers arch crushed, columns strown in fragments check'd-up vaults, and from strown arches.

In subterranean damps, where the owl peep'd Deeming it midnight—Temples, baths, or halls?"

Promised he was, for all that Learning reaped From her research hath been, that these walls—

Behold the Imperial Mount! 'tis thus the mighty gods have done.

Indeed, the Augustan times probably there was on this spot a hanging garden, covering a fairly wide space in front of the imperial palaces and looking over the Vicus Tuscus and the Clivus of Victory. And it is to the credit of the great Roman Commissioner Boni has, in the reversed name of Virgil, striven to fill the garden with only plants such as the Augustan poet might have known, some as mentioned in 1900. The garden has been cleared of the alicantus and hurtful robinia which had invaded its pincers, and shrubs and trees of more honorable lineage have been planted thereon. Oaks, cedars, beeches, chestnut, 200 species and cypresses, thousand laurels and myrtles and as many as maples, whitethorns, lilles, quinces, pomegranates and laburnums, 2000 box trees and a great quantity of trachelium, thyme, lavender, and aromatic plants of every variety, geraniums, rosemary, mint and hyssop.

Thousands of bulbs also have been strewn where once only nettles and deadly nightshade could be found, and hyacinths, narcissi, crocuses, anemones spread a gay carpet below sheltering pines and feathering tamarisks.

King's English.

(Continued from First Page.)

widespread response and backing from the most various and unacquainted quarters would accomplish all who had best followed closer the solidifying of opinion on the subject during recent years. The Alliance points out further that Lloyd George has said that no reform, political or social, will avail in this country unless it is made by the people.

An act similar to the one demanded by the Alliance for England and Wales was passed for Scotland at the last session of Parliament.

—AUSTRALIAN COTTON.

The Dominion Royal Commission, which has been visiting the various dominions and has held meetings in the course of its tour, has made the trade relations of the various parts of the empire, has convinced both the Colonial Office and the British Cotton Growing Association that there are prospects of cotton being grown in Northern Australia at a profit.

The commission made extensive inquiries with regard to the possibilities of Australia as a cotton-producing country, and in its report says the offer that a tribe of North American Indians would appear in the play, and that a large deposit was made with the United States government to enable them to come over.

The iron of this tribe is to be an independent Mohawk from Canada.

A troupe of Nigerian warriors once played in Earl's Court.

They didn't use any makeup, but just their natural skins. Not long after that met one of these negroes out of work who told me the others were on tour with a western drama, playing Indians. New Spirit at Work as to the United States.

LONDON, Nov. 1.—The English people just now are tremendous busy in discovering the real character of American colleagues, and were warned officially that in diplomacy the United Ambassadors lived in fear of their own period.

Some of those Tiffany glass shades are adorable, and the effect of a beautiful cathedral light in the rooms is thought inspiring. But these lights are so dim, so shadowed, so shaded that it is well-nigh impossible to recognize friends.

"Americans live in the dark: English people live in light. We live in cold, dark, extreme of either are disagreeable, and in every case and in each land it seems difficult to strike a happy medium.

Companions to The Times;

Dec. 12.—Leo Clarette has

lived in Germany, where Victor Hugo, several manuscript speeches made by the great

writer at the dinners for poor

men, which he used to give every

year about Christmas time.

For nearly a decade he has

lived in Paris, and on it was

built. Here are the notes Hugo

left in one of his addresses.

dear little children: Among

you to be given you, you will

either gunpowder or

orardens weapon, or anything

which might give you the idea

of destruction. War is an

awful thing; men of all coun-

tries made for love, for killing

and another. Among the toys

offered the little girls will

be excellent playthings which

commence to fit them for

motherhood which will

last in their lives. For the

boys are the little boys, little

boys, in fact, everything which

present the idea of work and

and not that of destruc-

tion in their intelligences."

PT FRIEND OF THE POOR.

days ago there died in an ob-

corner of Montmartre a curious

man. A little band of paint-

ers followed the body to the

cemetary and then, the

man having been also a painter,

was made to his final

rest.

Enquiries showed that the

man's name was Ferdinand Pele,

membrance dawnd.

At the age of Pele, one of the

brilliant artists of the day,

at the time of Honoré, the

one of the most exclusive

clubs, had disappeared sud-

denly one knew why. But now

the mystery was explained. Haunted

by misery he saw everywhere

him in his studio, and

and to devote himself to

the poor and friendless.

the day he made his decision, he

ever been seen by the com-

pany of his friends.

"To Live Long and Prosper" — How and Where
 IS THE KEYNOTE OF THE
MIDWINTER NUMBER OF THE TIMES
 TO BE ISSUED JANUARY 1ST

It will be a most appealing "Back to the Land" number. Will give the exact facts as to the wonderful advance in land values in Southern California in the past five years and the unusual profits made by farmers, with figures and specific instances.

**GOOD HEALTH
GOOD CHEER
GOOD CLIMATE**

**GOOD MONEY
GOOD HOMES
GOOD LUCK**

There will be five lovely Magazine parts with superb illustrations, in beautiful colors. And, speaking of beauty, the frontispiece will be a notable portrait in colors of Los Angeles' most beautiful Native Daughter.

The New Year's number of The Times always is the looking glass of Southern California. The forthcoming issue will prove the most glorious and satisfying mirror of the bounteous charms of the land that is kissed by the breath of heaven and colored by its skies.

Boosting, to be effective, should be backed up by facts. The Midwinter Times will be full of facts with which the native born and the adopted son, and the always enchanting native born and adopted daughters, can prime themselves against the time they meet the unbeliever, the man from Missouri. That State was the original home place of Doubting Thomas, but no man will be able to doubt of the attractiveness and marvelous resources of Southern California after digesting the Midwinter Times.

From time to time some inkling has been given of that which will be graphically described and realistically pictured in The Times on New Year's Day. It has been said that California is the greatest agricultural and horticultural producing State in the Union. For this it must particularly thank the southern part of the State whose resources in this direction will be faithfully described in the Midwinter Number. What Southern California can do in the way of food production will be amply set forth.

As a citrus-growing country Southern California leads the world. Naturally, therefore, this great industry will be well exploited. Many far-seeing men are studying date culture and the assertion has been made that this will add a \$60,000,000 industry to the wealth of Southern California. There will be articles for those whose inclinations turn to more firmly established agricultural

tural pursuits such as walnut growing, alfalfa farming, the raising of plums, apricots, apples, avocados and more humble but necessary products, such as sugar beets, lima beans, potatoes and cabbages, which are mentioned in the same breath with kings.

The marvel of modern times has been the emancipation of woman. In no part of the world has woman been yielded her place more gallantly and gracefully than in California. The Midwinter Times will pay its homage to the fair sex and will tell what she has done both in the clubs and in the kitchen.

Where else in the wide world can health be gained and regained more than in Southern California? An entire section of the great Midwinter edition will be devoted to health-getting in a land renowned for the salubrity of its climate and the strengthening influence of the lovely surroundings. Many a man now hale and hearty came to Southern California years ago to die. Friends back East looked upon each as having one foot in the grave. Here they pulled that foot out and now have both legs firmly planted on Southern California soil. Thousands of others will follow their example. They will here "behold the rainbow of the future years."

Everything that any person may reasonably want to know about Southern California will be found in the Midwinter Times and it can confidently be recommended both to those at home and in the East and North as the most truthful and convincing literature regarding the land upon which "the god of gladness sheds his smile."

Send in your orders for prompt mailing. The Times will forward copies to your friends in attractive wrappers. Price 10 cents a copy; by mail, 15 cents, including postage. Please send in your lists early.

THE TIMES-MIRROR COMPANY
 H. G. OTIS, GENERAL MANAGER AND EDITOR

FOR WOMEN AND MEN.
Facts, Features and Fancies.
 BY OLIVE GRAY.

DAILY BEAUTY HINT: Cleanliness of body, poise of spirit and steadfast cheerfulness create an atmosphere which is bound to win the long run. Whatever one's features, it is the character which finally determines whether or not we are beautiful in the eyes of those who know us best and is it not for these that we wish to be beautiful?

The Strollers, on their pre-holiday quest for novelties and holy moly, discovered Glen the objective point.

They were not the only ones bent upon the same errand. Far from it. The highway was lined with "hikers." The boy of the party, who owned two dogs and found them covered with the scars from the holes they proudly invited them to help themselves; but when it came to the berries, the only ones they saw were so high up in the trees that they could not reach them and two men who had managed to get them down by ropes in an attempt to obtain the waxen parasite warned them that they might, if they remained long enough, witness a hanging.

Without further introduction, Indians was a visit to the lovely country place which is the property of a mighty hunter whose kennels are famous. The kennels, with the intelligent faces of their occupants, formed a pretty picture, and when the master of the house led the young people to the home of the latest family, where a proud mother hound gazed up apprehensively with her great brown eyes, fearing lest harm come to her babies, who had not as yet heard of the world outside, the young ones quickly became their home, the delight of the young hikers was boundless.

"When will their eyes be open?" wondredly asked the Questioner. "Their eyes will open just about the time the hikers will be back home again," reported the master of the house, who was a mighty hunter and a southern gentleman, was naturally inclined to link together events of great import.

Now for "Eve": Now for the bargains in needle books and mused handkerchiefs!

A Simple Gift.

Very acceptable was one of gifts made by the Knitting Lady for her friends. A flat "fill" for the neck of the frock or the coat made in shell crocheting, which would be easily and quickly made by the girls who possess perfection in curling and dimples, but was to the red or too, too thin ones!

The Spider's Web is a curious mixture of braided and solid. It is a series of protest against existing conditions and especially political conditions. But the clarion call that is to arouse citizens to wild and not for noble deeds becomes the seduced ranks of a freak. The desire to have men too big for a man's shoulders, and a stout man on a banana peel, such as is given by the plaster patch, is most becoming. Bizarre and striking effects which detract from the youthfulness of face or which lend a sinister expression should be rigidly avoided.

For a time it seemed quite the fashion to pick flaws in the leading gentry of the country, to break pieces of their feet of clay and examine the same microscopically. It was a touch of realism the writers said. In fact it was only a new device to enliven the old pastime, which, many publishers, honest heroes, really have been led in a little galaxy of their own.

Now for "Eve": Now for the bargains in needle books and mused handkerchiefs!

Now for "Eve": Now for the bargains in needle books and mused handkerchiefs!

Swap Day.

A lot of the girls who received more than the usual quota of Christmas gifts were talking things over and decided that they would set a day when they could swap among themselves the articles which they did not exactly care for, for the ones they wanted. "Cold-blooded," do you say?

It doesn't seem that way to me. Those who presented the girls with the articles which they did not exactly care for, for the ones they wanted. "Cold-blooded," do you say?

Truthful Advertising—Always!

We believe in TRUTHFUL ADVERTISING. When you come to Brent's expecting to get certain articles at certain prices, YOU GET THEM. We have held from the start that a Merchant's advertisement is practically a contract to deliver to you certain goods at stipulated prices. We make our end of this contract good every time.

No Premiums with Specials

Because of the extraordianrly low prices on various articles offered as "hour" and "quantity" Specials, no Premiums are given with these goods.

BRENT'S

No Credit on Specials

All "hour" and "quantity" Specials are sold for cash only. The Reductions are too sharp to permit granting our usual credit.

Remember, Your Credit is Good

BRENT'S is known as the Great Credit House of Los Angeles. \$10 spent here insures you the possession of \$100 worth of furniture—enough to furnish a home. You can see from this how liberal our credit policy is.

With Christmas over, you naturally look for bargains—and you will FIND them, if you go to Brent's. We are going to wind up the year with a tremendous volume of business on Monday, Tuesday and Wednesday. Go through the bargains below and you will understand why Hundreds of thrifty Home Furnishers will come to Brent's tomorrow.

Aside from the fact that all Housefurnishings are priced lower at Brent's than anywhere else in town, our patrons have the enormous additional advantage of FREE DISHES or PREMIUMS with their purchases. Even with a purchase as low as \$5.00 you get your choice from dozens of HOUSEHOLD ARTICLES. Get acquainted with Brent's tomorrow.

Age Will Be Served.

FEW YOUNGSTERS MAKE GOOD IN COAST LEAGUE.

Most of the Young Talent Was Developed in the California State League—Davis and Goodwin Won Their Spurs—Sepulveda and Lynn Stuck It Out from Start to Finish—McKenry a "Find."

BY HARRY A. WILLIAMS.

THE development of young talent in the Coast League is almost an extinct industry.

The explanation is easy. The league has waxed so fast that the managers are forced to import experienced talent. Hardly any club, with the present player limit in force, can afford to carry more than one athlete in the growing state. The safecatcher who can break into a Coast League line-up nowadays must need be a humdinger.

As a rule the raw and unfinished products sent to the California State League seem to come in a circuit of like classification, there to grow and expand into the final article.

SOME WHO MADE GOOD.

Claire Goodwin of the Angels and Bobby Davis of Portland won their Coast League spurs. These were in the game long enough to establish their worth as class AA pastimers. Two other good men were also partially developed in the state schools of San Francisco and Catcher Lynn of Sacramento. Both of these looked so good that they are to be given further consideration, and experienced baseball men predict that Sepulveda and Lynn, developed into the best backstops in the league.

CALIFORNIA LEAGUERS.

There were a batch of good youngsters there at the finish, Wilholt, McKenry, Butler, Bockel, Sawyer and Meusel, but these were the product of the California League and recalled that they might display their worth in the minor leagues next season. The California League, in fact, is responsible for most of the youngsters developed on the Coast last season.

TWO FOR TIGERS.

Of those mentioned, Wilholt and Bockel have been retained for a further tryout by the Tigers, while McKenry is set as a regular place on the Angel pitching staff next season. Maier and Hogan found that

LIST OF PLAYERS
MCREDIE WILL TRY.

BY DIRECT WIRE TO THE TIMES
PORTLAND (Or.) Dec. 27.—[Exclusive, Dispatch.] Twenty-three players adorn the 1914 training-camp list of the Portland Pacific Coast League champion made public today by Walter McCrede, manager. Here is the list:

Catchers, Fisher and Berry, Hauorth from Pendleton; Pitchers, Hagerman, Higginbotham, Krapp, West and Krause, Pape from Buffalo, Peet purchased from Pendleton of the West; Batters, Kaylor, Koenig from Cedar Rapids of the Central Association; Framback, Idaho semi-pro, and Salveson, a California youngster. Fielders, Derrick, Koenig, Davis, Rodriguez and Lopez, Bantoff, Portland Northwester, Los Angeles Outfielders, Speer, Doane and Chadbourn; Milligan, Cedar Rapids.

DAD MOULTON MAY TRAIN BEAVERS.

BY DIRECT WIRE TO THE TIMES
PORTLAND (Or.) Dec. 27.—[Exclusive, Dispatch.] Dad Moulton, since Mike Murphy's death dean of the American track and field scene, who recently resigned after a long and successful tenure at Stanford University, has asked Manager Walter McCrede of the Portland Coast League baseball club for the position of trainer of the Beavers next year in a letter received today.

Manager Mac stated that he thought Moulton would be just the man for the Beavers, both on account of his age and experience in handling athletes, but he said that he was not quite ready to conclude negotiations with any of the numerous applicants for the position.

GUNS FOR PANAMA.

Will Throw a Shell Weighing a Ton from Eleven to Twenty Miles, According to Elevation.

[Popular Mechanics:] The first sixteen-inch gun for coast defense at Panama was tested at the Sandy Hook proving ground late in August. The gun alone weighs 127 tons and is 49.25 feet long. Its powder chamber is nineteen inches in diameter and eight feet long. The projectile travels through 28.22 feet of the sixteen-inch bore, which is rifled with nearly six-hundred grooves having a twist increasing from one turn in 66.5 feet at the breech to one turn in 22.3 feet at the muzzle.

The armor-piercing shell used in the gun weighs 2,400 pounds is 64 inches long and contains high explosive bursting charge of 140 pounds. A charge of 450 pounds of smokeless powder, including 16.5 pounds of black powder igniter, gives muzzle velocity of 2,250 feet per second, with a pressure of 20,000 pounds per square inch in the powder chamber, and 14,221 feet tons of striking energy.

The shell will penetrate twenty-one inches of hard-faced steel armor at a range of 11,000 yards. Fired with an elevation of 42 deg., a range of 20.2 miles.

What Father Was Sporty.

[Cleveland Plain Dealer:] The young fellow failed to protest to his father, "He had a good arm, but he didn't think that a chap's dad ought to go in for that sort of thing. And what he had heard was worrying the subbies."

"My father," he began, "I—er—I wanted to ask you something."

"Sure, old fellow. Sit down and have a cigar. Now, fire ahead."

"Well, I hear that you have put yourself for a commission in the Afraid-to-Go-Home Club."

"That's right. It's a fine club, everybody tells me. Comfortable, congenial, and all that."

"Um—but didn't you know that it was the sportiest club in town?"

"Well, then—excuse me, dad, but what do you want to join for?"

"I'll tell you. I want to be a member so that I can tell you when you apply for a loan on the list ahead."

"What do you get me? Have an other cigar—good-bye!"

\$3000.

Waves Rampant.

VENICE WILL ASK FOR AID IN PROTECTING CITY.

VENICE, Dec. 28.—Though the tide was the highest of the year, no additional damage was done by the high seas to the Venice ocean front, except that a portion of the bulkhead near Leona street, already cracked and weakened by yesterday's onslaught, crumbled and fell into the breakers. The three houses which were partially undermined yesterday were moved back to Speedway and thus saved. The ground swell has greatly diminished, and the tides will continue to recede from now on.

Venice will call upon the State and county authorities for help in curbing the encroachments of the sea. The City Trustees, in special session today, voted to call upon the United States Engineers to make a survey of the entire front.

The State Engineer will also be called upon for suggestions, and Los Angeles county may be appealed to.

Three times the people of South Venice have attempted to stem the high tides and failed.

The consensus of opinion is that a sea wall similar to that at Redondo be built. This sea wall, it was argued, could be faced with concrete and would be a permanent structure.

At the present time, the City Council Monday evening ways and means for temporary relief will be devised by the city

authorities. It is probable that further work will be done by a municipal bond issue, and not by an assessment plan, as before.

Had Venice staged an elaborate firework display at a more convenient time of day, there would not have gathered a greater crowd than this morning to witness the fury of the waves, driven by the tides. Dashboard was dashed thirty feet or more into the air. The police had difficulty in keeping the crowds back from the unsafe portions of the bulkhead. Many persons were wet by spray and, although not seriously injured, were taken to the hospital.

At the foot of Leona avenue a donkey engine and a pile driver worked in erecting a temporary sea wall which will be continued to Evangeline avenue.

At other portions of the beach the waves did practically no damage. High waves washed over the Ocean Front wall at Ocean Park, but the residents were prepared. Inexpensive bags with bags of sand. The road to the Malibu was thrown open to the public.

Transplanted.

HARKING BACK TO OLD IOWA.

CORNHUSKERS CELEBRATE THE STATES BIRTHDAY.

Hegia to Southern California Brings Many to Banquet Board at the Hollenbeck—Ten Per Cent. from the Old Sol Made to God's Country—Loyal to Both.

The birth of Iowa as a State, sixty-seven years ago, was recalled by the Iowa Association of Southern California at a dinner at the Hollenbeck last night, attended by more than 100 local members.

Iowa was admitted into the "Sisterhood of States" on December 28, 1846, and became a great State, peopled by thrifty communities of agriculturists and manufacturers, but when the nation began to Southern California, the workings of which seem no less incomprehensible to Americans. Bevridge, Putman of San Francisco has had a customs law the like of which never before been passed with the French customs officials over a pair of cuff buttons eight years old and valued at \$10, in the course of which the buttons narrowly escaped destruction at the Paris Mint. The buttons were sent to Paris by a jeweler to have it mended. He came to Paris before the button was ready and asked a friend to forward it by mail. The button went to Paris by mail and arrived for \$10. The Paris post office opened the package, saw the gold links, and sent them to the customs, which rejected Putman as call at the customs house. The customs first required Putman to fill out and swear to a formidable set of papers in duplicate giving his name, age and address, whether he was married or unmarried, his wife's name and age and address, the name of his father and mother, his own name, his permanent residence, occupation, in which he was scheduled, Judge Wilson was called upon and responded with some stories and Judge Fred Taft followed suit.

The toastmaster last evening was J. A. Rominger of Long Beach, president of the Iowa Association, who "greeted corn-fed and now turkey-fed Iowans with a cordial welcome." He announced that he had been presented with a solid mahogany gavel with which to preside and he held aloft an enormous ear of corn, "grown in Iowa, sixty bushels to the ton."

The programme consisted of songs, stories, poetry, greetings and serious addresses. "Dear Old Iowa" and "I Love You, California" divided the honor equally. In the absence of A. Ray Horton, who was unable to be present, the gavel was handed to him, as was the case with the members of the families, including the street department.

It is proposed to put the "unemployed" at work on the paved streets,

cleaning culverts and other activity of a like nature, and it is also proposed that the work will be adequately superintended to see that those engaged in the street activities earn their bread.

"Meals will be furnished to the 'army' the cost of which will be deducted from the payments made. One day's work will be paid for at market rates and the workers will be required to move on without delay."

PROSPERITY GENERAL.

Officers of the Associated Charities report that although constant work was done by investigating committees during the weeks preceding Christmas was done during the month of January.

All the families, which are described as "emergency" and which required immediate aid or in which the members of the families were in desperate circumstances, were helped.

All the families, which included sixty-two individuals, were given a substantial Christmas dinner, according to the detailed report filed today.

Meals as a regular item of groceries and suitable collections of toys and other gifts for the younger members of the families.

Financially the charities report that there is a balance of \$122 for further organized work when necessary.

TO SHOW THEM THE TOWN.

Redlands Business Men Will Entertain Visitors with a Ride Around Their Matchless City.

REDLANDS, Dec. 27.—For the benefit of out-of-town visitors a grand sight-seeing tour is to be given by Redlands business men on New Year's Day. This was decided upon at a meeting of the Merchants' Association last night. All persons in the city with an automobile at their disposal have been asked to assist in giving the ride to the city's visitors. The start will be made from the Casa Loma Hotel at 10 o'clock in the morning. It is expected that 300 automobiles will participate. Visitors wishing to take the ride are to register at the Chamber of Commerce.

The ride will cover twenty-seven miles. The procession will go through Prospect Park and over Smiley Heights, down to Loma Linda and then Bernardino and back by way of the close of the meeting.

"TRANSLATING A STATE" was the toast responded to by Robert B. Armstrong, who said that about one-half of the 1,000 visitors to the city had been told that the buttons must go to the mint to be valued and that he was to go to the mint the next day at 2 o'clock to learn the result.

In the course of the day the officials weighed the buttons, while the button was weighed while they watched; then he weighed while they watched; then the officials said the buttons were worth only \$10 and as the insurance papers gave their value as \$10, while their real value was \$10, the buttons would have been destroyed.

Putnam expostulated, but the officials were inexorable and told Putnam to return next morning to get the buttons.

The next day at 10 o'clock Putnam was on hand. He found that the buttons had not yet been destroyed and told a long, sad story. He said that the buttons were the gift eight years ago of a friend now dead and that he had only as much time as possible to sell or attempt to sell them in France and made oath to that effect. He paid a round of visits and told a story which he had been told to return to the mint to learn the final decision.

At 2 o'clock Putnam was back at the mint. He found a committee sitting on his case. An hour and a half later the committee permitted him to take the buttons, but charged 25 cents due.

Make Use of Coal Gas.

[Buffalo News:] Prof. Armstrong proposed at the recent meeting of the Associated Charities to use of raw coal for heating purposes to be used.

His object was to prevent the waste of valuable by-products of combustion and also to compel more efficient methods of heating.

Many engineers are of the opinion that the use of coal gas is the best way to heat.

Mr. Burtzell would have it treated at the pit's mouth, the gas distilled into the various oils, and the gas, unpurified, sent up to the top of the stack.

He would then collect the gas and use it for heating purposes.

He would also collect the gas and use it for heating purposes.

Mme. Maria Montessori and Col. S. S. McClure.

DOTTORESSA MARIA MONTESSORI.

She is calm in manner, genial in social intercourse and modest and reserved except when she enthusiastically describes her mission.

WASHINGTON. Dec. 28—One characteristic of the illustrious Italian educator, Maria Montessori, is that she insists on being called Dottoressa rather than doctor, and when her American hosts presented her as "Doctor," she firmly corrected it to "Dottore." Apart from her achievements along many lines of usefulness, this distinction of doctor and dottore is of paramount interest now when women are clamoring to break down all barriers and definitely repudiate any such separations of the sex in intellectual prowess. It would be a brave man, indeed, who would address an American or British doctor as the coveted M. D. or Ph. D. as "Dottore." Everybody who has any experience will testify to the aids in education of writers of the among the sex against being called authoresses or "esses" of any variety. The word, "female" is anathema and the war cry of the modern is that sex and individual freedom are color nor sex. Dottore Montessori is different. She dislikes being called doctor because it suggests she is of masculine traits and the number of her students is within the bounds of her sex. Dottore Montessori is different. She is calm in manner, genial in social intercourse and modest and reserved except when she enthusiastically describes her mission.

WASHINGTON. Dec. 28—One characteristic of the illustrious Italian educator, Maria Montessori, is that she insists on being called Dottoressa rather than doctor, and when her American hosts presented her as "Doctor," she firmly corrected it to "Dottore." Apart from her achievements along many lines of usefulness, this distinction of doctor and dottore is of paramount interest now when women are clamoring to break down all barriers and definitely repudiate any such separations of the sex in intellectual prowess. It would be a brave man, indeed, who would address an American or British doctor as the coveted M. D. or Ph. D. as "Dottore." Everybody who has any experience will testify to the aids in education of writers of the among the sex against being called authoresses or "esses" of any variety. The word, "female" is anathema and the war cry of the modern is that sex and individual freedom are color nor sex. Dottore Montessori is different. She dislikes being called doctor because it suggests she is of masculine traits and the number of her students is within the bounds of her sex. Dottore Montessori is different. She is calm in manner, genial in social intercourse and modest and reserved except when she enthusiastically describes her mission.

Washington socially and through civic bodies had the pleasure of meeting the dottore and though she cannot yet convey her meaning except through an interpreter, her eyes and gestures are expressive and wholly satisfying. She impresses this fact most powerfully than she does that of possessing unusually large pieces of gray matter. She is earnest and sincere and filled with the noblest patriotic spirit. She is in being a woman and in having achieved something of value for the mothers of the race.

Washington socially and through civic bodies had the pleasure of meeting the dottore and though she cannot yet convey her meaning except through an interpreter, her eyes and gestures are expressive and wholly satisfying. She impresses this fact most powerfully than she does that of possessing unusually large pieces of gray matter. She is earnest and sincere and filled with the noblest patriotic spirit. She is in being a woman and in having achieved something of value for the mothers of the race.

After all, America was more interested in what this distinguished educator thought of the woman question, for her visit to Washington first met with the leaders of the cause were foregathered and were clamoring at the gates of the Capitol and of the "White House."

"Women in suffrage surely," said the dottore, smiling wryly, "but not in militant methods. I am engaged in a system which broadens the individual and accentuates all individuality. Coming from the central nervous system, that part it should be approached cautiously. Progress is making every field of activity and to broaden the field for the child and the education of any kind of child.

The dottore has been accused of attempting to disrupt existing conditions. The college question is one which she studies skillfully, for in this country there are no accredited, militant colleges open for higher privileges, where as in Italy's superiors schools are being closed yearly.

"What is education and why are children made as though which are not in the vital issues with the dottore.

"I do not think children are ever bad, in the true sense, just active or mischievous or if cross, merely sick."

She lectured on auto, self-education, and began with an infant of seven days. The child, properly trained never cries in its cradle, in fact only the very young infant, whose nerves will not permit an infant to wait, after the old fashion of strengthening its lungs. To learn how to accomplish even this much is surely a beneficial thing for a child and for the parents of the parents. It is a little edge available in the humbled homes and in Italy these courses in child hygiene are attainable everywhere.

The education of the child begins at seven days continues broadly and after a well-organized plan and the child learns how to adjust his senses to the external world; in a word be-

here than in any other country outside of Italy. There are more than 100 schools in this country teaching my method. Of the eighty odd pupils in our country last winter in Rome to learn the system directly from me sixty were Americans. One State, Rhode Island, has officially introduced the method into the public schools, and I hope that more will follow. It is not a commercial venture, as none of the broad movements for humanity have ever been, and its beauty is that it calls for no great array of printed matter nor complicated apparatus. Personality counts for much in the teachers, and my aim is to develop that to the highest point. It is a method which may be expanded under any religious belief. In Rome many convents have taken up my work and give me encouraging reports. Protestant missionaries have taken up the cause in China and two schools have been established. My chief work is being translated into Japanese and plans are under way to open schools in autumn. I hope before long to visit these far-off foundations, just as I am now in this country."

Dottoressa Montessori received a cordial welcome to Washington and was soon sought with social attentions. Dr. Alexander Graham Bell, who has practical efforts for the afflicted is known in every clime, had the honor of entertaining the illustrious guest during her sojourn in Washington. Dr. and Mrs. Bell gave a large reception in their home on a quiet, quiet avenue and in the receiving line were the distinguished educators and philanthropists of the nation. Miss Margaret Wilson, eldest daughter of the President, stood in line presenting her friend to the celebrated guest for hours. Dr. Palmer Priestly Clayton, United States Commissioner of Education, who has extolled the system so highly in his latest annual report on educational conditions in this country, was another who in the evening presented well-known teachers to the distinguished guest. Socially and from the literary and scientific standpoint everybody attended the reception and the lecture which followed. During the same day, after receiving the Dottoreessa and her companion had had a pleasant chat over the tea cups in the cozy Blue Room. In appearance Dottoressa Montessori is the exact antithesis of the Italian. She is of sturdy figure and with a quiet, so imperceptible, many thought her a sort of reincarnation of Mona Lisa. Her eyes have the same steadfast gaze, her hands are invariably folded before her, just as immovably as those of the wonderful woman of Leonardo's creation.

When she talks her eyes change instantly and a few sweeping gestures convey the exact shade of her meaning even before her bright-eyed companion has time to understand her vernacular. She never moves except when expounding some particular phase of meaning and her repose alone is worth much in this active, bower-like age. As a teacher, she would never stop to teach the rank social votary, a course of her treatment seems to offer much more than the rest cure in the sanatorium. That quick expanding smile which seemed to be as much as her hands and feet, is entirely lacking in this grave and sedate looking woman. She smiles very slowly, "like sunlight struggling through the shutters of a darkened room." But her eyes are always animated and they sweep the horizon understandingly.

"When I first approached the idea of sending children to school and keeping them from home to seven years under my roof in Italy, these four years are the ones in which children are very troublesome, too full of energy, always pulling and pushing, generally breaking objects and running about, the trials almost beyond endurance, for parents and for their caretakers in the orphanages always with as many separations of the sex in intellectual prowess. It would be useless to detail these more pedagogical methods familiar to all those who follow the kindergarten and allied systems. In their application, these systems, much alike, but with us here, are quite different. We tried to give psychic stimuli to each child according to his needs. Here I have had the objection that owing to the numbers and the limited number of the sexes, the individual training must be solved by every school board according to the need. To develop the best in every child, the school board should itself should command itself to the State and should appeal to the State and the school system, national and local. The environment appealed to each child, offered a suggestion of environment, and every child demanded the little that each permitted to be free in all their associations, and they were all created with cordial affection. The parents and their caretakers in the orphanages always with as many separations of the sex in intellectual prowess. It would be useless to detail these more pedagogical methods familiar to all those who follow the kindergarten and allied systems. DOWN-TO-DATE REPORTS.XXXIIIRD YEAR.

For North End.

HOTEL PROJECT
TAKING SHAPE.Local Land Company Plans
Twelve-Story Hostelry.Site Is on Spring Between
First and Second.Building Will Be of Modern,
Fireproof Type.

If negotiations now declared to be well along toward consummating are successful a twelve-story fireproof hotel building of the most modern construction and appointment will be started early next year by the Verne E. Carter Company, a syndicate of San Francisco capitalists, at No. 128 on 14th Spring street. Plans for the contemplated improvement are being drawn by Charles Gordon, a local architect, and a local hotel company, it is said, has agreed to take the property on a long-term lease.

The site of the proposed new north-end hotel is 86x141 feet in size and is at present occupied by an old brick store building. This antiquated structure, it was stated by the architect yesterday, will be removed in February, the hotel being started immediately thereafter.

The project, it is known, it is an attempt to be of reinforced concrete construction and will contain 100 guest rooms, each with bath, a large lobby, two stories of writing-rooms, a barbershop and a billiard room. Space for a restaurant is reserved in the basement. All rooms will be served by a complete mechanical heating and ventilation system. Two passenger elevators and a freight elevator will be installed.

The plans call for a street facing of sandstone and terra cotta. The plan to be finished in Circassian white, marble and tile. The cost of improvement in its entirety will be approximately \$300,000.

IN NEW QUARTERS.

Strong, Dickinson & McGrath, the Home Building and Investment Company, and the Alfred E. Gwynn Company yesterday moved from the 18th Van Nuys building to handsome new quarters in the Meridian building at Ninth, Spring and Main streets, where tomorrow they will resume business without interruption.

Strong, Dickinson & McGrath and the new firm will occupy suites of the new structure, built, incidentally, one-half of the entire floor.

The suite is finished in white and mahogany. Among the members of the firm are John C. Austin, Albert C. Martin, Fernand F. Mentier and A. F. Rosenblum, a fifth member of the delegation, Octavius Morgan, being absent on a tour through Europe.

The Los Angeles delegation, also, Octavius Morgan, of Los Angeles, is in the city.

Mines and Mining in the Great Southwest.

California Mines.

GREAT OUTPUT FOR 'THIRTEEN.'

Two Million Dollars Above Nineteen-Twelve.

Gold Production Is Larger Than Ever.

Petroleum Yield Easily Wins First Place.

(Special Correspondent of The Times)
SACRAMENTO, Dec. 26.—Preliminary estimates, based on early advices from all the leading districts of the State, places the 1918 value of the mineral output at \$93,000,000. This is a gain of \$2,000,000 over the 1912 yield. Petroleum easily claimed first, with the gold miners contributing greatly to the enlarged output.

In 1912 the value of the gold yield was \$19,713,478. The estimated 1918 yield is \$20,650,000. While the mother lode districts were responsible for the largest gains, the dredges in the Folsom, Luba River and smaller districts yielded heavily. The copper output was about the same in 1912 and 1918, and its value was \$4,728,000. Silver, zinc and lead registered gains, due to increased production from Shasta, Inyo and one of two other counties.

The most stellar events of the year, from a gold-mining standpoint, were the discovery of gold at a depth of 3,800 feet in the Kennedy mine at Jackson, the development of the famous Plymouth Company, which virtually abandoned property into a valuable mine, the advent of the powerful Guggenheim interests in the placer dredging field, and rich discoveries in several new districts.

The Kennedy discovery was of prominent importance, disclosing, as it did, the persistence of valuable gold-bearing veins in a vertical shaft of 3,800 feet. At that point the ledge shows a width of several feet and a splendid body of ore, seven feet wide, has been developed from the 3,200 to the 3,800-foot levels. The shaft was sent to a vertical drift extending 500 feet, making the Kennedy by far the deepest gold mine on the North American continent. The mine was the largest quartz producer in California, and 15,000,000 of its output approximated.

The Plymouth Consolidated, a property with a productive record of \$11,000,000, was opened to a depth of 2,000 vertical feet, rich ore was located out on the surface, and arrangements were made for the installation of a reduction plant capable of treating 300 tons per day.

So pleased were the operators with the results of the year that they acquired the New London, an adjoining property, and arranged for its systematic development. The company is composed of wealthy English people, and the Plymouth Company's success is expected to encourage large investments of British capital in the gold fields of California.

The Keweenaw Consolidated States Mining, Smelting and Mining Company secured the Rhetta, Bay State and other old properties, and arranged for vigorous developments. In other sections of the mother lode, mining was very active, and the outcome highly favorable for a largely increased yield in 1914.

The Grass Valley district increased its output, following enlarged yields of rich ore from the Ouestonash and other mines. Conditions in the North Star appreciably improved in the closing months of the year, and the company disbursed a total of \$200,000 in dividends, bringing profits to stockholders since incorporation to nearly \$4,000,000.

The Nevada City district also registered gains, following discoveries of rich ore in the Ouestonash and enlarged yields from the Champion group. The Alleghany field was very active, and the Tightner mine yielded lavish quantities of ore and splendid gold.

In Trinity county the Globe Consolidated Mining Company erected a twenty-stamp all-sliming mill at its properties near Dredge, and commenced production from the Globe, Chloride, Baines and other mines. The Gladstone, Yellow Aster, Eagle-Shawmut, Cerro Gordo and other premier producers reported good years.

A salient tendency of the year was the growth of interest in old mines and districts, probably influenced by the fact that in most of these properties are found large reserves of common ore, the need of which to the old operators because of unsatisfactory reduction methods of the early days.

Another feature of much interest was the action of some of the California capitalists in the gold fields of the northern districts. Los Angeles people were particularly active in the Nevada City, Forest, High Grade, Trinity and several Mother lode districts. In the majority of instances their enterprise was richly rewarded, particularly in the case of the Ouestonash quartz mine and several placer properties.

The Headlight mine at Cawville, owned by a San Fran. Angeles man, is expected to resume production in the spring. This is one of the big gold mines of Trinity county, but has been handicapped by the refractory character of its ore and the difficulties experienced in devising a satisfactory process for gold recovery. The Brandy City and Neoceno hydraulic properties in Sierra county, both of which are partly owned by San Fran. Angeles people, were active and remunerative.

Natomas Consolidated was the premier dredging concern and the largest gold producer in the State, the output of the dredges exceeding \$10,000,000 for the year. New dredges were added to the Folsom fleet and the output from the Oroville district was also enlarged. The Yuba Consolidated Gold Fields produced in excess of \$2,700,000 from the Yuba River dredges and constructed near Hammonton a mammoth all-steel dredge equipped with ninety sixteen-cubic-foot buckets, capable of digging to a depth of seventy feet in the water. This is the largest and most powerful dredge ever built in any field.

The Guggenheims, through their Yukon Gold Company, acquired extensive placer holdings along the American River near Auburn and built a dredge of medium capacity. Options were also taken on several adjacent placer deposits. In Trinity and other counties the powerful concern has made extensive purchases of gravel territory under option and carried on vigorous exploration.

Copper production continued heavily handicapped by the agitation against the miners and farmers, but a brighter day was dawning. The Balkisks resumed production on a small scale, started experiments with the Hall desulfurizing process, and

arranged for heavy shipments to the Mason Valley smelter at Thompson, Nev. The miners continued to feed all California copper producers with an output exceeding 21,000,000 pounds, and kept three furnaces in commission at its Kennett smelter. The copper resources of the State are tremendous, particularly in Shasta county, and with the fume troubles settled the State can be relied on to produce fully 100,000,000 pounds of copper annually with the present smelting facilities.

The iron industry was given an impetus by the successful placing in commission of the electric smelter at Hermon and demonstration that the copper resources of the State are marketed on a profitable basis. Coal was produced from a new deposit in Siskiyou county, and zinc, lead and other metals were also finding growing attention.

Throughout the State the mineral outlook is highly encouraging, and 1914 is practically certain to record marked progress all along the line.

BIG ADVANCE EXPECTED.
DEVELOPMENT PERMANENT.

CLIFTON (Ariz.) Dec. 26.—Within a week it is expected to start the experimental oil flotation mill of the Inspiration Consolidated Copper Company. It will handle about 600 tons of ore a day and will prove a more practical demonstration of the system for reduction than was the fifty-ton mill with which first experiments were conducted on Inspiration ores. Temporary arrangements for power from the Miami plant will have to be made, as the government transmission line from Roosevelt will not reach the mill for a month or more.

Under way is a program of more than 100 feet a day being made on drifts. Six compressed-air locomotives are being used for underground haulage. This method of transferring ore to the surface is proving more economical than the use of electric power.

At Morenci a great addition is being made to the concentration facilities of the Arizona Copper Company, doubling the capacity of the old mill, which will be able to handle 1,000 tons of ore a day. The change has been a gradual one, now in progress for five months without a day's cessation of activity in the milling of ores. All the floors have been changed from wood to concrete.

The concentrator of the Detroit Copper Company many changes have been made lately, including the abandonment of jigs and the substitution of Wilfley separation tables. The same company lately installed at its smelter an additional furnace, with a capacity of 500 tons of ore a day, and has rearranged its converter plant for the more economical handling of matter. The Detroit Company also has just finished a fine office building and has built a new office building and has built a new mill, replacing an amalgamation process that has not proved effective.

The Twin Peaks Mining and Milling Company has purchased and will install at once a cyanide mill of large capacity, replacing an amalgamation process that has not proved effective.

The mine is being developed by the Arizona Company, and the main work at the property is the sinking of the main shaft to the 1400 level, which is to be reached within a couple of weeks. Drifting on the 1400 level will be completed on the 1400 and 1450 levels.

News From California Oil Fields.

Surplus.

PRODUCTION OF OIL AGAIN FORGES AHEAD.

November Figures Show Falling Off in Shipments While Yield Is Ten Thousand Barrels Ahead of October, Despite the Fact that Many Wells in Coalinga and Kern River Are Shut In.

DESPITE the fact that additional wells, producing an aggregate of 7,000 to 8,000 barrels of oil daily, were shut in during November in Coalinga and Kern River fields, the total for the month showed an increase over the previous month amounting to 9,420 barrels daily average. Shipments showed a falling off during the month amounting to 5,070 barrels daily average. Consequently during November there was a surplus of oil totaling nearly 10,000 barrels, or a daily average of 11,140 barrels.

Daily average production last month was 27,265 barrels, according to figures published in the Standard Oil monthly bulletin. The shipments during the month were 7,422,225 barrels. Stocks were increased from 1,011,995 barrels October 31 to 1,018,429 barrels November 30.

The increase in production of the oil was due entirely to the enlargement of the fields Midway-Sunset, Whittier-Fullerton, and Santa Maria-Lompoc. All the other areas showed a falling off, except Santa Maria, where an increase of 50 barrels a day was revealed. The production of Midway-Sunset was 9,030 barrels daily average, larger in November than in October, while the output of Whittier-Fullerton was 1,000 barrels larger than the later month.

The most pronounced decrease was shown in Coalinga—6317 barrels daily average. In Kern River the decline amounted to 1,000 barrels daily, falling off 3,000 barrels daily average, was moved in the Salt Lake field, and 50 barrels in McKittrick, and 400 in Los Hills and Belridge.

The increase in production in Midway-Sunset and Whittier-Fullerton was not for the most part due to the addition of the Standard Oil Company's big wells. The Standard bought in a 10,000-barrel gusher on an Eddy lease near Whittier about November 1. The company also has

1,000 barrels daily average.

Bakersfield.

STRIKE OIL IN NEW TERRITORY.

BEECHTON WELL SPOUTS OVER DERICK TOP.

Produces Twenty-four Gravity Barrels for Short Time—Gas Pressure Heavy—Osho Company Gets Big Well—Progress in Midway Development.

Read Correspondence of The Times!

BAKERSFIELD, Dec. 26.—The English Peerless Oil Company began to drill up well No. 1 on section 17, 11-22 last. The well is in new territory. The oil is 24 gravity, with a good gas pressure to insure a steady flow. When the cement was drilled through the gas pressure threw the oil as well as the water in the pipes high over the Derrick top. After flowing over the ground for a few minutes a fine sand closed the pipes and the well ceased producing.

The Hasletton Crude holdings are near the Western Minerals Company owned by the Santa Fe. The Santa Fe people have been waiting developments on the Hasletton Crude property before continuing work on their own wells, building and equipment used in the development.

The Western Minerals property approximates 50,000 acres on sections 17, 22, 25, 26 and 35, 11-22, and has long maintained that the strata of oil lay under the surface at about 2600 feet in depth. The Hasletton Crude well struck the oil at 1945 feet.

Well No. 9 of the Obispo Oil Company on section 23, 12-23, on the Maricopa lease came in Monday with a flow of 800 barrels per day. The oil is 24 gravity.

FIELD NOTES.

The English Peerless Oil Company has finished drilling up well No. 6 and will start to drill with a rotary immediately. The lease is on section 11-22.

The American Oilfields Company is erecting a rig on section 36, 11-22, for well No. 26. There are already 1000-barrel producing wells on this property.

Well No. 2 of the Brad Oil Company has landed the eight-and-one-half-inch well at 1974 feet and has cased off top water. This well, which is on section 15, 32-23, has already been cemented several times.

The Eagle Creek Oil Company has landed a string of ten-inch casing in well No. 1 on section 31, 31-23.

The Union Oil Company is erecting a new derrick on the Foothill lease and the other on the Jermont lease.

The wells will be started in January and rushed to the end with all possible dispatch. They will be in the high-gravity sand.

Well No. 1 of the United Oil Company on section 21, 12-22, is down four feet and is being cased off.

Well No. 27 of the United Oil Company on section 21, 12-22, is down four feet and is being cased off.

The Record Oil Company set the back casing in well No. 2, section 11-22, on Christmas Day at about 11,000 feet. The well has been drilled to a rotary and is in the hard through which it was drilled is a hole.

Comstock of the Comstock Oil Company, section 24, 12-22, has landed a high-gravity oil well at 11,000 feet.

The back casing had landed at a depth of 2020 feet and as the forma-

In the Earth.

(Continued from Second Page.)

is Girasol (fire-spark) which is sparingly present in the mass. (Girasol is the sun, Sol, the sun.) From the girasol present brilliant-red colors occur sparingly, when turned toward the sun, and the colors are also reflected when held in the hand, and viewed through a glass. The question with you should be: Is there any high-grade girasol at the locality from which the sample was taken?

Certain Clay.

HOODOO RANGE, Dec. 6.—Q.: I am sending you a sample of clay; kindly let me know what you think of it. This clay comes out of a hole sixteen feet deep and six feet square. There is fourteen feet width of clay in all. I got down to water and stopped sinking and then run a drift eight feet off to one side. The deeper I got the better the clay. I am going to make a claim for the Los Angeles Times is what Los Angeles must have to hold her together. I baked some of the clay as you will see by some samples that I send you. R. B.

A.: Your kind words are appreciated. The clay is low-grade aluminum silicate, and there are traces of opal silica in the mass.

The samples are full of "grit" (sand,) and when this is eliminated the result is that the washed clay will answer for inferior "ball clay" as used in the clay industry.

Gypsum.

YUMA (Ariz.) Dec. 6.—Q.: I send you by mail a small box of what I believe to be lime, phosphate. What is it? Kindly let me hear from you through The Times. H. H. Mc.

A.: The whitish plates in samples are gypsum and the ganges there were white, white, white.

The samples were tested for phosphoric acid with negative results.

Sulphur.

OCEANSIDE, Dec. 7.—Q.: I am sending you under separate cover two small samples. Please give me a determination of same.

A.: Chalcocite sulphides of sodium and magnesium, with chloride of sodium.

The samples are now reported upon with due caution. We find it not practical to test a minute quantity of salts in the expectation of applying results to an entire lot.

Y. G.: Give no reference to locality, and owing to the fiasco on potash deposits of the United States, no one is safe to report on salines, especially so, if the testing material is "skewered."

No. 1 is "strong" on magnesium sulphate. Potash present 2 per cent, approximately. No. 2 lime sulphate present. Iron oxides and aluminum silicate present in samples. Potash 2.20 per cent.

Nitric Acid and Mercury.

LOS ANGELES, Dec. 7.—Q.: How is the precipitate obtained from the blending of nitric acid and mercury, and what is the name of such precipitate?

A.: That depends on what you term "blending."

Nitric acid and mercury form a very interesting subject in chemistry. They are not good chemical training to study salts as a whole; the reactions characteristic of the metals in salts should be first mastered, and then follow with the residues which, with the metals make up the salts.

Many chemical salts as a whole which splits up in one form only, and regard nitre (and all other nitrates) as containing nitrogen trioxide and a metal. Take mercury, for instance, and we find that from the normal mercuric nitrate, several oxy-nitrites can be formed. Evaporation of mercuric nitrate, and the evaporation (with cooling) crystals are deposited. If these crystals are washed with cold water, a yellowish, pale-yellow oxy-nitrite is obtained. Boil this yellow oxy-nitrate with water and a brick-red oxy-nitrate appears.

Now you question: How is the precipitate obtained from the blending of nitric acid and mercury, and what is the name of such precipitate?

If a globule of mercury is placed in a test-tube; then drops of minimum of nitric acid are added, the mixture boiled until nitric oxide fumes (red) no longer form, and the mixture set aside and cooled, crystals of mercuric nitrate separate; providing that a globule of mercury still remains in the tube; no matter how small the globule may be.

Mercury in excess of strong nitric acid: the mixture warms; mercuric nitrate forms, and as such will be deposited in crystals as the solution cools. Nitric acid and mercury when boiled together form mercuric nitrate; if a trace of mercury (element) is in excess of the mercury (mercuric nitrate) gives a white precipitate with solution of mercuric salts; hence the importance of administering white of egg while waiting for a stomach-pump in cases of poisoning by corrosive sublimate.

WALT.

DETROIT (Mich.) Dec. 7.—Q.: I am making to your Rare Mineral Report a sample from a new locality on the west extension of the Marquette range. Will you kindly publish name of mineral and give market value?

A.: Glad to hear from you. The samples are named at the sub-head.

It is of a light red color. Celestite is of a brilliant, shining lustre; subtranslucent; streak white; exceedingly brittle; hardness 3.4, and 3.55 in sp. gr.

Approximate composition of sample follows: Sulphuric acid 42, Strontia 55, with lime carbonate and iron oxide present. Celestite (powdered) phosphoresces on red-hot iron.

Market value of the product depends on quantities for sale, and, it may be stated, that the prices for such material vary very much indeed.

Stibnite.

BAKERSFIELD, Dec. 9.—Q.: I send some quartz on one of my claims and the samples that I send you come in once in a while in small seams or pockets. Please tell me what the ore is. It looks like telluride to me.

A.: The samples are antimony telluride; stibnite (mineralogy.)

The matrix surrounding the samples is quartz, and the stibnite occurs in forms somewhat resembling telluride.

Color and streak lead-gray.

Opaque, brittle, sublustrous, and lustrous.

It is very brittle.

The samples are sulphuric acid sulphide; stibnite of mineralogy.

ENGLAND FACES
LABOR UPHEAVALUnions Prepare for Struggle
During Next Year.Believe Crippling of Railroads
Will Win for Them.Much Depends on Leadership
of James Larkin.

London Correspondent of The Times] LONDON, Dec. 13.—Events in the world of England are moving with lightning rapidity and point the goal of a gigantic upsurge which will stagger public opinion in Europe and the United States. The organizations simply refuse to gird up their loins, and when they are fit for conflict they strike—and strike hard.

The last railroad strike in England is responsible for the grim determination of the workers. Apparently they were in the minority in the bitterness of the strike, but they learned the secret of their power. They discovered that their chances of success are a combined attack on all the units of transport, and that if they could win they must effectually stop all traffic. The strike, as far as surface cars and the mechanical carriages, as well as the ordinary carts. Ever since that debacle they told each other: "If we can stop transportation of goods and of passengers, trade and industry are in a grip."

James Larkin is only one of a number of leaders in this matter. He is a pioneer in the cause of equality for the British trade unions. He is not longer Ramsay MacDonald, Kier Hardy, or Phillip Snowden. They were the bays, but the horse has been stolen unperceived from their trap. A new set of men are to come with the turn of the tide, when they will come boldly into the light and take their places at the head. Meanwhile their names are only to a few, and those few have been worn to secrecy. And it always on the cards that one or more, at the earliest hour, disappear from their colleagues and be dead.

Of all this turmoil and welter another fact emerges of profound importance to capitalists in Europe and the United States. The notion of revolution is killed at the root. Never has that theory been more dangerous, more ignominious, more dangerous, more ignominious. Magnificent as was established by Ellis Page, superintendent of Chicago's schools (and no better piece of work could have been done), than that it must be for the Transport Workers are brought in, or bringing the economic life of the country to a standstill temporarily. What follows is the first victory, though the experience at Liverpool and Birmingham was not promising. At the same time the consolidation of labor would soon be faced with a consolidation of capital while the public's sympathy would be alienated by a reckless and indiscriminate use of dangerous weapons.

Another question is whether Larkin can keep his head. Already he has made four blunders in the Dublin strike, and he has been beaten in the Labor party and lost financial aid; the second, when he defied the priests sending starving Dublin children to England; the third when he sneered at the empire and the fourth when he demanded that he should be in a few hours a general strike.

The labor war of 1914 will be too big for any leader to afford the costly luxury of a blunder.

He is not a dreamer of dreams, a mapper-out of Utopia; he embodies rather the immediate anger of those who feel themselves wronged. He was born to be the hero of a drama of insurrection. That tall, slouching figure, the head of the workers, a wideawake, rising above the prosaic sea of the crowded streets, fascinated one as only men of intrepid originality of character do.

"Now, here him spew, as he crouched over his many followers in the gloom of a street lamp, was still to be fascinated, but, if one had had a comfortable meal oneself, to be a little outraged. His Lancashire-Irish language was full of violence, as if he were breaking stones. He is more at home in denunciation than in humor. He is a fierce revivalist of whom all the members of his own organization are quick, sharp, and they say, obstinate, as well as passionately warm of heart."

Another friend of Larkin asserts: "If he were not a labor agitator, he would be a military leader, a fighter, a pioneer in the wilds; a winner of everything where pugnacity and fearlessness carry a man to success."

Larkin is fearless. That is one of the secrets of his power over the turbulent Irish. He is a United States citizen, a stalwart docker on the docks, the man who would cheerfully fight. Dublin policemen, he has sunk right in shame.

"Larkin in private fears nothing and respects nobody; he has the spirit of egotism of a dominant personality and this is also his weakness. He is vain with vanity born of power over his followers, and like most big men, he is lonely. Even in his own camp he is not understood. He is an Industrial Napoleon, commanding the soldiers of none. His powers figure in and compelling voice silence criticism, which obtain obedience. If Larkin at a public meeting is given the floor he directs the platform and his hits jump to the jaw. That is his method in labor battles. He finds a place to hit and then strikes."

From Larkin's more recent speeches the nature of the kind of co-operation he desires can be seen. He is not content with military assistance for the Dublin strikers, but compels the two existing organized labor to assist the Dublin employers—by "blacklegging" the strikers and by handling goods intended for the employers. What distinguishes him in this first charge outsiders have not yet come to determine; but, if there is any real alliance, it is with the employers. His sympathies are for the sympathetic strike by the Transport Workers in Great Britain, for the acceptance as a fundamental principle of unionism that no union man shall handle unorganized goods. This is his support, as far as I can judge, which he said at one point would finish the Dublin strike in a few hours. Nevertheless, labor would be willing to consider very carefully before committing itself to so revolutionary a course. The sympathetic strike opens up the possibility of the unorganized becoming general, and the public opinion in England will criticize drastic measures to put it right.

Larkin's second point is much more important. In this he is not alone for the sympathetic strike by the Transport Workers in Great Britain, for the acceptance as a fundamental principle of unionism that no union man shall handle unorganized goods. This is his support, as far as I can judge, which he said at one point would finish the Dublin strike in a few hours. Nevertheless, labor would be willing to consider very carefully before committing itself to so revolutionary a course. The sympathetic strike opens up the possibility of the unorganized becoming general, and the public opinion in England will criticize drastic measures to put it right.

The sins and mistakes of the great railroad builders in the United States can never in their aggregate amount to a fragment contrasted with the good their courage, initiative and force of action produced in the shape of millions for millions.

The chief harm of the muckraker lies in his one-sidedness; his determination to pick and emphasize the occasional flaw and to ignore the overwhelming of the sound and beneficial. They continue to attack the men and commercial movements which have made the country, with as-equally cheerful disregard of truth or results.

AUSTRALIAN GOVERNMENT-OWNED
RAILWAYS ARE UNSUCCESSFUL.

GOVERNMENTALLY ruled by the Socialist-Labor party the Commonwealth of Australia is not making a success of its state-owned railways. An English writer, Edwin A. Pratt, has recently published a book about the Australian railroads. It bears the title, "The State Railway Muddle in Australia." Why "muddle"? Principally because the state-owned railways are not satisfactory to the public. Shortage of freight cars causes enormous losses to the farmers and other producers; refusal of the States comprising the Commonwealth to build new lines unless they are reasonably sure of paying their way from the start, thus preventing the opening up of new country, the development of lands and communities; advancement, livelihood and competence for many—the spread of civilization. Had such a policy governed here California would not be what it is, a State of nearly three million people, while the six large Australian States have a combined population of barely five millions. For full comparison we might add to the California figures those of all the other Western States of the Union. And all the great American railroad success has been accomplished entirely under private ownership. Here, says Public Service, is the way one writer puts it in the *Pastoralist's Review* of March, 1911:

"In the Australian States, agricultural settlement and development have from the outset been prevented and retarded by the unenlightened and inefficient (government) railroad policy. While railroads in all other new countries have preceded settlement, and freight charges have been low enough to encourage agricultural production, settlement in all of the Australian States has been obliged to go ahead and cry out loud and long for government railways to follow."

"The railways have, however, followed so slowly that the settler has been compelled to evolve some means of living without their assistance before they have arrived, and freight charges have been too high to encourage cultivation of the soil."

These, it must be understood, are the people's railways, ostensibly owned and operated by the people in their own interests. Yet the most urgent needs they do not supply; the freight cars demanded by the farmer at all cost to make his market are not forthcoming and the tales of resulting hardship make the most lurid muckraking of the Alfred Henry Lewis style insipid by comparison.

No great American railroad ever was built which could possibly enrich its owners to the extent of one-thousandth part of the substantial and material values which that railroad created for the public. The sins and mistakes of the great railroad builders in the United States can never in their aggregate amount to a fragment contrasted with the good their courage, initiative and force of action produced in the shape of millions for millions.

The chief harm of the muckraker lies in his one-sidedness; his determination to pick and emphasize the occasional flaw and to ignore the overwhelming of the sound and beneficial. They continue to attack the men and commercial movements which have made the country, with as-equally cheerful disregard of truth or results.

REPORTS ON WAGES
AND CONDITIONS.

Timely Bullion from All Parts of the World.

Wages in the cigar industry, according to a report issued by the United States Department of Labor, showed an average increase in 1912 of 10 per cent. The investigation covered the wages of more than 11,000 employees in factories in the principal cigar manufacturing cities. In detail the changes were in rates per hour:

Attractive New West Side Improvement.

Acacia Arms apartments, Tenth and Alvarado streets.

FITS INTO SETTING.

Architects of New Pasadena Dwelling Have Designed House and Grounds as Unit.

PASADENA, Dec. 27.—One of the most attractive houses now being erected in the Crown Colony is the new home planned by Montgomery & Montgomery of Los Angeles for A. G. Bohannon. The dwelling is an architectural sense is a modified development of the early American colonial types, with a suggestion of the modern. The exterior is simple.

In designing the place the architects treated the house and grounds as a unit. The principal gardens are at the rear of the front of the site being for the most part in lawn. Rows of cypress and an encircling hedge give the house a charming setting.

The interior is characterized by simplicity, the main feature being a winding colonial stairway in the entrance hall.

LEASED TO CHICAGO.

One of the attractive new apartment-houses of the west side is the "Acacia Arms," recently erected in the Verdugo district on the northwest corner of Tenth and Alvarado streets. The building is of red brick, faced with white trimmings, and stands on a site that is surrounded by full-grown acacia trees. The owner has taken pains to preserve all the trees and the grassy lawns. The place is modernly appointed throughout. A library containing costly oil paintings is a feature. The property has just been leased to Mrs. W. A. Sansom, an experienced hotel woman of Chicago. Blanche Middlecoff is the owner.

BOOSTERS IN LINE.

FONTANA, Dec. 27.—Development work at Fontana will go forward with a rush with the beginning of the new year. Residents of this district who were awaiting the formation of the Chamber of Commerce are now definitely on their plan of action, are now preparing to get behind the two big development propositions in which the entire community is intensely interested. There are no greater roads in length of \$1,750,000, which the voters of San Bernardino county will settle at a special election shortly, and the completion of the Pacific Electric Railway tracks from Upland to San Bernardino through the towns of Fontana and Rialto. This will complete the final link of the main line connecting Los Angeles with San Bernardino.

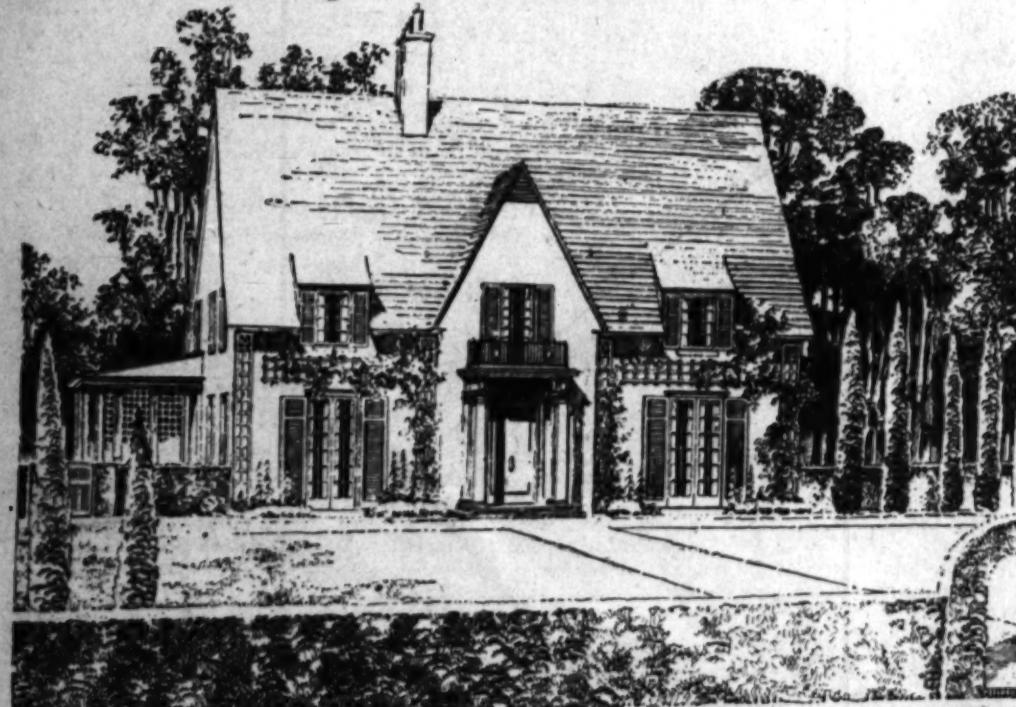

OROSI ACTIVITIES.

M. S. Robertson and E. M. Sheridan have sold their interest in the Orosi Orange Land Company during the past fourteen days. Miss Schwab, forty acres, \$6500; Ben J. Sturges, ten acres, \$1750; Mrs. Cheek, ten acres, \$1750; J. P. Daigle, ten acres, \$1750; W. F. Neaf, twenty acres, \$3000; Fred L. Grant, twenty acres, \$3500; D. E. Hobbs, twenty acres, \$3500; Earl McKinney, twenty acres, \$3500; W. E. Blodgett, twenty acres, \$3500; J. O. Arckley, twenty acres, \$4000; J. B. Hibbets, twenty acres, \$3500, and Hamilton, sixty acres, \$9000.

STREET CONTRACT LET.

Snyder & Co. have taken contract for the completion of street improvements on West Eighth street from Catalina street to Normandie avenue, including frontages of the McCarthy Company, new West Side Heights, Heights front on the south side of West Eighth street, the property belonging to C. T. Crowell, and the holdings of the Schmidt estate on the north of West Eighth street. The improvements consist of new sidewalks, curbs, gutters, water, sewer, gas and the paving of the roadway. The Los Angeles Railway has been working four weeks adding its track along West Eighth street between Catalina street and Normandie avenue to the new and official grades.

Designed to Fit Beautiful Setting.

House for A. G. Bohannon of Pasadena, Montgomery & Montgomery, architects.

J. F. Scott, in the Paige, which won second place in the dealers' consistency tour. This car that made each control almost exactly on time and which was penalized only three points.

For New Year.

WIESE PREPARED TO OPEN OUT INTO LARGER FIELD.

John Wiese,
United States tire man, as he appears when perplexed.

JOHN WIESE, manager of the United States Tire and Rubber Company, is coming into his own in proper shape with the New Year. The big concern of which he is manager, is taking over an immense line of goods and tires will not be the only articles kept in stock. This move was contemplated several months ago and the stock has been increased from time to time.

The force of men employed at the local concern is large. The amount of business is larger. Wiese has worked himself into the habit of leading all branch houses each month that he is disappointed when he failed to lead by a big margin of business. He is continuing his most successful year and is prepared for the larger field.

The personality of Wiese has much to do with his success. He has a host of friends in the business and has an excellent factor of the dealers that no costing tour, race meet or auto show is quite a success unless Manager Wiese is found in the ranks as one of the workers toward the plans for the special event.

Mechanical Facts.

POWER, SPEED, COMFORT FOUND IN NEW MERCER.

LOCALE Mercer distributors take delight in describing the 1914 car which arrived last week, guaranteed for a mile in fifty-one seconds, speed gained from a motor measuring four and one-half by five inches, developing fifty-eight horse power at 1700 revolutions.

The high power of the motor is, of course, a governing factor in the speed and the all-round ability of the model, and most of the credit is given by the Mercer engineers to the valves, which are no less than two and one-quarter in diameter with a lift of 7-16-inches. The valves are of Tungsten steel, which admirably resists the highest cylinder temperatures.

The cylinders have T-heads with the intake valves on the right, and are made of castings with integral blocks, and the valves are finished in the modern way—by grinding. Pistons are of the same material as the cylinders and depart from conventional practice in that but two rings are fitted, and

they are of the concentric type, joined on the inside to give an even tension at all points. The piston rods are clinched in the webs of the main manufacturing parts in the motor.

The manufacturers claim that much of the lack of vibration of the Mercer motors is due to the fact that the motor is balanced, the flywheel being in the middle and the longest of the flywheel end. A shaft balancing machine is employed to get the shaft in perfect running balance at speeds up to 1800 revolutions per minute. Crankshafts are made with integral cams and though housed in the crankcase are easily removed; the front bearings are annular balls and the other bearings plain. The shaft

is balanced, so that there is no vibration in the weight of the main manufacturing parts in the motor.

The crankshaft runs in three bronze-backed bearings filled with special alloyed bearing babbitt. The crankshaft is two inches in diameter, the bearing are 3-1/2, 3, and 4 inches in diameter, respectively, the shortest being in the middle and the longest at the flywheel end. A shaft balancing machine is employed to get the shaft in perfect running balance at speeds up to 1800 revolutions per minute. Crankshafts are made with integral cams and though housed in the crankcase are easily removed; the front bearings are annular balls and the other bearings plain. The shaft

is balanced, so that there is no vibration in the weight of the main manufacturing parts in the motor.

PAIGE WINS ADDED HONORS.

Second Place on Tour Results in Big Business.

Young Boosts for Low-Priced Handsome Car.

Pleased With the Work Already Accomplished.

A. M. Young, manager of the Thomas Motor Car Company, is elated over the success of the Paiges on the recent Dealers' Reliability Tour. It was one of the greatest regrets of the Paige man that he was unable to make the run and at the last moment J. F. Scott, treasurer of the company, was asked to undertake the trip.

Well, if ever a surprise was sprung Scott was the man who sprung it. The Paige is an excellent car. It was granted that it had a chance, but Scott was the unknown quantity. No one figured the knowledge Scott had of the roads all through the Southwest, no one estimated that with the knowledge he has of the Paige car he would have an advantage.

The first control out Scott was penalized and he was not conceded to be a serious contender for any honor. He smiled and let the plaudits roll on. The first night at Birmingham found him close up behind the leading National, with only three points out for the entire trip. He telephoned Manager Young and then began to figure his schedule for the second night.

That second day's run was all to the good and the Paige finished so close up to the leader that it took an extra hour of careful figuring before the judges could announce the winner of that contest. The Paige had second place after a remarkably consistent run against some excellent cars.

With this evidence that he is a low-priced car that is second to none on the market, Young is prepared to launch a steady campaign and to launch a steady campaign of the Paige cars to the outside dealers who are busy handling the goods. This is to be a great year, according to the local manager, who has a host of men who are waiting for the new machines.

RICH FEAST.

The recent dinner at which plans for the present season were outlined has excited much interest of interest to the trade as far as the light car is concerned. The Paige is being handled in a way that is making many of the other dealers sit up and take particular notice. The car has come into its own and is taking the place that is prepared for a low-priced motor that can be handled in quantities.

"We have much to be thankful for this year," said Manager Young yesterday. "Our line of light cars has sold up well and we have shown that we are real contenders in a field that is filled with some excellent cars. We do not try to tell people that the Paige is the only car, but we are satisfied to give a chance to demonstrate against the other cars will accomplish against terrific odds."

Bramlette is one of the few racing drivers of renown, who is not in the speed game for what he can get out of it. He is one of the most prominent drivers in the Southwest. His racing outfit is always at work on his contracts. Yet Bramlette chooses to risk his life, spend his good money for high-class machines, and even neglect his business to gratify his desire for the thrill of the speedway.

DETACHABLE TREAD IS LATEST WRINKLE.

Tread detachable from the regular carcass, is the feature of a new type of tire produced by the Goodyear Tire and Rubber Company, which has sold up well and we have shown that we are real contenders in a field that is filled with some excellent cars. We do not try to tell people that the Paige is the only car, but we are satisfied to give a chance to demonstrate against the other cars will accomplish against terrific odds."

This is a time when people know cars. We never know. We ask our prospects to ride in the Paige and then judge for themselves. If I find out of my men speak a slightly of our car, then the man is going to find himself out of a job. We only say good things for all other makes and the business we are doing makes me determined to continue the same policy.

MYSTERIOUS SIX.

"That tour meant much to the Paige. We are pretty well known in Southern California, but following that run we became still better known and as a result of what we obtained through winning second place we have done a large amount of business. Times are not bad. If you could glance over our books you would realize that what I say is the truth."

In addition to the Paige, Young handles the Howard "Six," that "Mysterious Six," which attracted so much attention before it arrived and which has made since it reached this city. The Howard is being passed out regularly and the owners are more than pleased with what the car will do and with the demonstration already made.

Greater realness in the tread gives less liability of puncture, while separate air chambers protect from overheating.

COLE

"The Standardized Car"

Why Cole can save you money

The Cole organization buys in relatively large quantities. A part maker is willing to give the Cole the lowest possible price because he knows that from the day his product gets into The Standardized Car it will tend to be oversold.

The work of a specialist is always better and cheaper because the specialist, by doing one thing over and over again, acquires rapidity and skill—and he thereby increases production without increasing cost.

The profit you pay on your Cole when spread over the various parts becomes so thin that the profit you pay us on a steering gear, for instance, is scarcely perceptible. If we built our own steering gears our profit on each steering gear would necessarily be a great deal larger than our present small profit plus the present small profit of Gemmer.

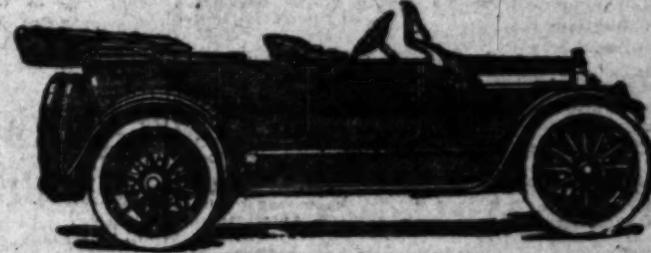

The Cole pools its purchasing power with every other maker who uses, in another car, any part incorporated in the Cole.

Under the Cole system there is no non-productive overhead—no vast machinery investment.

The Cole Motor Car Company in its entire history has never yet failed to discount a bill—you, as a business man, know the advantage of a record like this. So when it comes to actually buying your car buy—

THE STANDARDIZED CAR

To make sure that you get the car which has stamped the automobile world to Standardization, look for this name—COLE.

Cole five-passenger, four-cylinder touring car, 120-inch wheel base, completely equipped, Delco electric self-starting and all, \$2050. Also see the Cole Six, with its wheel base of 138 inches, completely equipped, \$2750.

Lynn Gets Busy.

BUXTON GROOMS AMERICAN MODELS FOR MOTOR SALON.

TON C. BUXTON will exhibit the American cars at the Los Angeles Automobile Show. He has determined to make a complete showing of the new 1914 line of underdriven cars, which will be particularly attractive, as they will be displayed in stripped chassis, the roadster and the touring-car type.

The determination came when the auto truck salon was first announced, and Buxton's deposit was one of the first placed with Manager Edna Humpel. The space of the American cars is near that chosen by Dan Lee and the line is to be exhibited in such a way that the underdriven will be exemplified as never have been before.

One of the big efforts of the past month on the part of Buxton has been to get cars here for the exhibition. Twice he has secured enough underdriven cars to assure him of a fine display, only to find that his saloon has disposed of the American

fourteen days before he had a chance to preserve them for future use.

Now Buxton has arranged with the factory to exhibit a special stripped chassis, and he will have two touring cars and a roadster here in plenty of time to make his exhibit one of the most interesting at the coming motor show.

"We expect to show the public that we are alive," said Buxton yesterday. "This coming year is to be a hummer and that order that we may have a success in the right place and the right manner I expect to make the right kind of a display in the right manner. The American models are excellent, and their lines are interesting that will be only too pleased to give my friends and the business public a chance to inspect the underdriven cars critically."

"This show gives me an opportunity to carry out my ideas regarding this display. We will show the 1914 model in the right manner and to a decided advantage. Twice he has secured enough underdriven cars to assure him of a fine display, only to find that his saloon has disposed of the American

Watch Elders.

LASTING FAME FOUND BY LASTING MACHINES.

Y. DEL VALLE remarks that the value of a car is determined, not by the number of its types, but by the number that stay well and that a "record-breaking" car sounds impressive, but the buyer would wait a year or so, to see how many owners are driving their original cars.

"If you will study the past history of the leading cars you'll find that they made slow progress at first, but every car that was sent out had made and, thus, creating a demand that is growing to astonishing proportions.

The people know what their neighbor's car is doing, and they are able to determine whether they want a car like it."

"A car to sell sensational must be radically different from all the standard cars in some way or other. It must represent greater value, be more reliable, and offer something new ideas in designing. But with the greatest array of business men in the world manufacturing cars—and the hundreds of experienced engineers

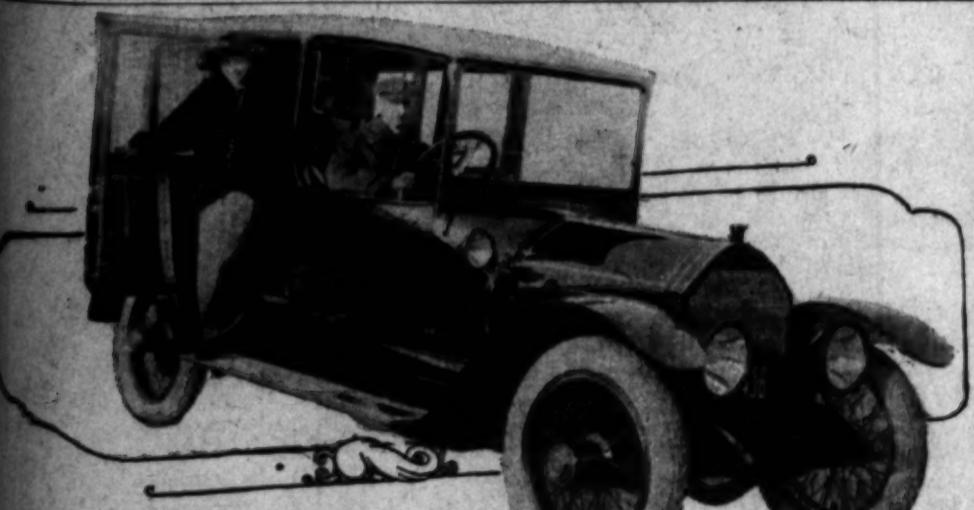

at work designing them—it is safe to assume that no car produced today can offer much greater value than the others, or better designing. So it is logical that the manufacturer of the sensational cars is putting out a cheap product or a good one, but money is not the only reason for this.

"It is far more important that a car stand the wear of the road, rather than the first inspection of the amateur. The car must be built to last until a car has shown what it will do before he risks a thousand dollars or so of his money trying to do it.

"Business must certainly be doing well in Los Angeles," said Y. R. Danville yesterday. "Because we are unable to supply the demand for Kohler trucks, having about fifteen orders on our books now waiting for the next shipment."

TUNGSTEN STEEL CUTS OUT TROUBLE.

Valves made of tungsten steel alloy have eliminated six diseases of automobile engines—warping, pitting, leaking, pre-ignition, carbon deposits, valve compression. Insulation from temperature of cylinders is the prime factor in this improvement, and grinding at intervals is also saved. High-grade cars are generally to be equipped with this improved valve this season, says J. J. Cole.

New Simplex thirty-eight.

One of the handsome late model nineteen-fourteen beauties. Notice the wire wheels, regular equipment and the interesting lines of this car.

Dean of Makers.

KOKOMO BANQUETS FAMOUS APPERSON MANUFACTURER.

REMARKABLE instance of personal success following the most humble start, celebrated at Kokomo, Ind., a few days ago, in the shape of a banquet given by the leading business men of the city. The Apperson responded to the toast, twenty-five years as a manufacturer.

All of his early struggles were recounted by Mr. Apperson, and he told of his start with \$450 cash saved from the wages he was paid for his daily toil, and of the success which followed him as he made his way through the ranks of the business world.

During his remarks he told of the many difficulties he faced in the early days of his career, and of the lack of proper money and equipment.

During his remarks he told of the many difficulties he faced in the early days of his career, and of the lack of proper money and equipment.

leading motor car manufacturers of the country.

The identical site upon which now stands the enormous factories, in which are built the modern Apperson "Jack Daniels," was the scene of his early struggles. It is there that he erected his first machine shop, in which was done repair work of all kinds, especially on guns and bicycles, as automobiles, of course, were not known in those days.

GOOD ADVICE.
Lubricate the small places on your car at least once a month, and accept the advice of W. D. Newell, who states that most owners are satisfied with putting grease in the differential and transmission, to the neglect of other parts, especially in older cars, when lubrication is most needed.

A NEW CAR.
The Willys-Knight is a new car announced for the January Automobile Shows of New York and Chicago, to be equipped with four and six-cylinder Knight motors.

PEERLESS BUY CAUSES QUERY.

Monster Purchase of Fifty Motor Trucks.

Country Wants to Know Methods.

Train Service Through Southland Planned.

Philadelphia has awakened and now asks some of the methods by which the Motor Truck and Terminal Company of Los Angeles handles business warranting the recent purchase of fifty Peerless trucks in a single order. Noblesse oblige, and the Quaker City has been informed.

Other inquiries have been evoked throughout the country by the monster order, and Stanley Smith has been besieged by inspectors of the big truck.

Fifty trucks are expected about January 1, according to notice of shippers, and the machines are to be put to work by the motor company immediately after arrival. They are to be used in the construction of the Southern California towns, besides a regular freight service from the city terminal at Third and Central avenue to the harbor.

Train on line, these routes are to be covered on schedule time to all surrounding towns.

Well-Named.

BOBCAT MARION IN AUTO SHOW.

RACY ROADSTER RUNNING ROUND RAMPANT.

Courtesy is sometimes rewarded as evidenced by a story from Chicago of a salesman who was bowing along the streets when a recent turn of cold weather had found pedestrians unprepared for the drizzling rain.

Some distance up the street he noticed a lady and gentleman vainly hailing street cars, packed to capacity by the unexpected shower, which would not stop for the couple waiting at the corner.

As the driver of the motor car reached them he stopped and invited them to ride with him. They gladly accepted, and were soon set down at the corner. The salesman then went from the salesman's mind until the other day when he was called to the phone.

"Hello," said the voice. "Is this the party who picked up a lady and a gentleman in a rainstorm some time ago?" "Yes," replied the salesman. "Well," went on the voice, "I'm the man you picked up, and I wanted to tell you that I am mailing you a check for one of those Regal Coupes."

"Now, this is to be a little surprise for my wife, you know, I liked the car very well, and I want you to deliver it at the house on Christmas morning at 9 o'clock—can you do it?"

"All right, thanks again for that ride, goodby!"

The check arrived the next day and the salesman made arrangements and delivered the car at the appointed time.

Quarter Increase.
PACKARDS GROW WITH MONTHS.

SALES AND SHIPMENTS SURPASS LAST YEAR.

New Thirty-eight Model Has Been Strong Factor in Widening Public Opinion Toward One-Factory Car. Twenty Body Styles Give Buyers Choice of Designs Suited to Taste.

A statement issued by the manufacturers to Earl C. Anthony, local Packard agent, says:

"From August 1 to November 1 the increase in motor carriage sales was exactly 22.6 per cent, as compared with the corresponding period last year. When this is coupled with 22.6 per cent increase in shipments we feel that the Packard company has made a very creditable showing and one which is perhaps unique among cars of the highest grade.

"We interpret these figures as a vote of confidence in Packard models, because it is undoubtedly true that we manufacture in our own shop more of the completed automobile than does any other maker of motor cars.

"The impression created by our new 22.6 has been an important factor in this result. It is the most attractive model we have ever offered to the public, it naturally creates more than the question of amount of interest.

"The twenty body styles offered with this chassis give an unequalled range of choice, made possible by the Packard volume of business. This variety of body types not only meets the taste of drivers, but, but, but, in the more restricted styles offers opportunity for a practically exclusive design of vehicle."

The entry of the Powderhall New Year 120-yard handicap race, annually at Edinburg, Scotland, for a purse of \$660, has closed with a total of 128 competitors. The handicap is framed by J. Donaldson, Australia. Hendry of Jedburgh, last year's winner, had been put back from start to start, and had to run four miles. J. August, an amateur, 9½ yards, M. Constantine, sprint champion, 16 yards, and L. Bandrier, half-mile champion, 12½ yards. The leading entrants on January 1 are G. Donaldson, last year's winner; Harry Holmer and W. N. Quail, both of America, and Willie Kolehmainen of Finland.

Happy New Year.

CENTURY COUPES CHOICE SELLERS.

HOLIDAY PRESENTS EXALTED BY 1914 CAR.

Christmas Passed to New Year's Day by Purchaser to Permit Supplying Local Demand for New Century—Cousin's Wife Gets Husband's Belated Gift.

What is probably the handsomest electric that has ever been unloaded in Los Angeles has been resting on the Greer-Robbins sales floor during the past week. It is a 1914 Century coupe, and has been purchased by H. R. Cousins of Hanford. The car was intended as a Christmas present for Mrs. Cousins, but so insistent was the demand here for it that its new owner was prevailed on to wait for her until the first of the year.

Fifty trucks are expected about January 1, according to notice of shippers, and the machines are to be put to work by the motor company immediately after arrival. They are to be used in the construction of the Southern California towns, besides a regular freight service from the city terminal at Third and Central avenue to the harbor.

Train on line, these routes are to be covered on schedule time to all surrounding towns.

The first allotment of Centurys consigned to the Greer-Robbins company was disposed of from catalogue description, and the car of the season's opening shipment remained to the local distributors. An additional shipment is on the way, and with the holiday trade taken care of, the Flower-street firm looks for a steady business throughout the year, in what is looked on as the best appointed season.

Arthur Duffey, the ex-amateur sprint champion, says: "They have Howard Drew, the champion sprinter, to represent the University of California now. Before the opening of the college athletic season they had Drew going to Dartmouth. Later Drew was going to Brown, but in spite of all the reports, Drew remained at Springfield, but he has been about the Springfield railroad station and know but little about going to the different colleges. If Drew does go to the Coast he is going to make a valuable addition to the westerners' athletic team. He is about the fastest thing in a running shoe I have seen for many a day."

Anthony F. Wilding, the famous Australian, who is rated as the greatest lawn tennis player in the world, recently won the handball trophy offered on the courts by victory in the world's covered court championship at Stockholm. The trophy was offered by King Gustaf V. It is of beautiful design, and the ground-work is composed of blue enamel and silver gilt; pearls and sapphires have been used in the ornamentation, and three crowns decorated with diamonds are at the apex. A model of the globe in silver is also included in the design, and it is here that the names of the winners will be inscribed.

George Carpenter's next opponent in the ring may be Gunboat Smith. The contest may be staged in London.

Still Running.

BUFFALO ROUTE SHOWS PIERCES.

ARROW CARS OF OLD AGES IN PROCESSION.

Oldest and Smallest Motors Run Alongside Largest and Newest, in Family of Various Ages—Records of Over 100,000 Miles Made by Early Machines Still in Service.

Buffalo-made products appearing in procession recently included an instructive exhibition of progress and stability of manufacture in the Pierces-Arrow cars. Cars of two and three-quarter horse power, made in 1901, ran beside their big brothers of sixty-six power, motorcarts and suburban forming a striking contrast, but each alike doing its duty.

Several of the older cars had run

over 100,000 miles, and one had a record mileage of 120,000, made after the war.

Owners of cars assisted the makers in turning out this remarkable display of new and old machines in active service.

TEACHERS LIKE THE OVERLAND.

Kentucky University professors to the number of seven use Overland cars, one now running his third year.

An eighth member of the faculty uses a two-cylinder car without recourse to the judgment of the mechanical engineering department of the institution.

NEW WINTONS ON EXHIBITION HERE.

Winton salerooms are showing a new Winton "Six" with the latest streamline effect in body construction.

A stripped chassis in the show window gives a complete view of all mechanical parts in new engines and running gear.

The Classiest, Best Finished, Most Attractive and Above All, Most Powerful of All Light Weight Automobiles

Not a New Car, Simply a New Name, Built By a Factory of Experience

One of the most important features is the motor, which is of the valve-in-the-head type, with valves enclosed, making it extremely silent and clean (cover removable by 2 nuts.) The removable cylinder head is another characteristic for a valve-in-the-head motor. The spark plugs are set in the head casting at an angle very accessible. The exhaust manifold is integral with the head casting, the outlet being thru a single pipe, eliminating back pressure; also the intake manifold on the opposite side is bolted to the head casting. The piston and connecting rods may be removed thru the top of the cylinders. The drive is thru a leather-faced cone clutch and selective type 8-speed transmission. For demonstrations call at

Why This 1914
Hupmobile

Is Unique and Alone

The Hupmobile is in a class by itself because it has a sturdy pressed steel frame.

The Hupmobile is in a class by itself because it has a pressed steel Pullman body.

The Hupmobile is in a class by itself because it is the biggest user of aluminum of any moderate-priced car.

The Hupmobile is in a class by itself because it is the biggest user of high-priced steel of any moderate-priced car.

The Hupmobile is in a class by itself be-

cause it has a powerful long-stroke motor, $3\frac{1}{4} \times 5\frac{1}{2}$ inches.

The Hupmobile is in a class by itself because it has an individual distinctive design.

The Hupmobile is in a class by itself, in other words, because by its careful and exhaustive attention to the most intimate details of construction—and by its use throughout of the finest materials obtainable, no matter what the cost, it has justified our belief that it is the best car of its class in the world.

GASOLINE ROW GOSSIP.

BY BERT C. SMITH.

MERRY CHRISTMAS and a Happy New Year. Thanks the same to you, and many of them.

Worry not about hard times. They are here. That's one thing to be glad of but there is more. They are about to leave. If you don't believe me take a trip down the row tomorrow with me and note the sales. Money is loosening up. Guess that's the correct expression. At least I know some folk have money, as I only need to glance over the sales list of certain firms to be reminded of this important fact.

Whether it was the currency bill, the fact that we did not have that sealing frost Christmas eve, or the more important fact that we have ceased to hypnotize ourselves into the belief that we are in a depression because I know not. At least, times are better and this week they will be better still. Now for some reason or another the ever-present unkind fool is speaking. Well, things looked in the East. By time March comes around we'll have little better times.

Harris Hanshaw is economical. He is not a tight-wad exactly, nor is he parsimonious, but he is frugal and saving. Harris had the same chance as John Wiese, only one chance. He did double. His number was twenty. Well, even when he was offered 40 cents for the ticket he refused to sell, and, sure enough, twenty was the lucky number and Han enjoyed a dandy bird on Christmas.

When a botanist visited Los Angeles recently he was told that "Wild Bill" has the finest collection of flowers in the city. Wild Bill explained.

It was explained that Wiese's middle name is Rufus and that he is college

raised and milk fed. This appealed

to the learned man and henceforth Bill's name is William Rufus of the flowers.

At G. Faulkner, the other man at the helm of the Cole Motor Company when Ed Harris is away, has just returned from a journey over the inland route to San Diego. He has a record of 100 miles to the gallon. Cars without half trying. Now that is something for a three days' trip and it means a car a day. He has the names. I took them down myself, but I have no names. You can't mind, you are incredulous, call him and he will not only give you the name but the addresses of each Cole purchaser.

Don't talk hard times to Faulkner. He is satisfied with everything that has happened around the Cole agency at least for the past ten days. It is questionable if the Cole man will have enough cars to exhibit at the automotor salons, but Harris is planning to show that white Cole roadster, a touring car and a stripped chassis.

He is satisfied with everything that

has happened around the Cole agency at least for the past ten days. It is

questionable if the Cole man will

have enough cars to exhibit at the automotor salons, but Harris is planning to

show that white Cole roadster, a touring

car and a stripped chassis.

John Wiese is a sport. He is also lucky. When it comes to winning turkeys John is right there with a number of birds. He took several chances that the raffle and won two birds. That is something, son, and it's his. That is something, son, and it's his. Santa Monica is in line for a yearling daughter just down to a prize twenty-pound bird Christmas Day and Guy got the turkey.

Jeffery
Kenosha, Wis.

It is plain now what the public wanted

Four \$1700

A light car of quality—powerful, staunch and fast, yet comfortable—Jeffrey built it. We have accomplished in the Jeffery Four and Six what we believe other car designers have overlooked.

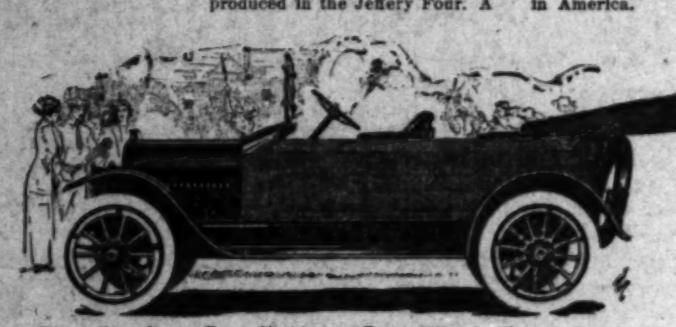

Good mechanics know that the day of the big lumbering car is gone—the great fuel wasting, giant motors and terrific expense.

True, the public has bought and used such cars—in fact, two years have passed with slow progress toward economy. Changes have been generally in equipment and body design.

The public wanted lighter and more economical cars. The majority bought low-priced cars—not because they were most comfortable or most satisfactory, but because they were light and economical.

Then came the Jeffery Four and Six, each dominant in its class. Designed alike and representing the latest foreign and American practice.

The leading American and foreign engineers had forecast such cars for 1913, but Jeffrey did not wait. No one thought the new and ultimate type would come quite yet—and at such a price.

The Jeffery Four—From Nothing to Forty Miles in Twenty Seconds

The specifications tell the story

U. S. L. starting and lighting, without chains, gears or belts. Imported annular ball bearings. Speed it up to forty miles an hour, shut off your engine and coast half a mile.

Spicer universal joints, combination force feed and splash oiling system; four forward speed transmission—the lightest and easiest to operate.

High-grade, full-floating type

The Jeffery Six weighs 2700 pounds, with full equipment, motor 3½x5½, 48 horsepower. Bosch Duplex ignition; wheel base 128 inches; wheels 38x4½ and on enclosed cars 37x5; Rayfield carburetor; Warner autometer, ammeter, engine driven power tire pump, Rothschild body and full-floating rear axle. Five-passenger touring, or two passenger roadster, \$2400. Six-passenger, \$2450. Sedan five-passenger, \$2400. Limousine, \$3500.

If it's in the Jeffery it's high-grade

THE YEAR IN BASEBALL.

Jan. 5.—Frank Chance unconditionally released by Cincinnati.

Jan. 6.—Merdecal Brown signed with Cincinnati.

Jan. 6.—Roger Bresnahan agreed to sign with the Cubs.

Jan. 8.—Frank Chance signed to manage the Yankees for three years.

Jan. 18.—Davy Jones, Detroit, was purchased by the White Sox.

Jan. 17.—Hank O'Day turned down job as National League umpire.

Jan. 17.—Lew Ritchie, Cub pitcher, was injured in a motorcycle accident at Daytona, Fla.

Jan. 20.—Callahan and Charles Welsh Murphy engaged in a word war over statements concerning training practices.

Jan. 22.—Harry McIntyre was purchased by the Cincinnati Nationals.

Jan. 23.—Joe Tinker signed Matty McIntyre for season.

Jan. 23.—National Commission issued notice to major league clubs that when a major league club desires to release a drafted player on whom it has secured interleague waivers it must notify only the secretary of the national commission, the president of the league from which the player was drafted and the National Commission.

Jan. 24.—Frank Chance, former manager of the Cubs, was president Murphy warning the latter not to talk too much.

Jan. 25.—James Thorpe, world's greatest athlete, was declared a professional by the Rocky Mountain, N. C. club.

Jan. 28.—Major league clubs offered James Thorpe contracts.

Jan. 28.—Cub contracts were issued without "water-wagon clause."

Jan. 28.—President Murphy of the Chicago National League team issued orders prohibiting the excessive use of liquor by Cub players.

Jan. 28.—The Cincinnati Reds made an attempt to sign James Thorpe.

Jan. 28.—James Thorpe signed with the New York Giants to play professional baseball.

Jan. 31.—Gamer, William, Dines was awarded \$200 prize for hurrying up American League games.

Feb. 11.—White Sox and Giants officials agreed to start world baseball tour on Oct. 14, 1918.

Feb. 12.—The National League managers met at the annual schedule meeting at New York, the opening and closing dates being set at April 10 and Oct. 5.

April 1.—The Philadelphia Nationals defeated Brooklyn, 6 to 1, in the first major league game of the year.

April 1.—President Wilson pitched the first ball in the opening game at Washington.

April 11.—The White Sox were beaten by the opener by Cleveland, 3 to 1.

April 12.—The Cubs lost opening game at home to St. Louis Cardinals, 8 to 3.

April 17.—The White Sox opened the 1913 season at home by beating the Naps, 2 to 1, before 24,000 spectators.

April 18.—Overall reported to the Cubs.

May 1.—Ty Cobb and Johnny Kling, major league holdouts, signed with Tigers and Reds, respectively.

May 4.—Manager Stovall of the St. Louis Americans suspended indefinitely by President Stovall of the American League for spitting on Umpire Ferguson.

May 17.—Frank Chance, leader of new Yankees, was welcomed home by 55,000 fans and a White Sox victory of 6 to 0.

May 22.—President Ban Johnson ordered suspended Manager Stovall of the St. Louis Browns to pay the American League \$100 and write an apology to Umpire Ferguson.

May 22.—The Chicago Federal League opened its home of the White Sox to the New York Yankees for Hal Chase.

June 10.—The Cubs amassed eighteen wins for twenty-six games defeated the Indians, 2 to 1, Chicago.

June 18.—The Giants defeated Philadelphia and went into the lead of the National League.

July 3.—Waiter Johnson won 2 pitching game from Ray Collins of Boston, fifteen innnings, 1 to 0.

July 5.—Artie Hofman, former Cub, was sent to Nashville by Pittsburgh.

July 6.—Umpire Eason forfeited a game, 9 to 6, to the Cardinals when the Chicago team failed to save a batter in the second half of a double header at Chicago.

July 10.—Jim Baskette hurled a no-hit game for Minneapolis against Toledo, but lost, 1 to 0.

July 11.—The White Sox paid \$18,000 for Larry Chappell, Milwaukee outfielder.

July 15.—King Cole, former Cub, pitched a no-hit game against Milwaukee, winning 3 to 1 for Columbus at Milwaukee.

July 15.—Charles Comiskey posted a \$45,000 forfeit for the world's tour baseball trip of White Sox and Giants.

July 15.—J. Garland Stahl was fired as manager of the Boston Red Sox.

July 16.—Frank Chance, manager of the White Sox, misinterpreted the playing condition of Zeider and Borton, for whom Hal Chase was traded.

July 19.—Unsatisfied with published by fans after a Philadelphia-Cincinnati game at Philadelphia because of slow decision at second base.

July 21.—Joe Wood, star pitcher of the Boston Red Sox, sustained a broken thumb.

August 4.—Ed Walsh, star pitcher of the White Sox, was sent to "Bonesetter" Reese at Youngstown, O.

August 8.—New York American League club gave cash and players amounting to \$17,000 for infielder Maisel of the Baltimore club.

August 10.—Walter Johnson, star pitcher of the Washington baseball club, won his twelfth consecutive game by beating the Tigers, 9 to 7, at Detroit.

August 18.—Walter Johnson, star pitcher of Senators, won thirteen consecutive victory by winning from Cleveland, 5 to 1.

August 19.—White Sox traded Pitcher Lange and Infelder Mattick to Kansas City, Boston.

August 20.—Buck O'Brien, White Sox pitcher, purchased by Oakland, Cal., Pacific Coast League club.

August 25.—Arthur Devlin, third baseman of the Boston Nationals, was released to Rochester.

August 25.—Walter Johnson's record of consecutive victories in the American League was broken by Boston, when Washington was defeated by Ray Collins, 1 to 0, at Boston.

August 26.—New York-Philadelphia National League game in Philadelphia forfeited by New York.

August 26.—Umpire Bresnahan's decision in the Philadelphia-New York game to New York on August 26.

September 1.—Joe Tinker, mana-

0 Suddenly they heard a cry.
boy was running toward the
fled.

He threw a net over Dickie's mother's castle.

1—While Mr. Twee Deedle, Dickie and the Moon Man sat on the cushioned rocks on the other side of the moon they spied a flock of birds flying toward them.

2—The Moon Man suggested giving them the crumbs of the pies they were eating, but suddenly they discovered that what seemed birds were really flying boxing gloves. The leader flew into the Moon Man's face.

3—While Dickie and Mr. Twee Deedle fought off some of the gloves with sticks, others knocked the Moon Man down and pummelled him.

4—Finally the flock of gloves soared away, leaving many of them stunned on the ground.

5—Then a boy giant ran up and said angrily that they would have to pay for his boxing gloves, which they had driven away or killed.

6—As the friends had no money, the giant boy said he would take Dickie home for his mother to cook for dinner.

7—He threw a net over Dickie and started to carry him away to his mother's castle.

8—Mr. Twee Deedle grabbed the boy's feet and threw him heavily to the ground.

9—Then, while Dickie and Mr. Twee Deedle held him fast, the Moon Man spanked the boy.

10—Suddenly they heard a cry behind them. The mother of the giant boy was running toward them, shaking the whole moon, and they fled.

11—"If Willie's papa was here you wouldn't get away so easily!" shrieked the giant woman.

12—At last they came to a shady spot where a brook of soda water bubbled under the trees. They drank through straws until they were unable to hold any more.

DOLLY DIMPLE DISCOVERS THE ORIGIN OF NEW YEAR'S RESOLUTIONS

MAZIE THE MOTOR MAID

Verse by, Paul West ■ Illustrations by J. Norman Lynd

1—"TWAS New Year's Eve. The city's streets with jostling crowds were gay,
All there to help the poor Old Year pass noisily away.
From gay cafes came sounds of song and merry laughter's din—
Oh, never was a jollier crowd to see the New Year in!

2—Especially at the Mammon, of all big hotels the best,
Where gathered quite the richest folk, bejewelled and be-drest,
There Fashion at the tables sat beneath a blaze of light—
A gorgeous, gay, extravagant, astounding, dazzling sight!

3—At one long table Jack Van Zandt presided as the host,
With forty fashionable guests to give the New Year toast.
And Mazie's Pa and Ma were there; but Mazie—where was she?
Let's change the scene to Mazie's house and maybe we shall see.

4—When Pa and Ma had wished to start she'd not been ready quite.
"Go on," she said. "I'll take my car and follow you, all right."
"But oh, the crowds!" cried Pa, in dread. "Don't fret," she laughed, "I pray!"
So they'd gone on and left her in her independent way.

5—At last, bedecked in all her best, she started in her car.
But difficulties met her path before she'd travelled far.
A hundred thousand packed the streets, and though she honked her horn
It looked as though she'd never reach the Mammon till next morn!

6—'Twas nearly midnight! Jack exclaimed: "To worry I'll begin!
Where's Mazie? She will be too late to see the New Year in!"
And at that moment, just outside the Mammon, in her car,
Was Mazie, hemmed completely by that shouting human bar!

7—"I must get in!" She clenched her teeth and looked across the crowd.
"Make way!" Honk! Honk! She threw the clutch and shrieked her siren loud.
The throng gave way. She dashed ahead. "Stop her!"—one mighty roar
But ah, she turned—the sidewalk reached and—through the Mammon door!

8—Through plates of glass, through shattered oak, the motor dashed inside,
Just as the clock was striking twelve. "Hurrah!" her friends all cried.
Then, reckless lass, she seized her glass, this jovial toast to throw out:
"SMOOTH ROADS TO ALL. THIS GLAD NEW YEAR, WITH
NOT A SINGLE BLOW-OUT!"

COMMON SENSE in the HOME

EDITED by MARION HARLAND

CANDIES FOR CHRISTMAS TIME.

WITH the approach of Christmas comes the planning for Christmas candies. The shops offer confectionery of all sorts and conditions at all prices, and if you can be sure of the purity of the candy and the cleanliness of the processes used in manufacturing and have money to buy what you want you may be wise to spare yourself the additional care of candy making at home. But should these conditions not prevail, or if you are far away from stores, you may console yourself with the thought you may prepare in your own kitchen candies which are as good to eat and taste as any you can buy.

You may usually delight in making candy and I confess to a good deal of enjoyment in it myself. My memories go back to the "candy stove," the "candy pull" of the old Dominion, but they are far behind the times now. In this day and generation the sweets are of a character we used to have in those earlier periods, more elaborate, perhaps, yet toothsome and dainty.

I supply below a recipe for the candy of my girlhood and the directions for compounding more up to date candies are, I believe, in the "Candy Book" and "Candy." When either variety of candy is wrapped in waxed paper and packed into one of the pretty boxes which are to be found in the holiday season it makes an attractive and acceptable present to put in the Christmas stocking.

OLD FASHIONED MOLASSES CANDY.

Mix a quart of New Orleans molasses, a cup of brown sugar, and a half cup of vinegar, put over the fire and cook steadily until a little of it hardens when dropped into a cup of cold water. Stir in then a tablespoon of butter, and a teaspoon of baking soda dissolved in cold water; when this is well mixed pour the syrup into buttered platters or tins in shallow saucers that it may cool more quickly. As soon as it can be handled begin to pull it, taking only a small piece at a time in the tips of the buttered fingers. Work as quickly as possible and remember that the longer the candy is pulled the whiter it gets. If you choose you may braid the strips together after they are pulled or you can twist it in sticks or cut it into short lengths. If you like the flavor of lemon in molasses candy, add enough of the juice to give the taste you wish.

CHOCOLATE CARAMBLES.

Put together in a saucers, two cups of brown sugar, half a cup each of molasses and cream, four tablespoons of butter and half a cake of unsweetened chocolate. Let them heat slowly, watching that they do not scorch before the ingredients are blended and melted and stew steadily until the candy becomes brittle. When a little of it is dropped into cold water. Add two teaspoons of vanilla after you have taken the

dropped into cold water, turn into greased pans and as it cools cut into squares with a knife.

NUT CARAMBLES.

Mix together over a slow fire two cups of brown sugar, half a cup each of molasses and cream, four tablespoons of butter and half a cake of unsweetened chocolate. Let them heat slowly, watching that they do not scorch before the ingredients are blended and melted and stew steadily until the candy becomes brittle. When a little of it is dropped into cold water. Add two teaspoons of vanilla after you have taken the

dropped into cold water, turn into greased pans and as it cools cut into squares with a knife.

MAPLE CARAMBLES.

Crush coarsely two pounds of maple sugar, put it over the fire with a quart of rich milk—if it is part cream, so much the better—and cook steadily. You must be on the alert to see that the milk does not scorch before it boils. When the candy has reached the point where it hardens when

saucepans from the fire, turn into a shallow greased pan, and cut into squares with a buttered knife as soon as the candy is partly cooled.

COCONUT CANDY.

Put into a saucers three cups of granulated sugar, add two cups of cold water, and boil until the sugar spins a thread from the tip of a fork dipped into it. Into this sirup stir a good sized coconut grated—the prepared dry coconut does not answer the purpose quite as well—take the saucers at once from the fire and turn the coconuts to the stage that it spins a thread from the tip of a fork dipped into it, remove from the fire and beat into it a stiffly whipped white of an egg. The first separation should have been taken from the fire when it has begun to harden in cold water, flavored with vanilla to taste, and the mixture with the egg now be beaten into it and whipped hard. When the combination begins to stiffen add two cups of chopped nut kernels, pour into greased pans, and cut into squares.

cooked to the stage that it spins a thread from the tip of a fork dipped into it, remove from the fire and beat into it a stiffly whipped white of an egg. The first separation should have been taken from the fire when it has begun to harden in cold water, flavored with vanilla to taste, and the mixture with the egg now be beaten into it and whipped hard. When the combination begins to stiffen add two cups of chopped nut kernels, pour into greased

pan and cut in squares as you would other fudge.

MEXICAN KISSES.

Cook together two cups of light brown sugar, a half cup of cream, and butter until the size of an egg until a little of it forms a soft ball in cold water. Just before taking from the fire add a teaspoon of vanilla and a cup of the chopped kernels of English walnuts or pecans, beat all together until the mixture begins to look creamy, and turn into greased pans before it is

bananas, rolling the balls in freshly popped corn until this coats them thoroughly. Put the sugar and water in a saucepan, bring to a hard boil, and then lay in a cool place.

FRUIT SQUARES.

Put four cups of granulated sugar and a cup of cold water in a saucers until the sugar is nearly cooked away, not stirring until all after it is dissolved. Grease shallow square pans with straight sides and just before the sugar is taken from the fire turn into the pans seeded raisins, shredded citron, and the mixture is almost cold enough to spread them on a platter to dry. Keep the box.

FONDANT FOR FRENCH CANDIES.

Put two cups of granulated sugar and a half cup of boiling water into a clean and unsmashed saucers, stir until it has dissolved—no longer—and let the syrup cool to a ball. With a swab made of a piece of clean lines tied to a stick and moistened slightly in cold water wipe the crystals of sugar off the sides of the saucers as they are thrown up in boiling. At the end of 10 minutes' cooking test the sugar by putting a little of it into a cup of cold water; when it can be made into a soft ball hold the fingers. It is ready to use from the moment it is made, and pour out, shaking it into a shallow bowl. When it has become cold enough for you to hold your finger in it stir it with a wooden spoon until it is stiff that you can work it in the hands as you would dough. It is to ready to be used in making French candies.

CHOCOLATE CREAMS.

Make your fondant like the small balls or cones with your fingers and put them on waxed paper to harden. If you wish to flavor work into them vanilla, lemon, or whatever you choose, not softening the fondant too much. Melt unsweetened chocolate in a saucers and dip your hand in this either with a pair of mittens or a candy dipper, or portioned spoon, or a piece of soft cheese cloth. Dip the fondant quickly, putting in only one ball at a time, withdrawing it as soon as it is dipped and laying on waxed paper to dry. If one dip does not coat the candy dip it again until they are again when they have hardened on the outside. Have the chocolate in a shallow vessel.

CHOCOLATE FRUIT CREAM.

Use candied cherries, seeded raisins, a bit of any other fruit you wish as center for your balls of fondant, and after they have stood long enough to harden dip them in melted chocolate as directed in the preceding recipe. You may also put balls of fondant in the center of the balls of French cream by the method of dipping them into the melted chocolate. As you dip them for the centers of cream, placing halved walnut or pecan kernels on each side of them.

One Half of Front Cap

MARION HARLAND'S HELPING HAND.

"I reading your page the other day I noticed at Mrs. in regard to a blind girl, who writes a typewriter. I have one. It is packed in a regular box and is in good repair. Possibly some one in the business could overhaul it and put it in perfect condition. I will send it free of expense to you and, if you wish, place a notice in the Sunday paper stating the name and address of the one who will repair it.

This letter is unanswered and I give no clue to the identity or name of the writer. The feelings it aroused in me were of a mingled nature. Gratification in the first place, that there seemed a probability of the blind girl receiving her machine; then disappointment that there was no means of getting in touch with the writer, and a sensation of remorse at the suggestion of the machine going to the office of the paper. I have said so many times that no article must be sent to me at the office. I hope earnestly that the publication of this communication may lead my writing world to send the writer to who also writes to me and that the blind girl may thus have the typewriter offered.

No Ribbon to Wear is School.

"I would like to ask some of the constituency for some silk or velvet pieces to make a soft pillow top. Also for some second hand ribbon for my little girls to wear to school. I have two little daughters and they have never had the pleasure of wearing ribbon in school as the other children do. I would be glad to write to any of our club." Miss H. T.

A while ago we printed an appeal for this hair ribbon for a little school girl and it received a general response. I trust this piece may be a similar reception and that the little school girls may be enabled to have hair ribbon like their mates, as well as the silk or velvet pieces may be supplied for their mother's pillow top.

Tools for Hair Work.

"Will you kindly tell me where I can get the tools to work in hair? I want a hook for straightening hair and a comb to root the hair after it is straightened, also the kind of solution the hair is put to soak that causes the roots to swell so that it can be combed, or rooted to?" Miss J. R.

I am sorry to say that I am not qualified to answer these questions and even if I knew the addresses at which such articles as the correspondent mentions could be procured I could not give them in print. But I hold the address in the confident expectation that it will be sought by some Corinette who knows and will give the needed information.

Student Wants a Dictionary.

"In a recent issue you printed a letter from a correspondent who had a dictionary to give to a student. I should much like to have it for my son, who has just started in business college. His books, stationery, and the like push me to the utmost to pay, and the dictionary would be a great help to him, as I cannot see my way clear to buying him a new one. I

will gladly pay parson post on it." Mrs. W. B. W.

I am sorry to say that the dictionary to which reference was made has been given away, but I hope that the appearance of your letter may bring an offer of another for your son. I am especially interested in boys making their own school dictionaries against differentiation and glad of any chance I have to lend them a hand.

Others feel it is a job, and I trust the dictionary will come to your boy in a short time.

Invalid Wants Cello.

"I wonder if you can help me. My mother is an invalid and would like to see some persons who would drop in and sit with her a short while. Do you know of any one who would do this?"

I print this in the assurance that I will give any necessary information for the address of an invalid who comes from some friendly soul who will be glad to "drop in" and brighten the long days.

How to Make Collage Cheese.

"Will you tell me how to make collage cheese? Everyone but me seems to have been born knowing how; at any rate, I haven't a cook book that tells." L. M. J.

You are unfortunate in your cook books.

In the row of glasses the school teacher is the one who will be glad to tell you how to make collage cheese.

Extra Copy on Hand.

"Some time ago some one wrote and asked for the words of the poem, 'Just a wearying for you.' Several copies have been sent and the correspondent who requested it has been supplied. An extra copy is at my command if any one desires it and will send a stamped and addressed envelope

will gladly pay parson post on it." Mrs. W. B. W.

I am sorry to say that the dictionary to which reference was made has been given away, but I hope that the appearance of your letter may bring an offer of another for your son. I am especially interested in boys making their own school dictionaries against differentiation and glad of any chance I have to lend them a hand.

Others feel it is a job, and I trust the dictionary will come to your boy in a short time.

Children Want a Phonograph.

"Has any one a phonograph to give away? I have three small children and they would much enjoy it. My husband has decided to make one for them for himself and the children, and if any one has a phonograph that is no longer wanted by the present owner I will be glad to pay the price." Mrs. W. D.

I hold the address.

Wants to Study Music.

"I am a widow, 35 years old. Do you think it is too late for me to begin to study piano lessons? I am a lover of music, and while I do not expect to earn my living by the art I would like to be able to play just a little as I feel myself able." Mrs. E. M. F.

I print this in the assurance that I will give any necessary information for the address of an invalid who comes from some friendly soul who will be glad to "drop in" and brighten the long days.

Invalid Wants a Phonograph.

"I wonder if you can help me. My mother is an invalid and would like to see some persons who would drop in and sit with her a short while. Do you know of any one who would do this?"

I print this in the assurance that I will give any necessary information for the address of an invalid who comes from some friendly soul who will be glad to "drop in" and brighten the long days.

Wants to Make Friends.

"I would like to join some woman's club or card party that would gain my friends as the lonely woman did about whom I read in your column. I would be glad of any advice that would help pass some of my time during the day and as I am a stranger here I have a good deal of leisure. I have not made many friends since coming here and don't know how or where to make them." Mrs. R.

I shall be glad to give your name to anyone who writes and wishes to know for the purpose of making life less lonely for you. Personally I should think a good plan would be for you to identify yourself with some of the many interesting characters and to find through them some helpful way in which to dispose of that time which hangs heavy on your hands. There is a great many women in all professions who are in all chores and who would you find a broadening of your interests in this way that, as a stranger, could find in no other. I would be glad to hear from you later that you had taken this advice and had been helped by it. The longer I live the more I appreciate the fact that there are few enjoyments in life keener than those which come from the feeling that one is of service to others.

HAPPY
NEW YEAR

MONDAY MORNING

Prompt.

FORESTALLS STRIKERS

"Frisco" Lays Off Telegraphers.

Removes Instruments from Stations All Along the System.

Transforms Twelve Thousand Miles Into a Telephone Circuit.

And Conferences With Union Agitators Is Not Likely to Be Held.

(BY A. P. NIGHT WIRE TO THE TIMES)
SPRINGFIELD (Mo.) Dec. 28.—In anticipation of the strike of 110 telegraphers employed on its lines which probably will be called tomorrow, the St. Louis and San Francisco Railroad laid off indefinitely, tonight 100 telegraphers and began to transform its telegraph lines into a telephone system of railroad communication. This action disclosed the company's plans for resisting the strike, to the amazement of the telegraphers, shippers and railroad circles in general. Removal of all telegraphic instruments from the company's offices began today.

It is said that this is the first transformation of the use of wires has been made by railroad to avert a strike.

Among those who will leave the service of the "Frisco" are many who were to present the demands of the Order of Railroad Telegraphers at a conference tomorrow morning with members of the road.

At 10 o'clock this morning special trains, each consisting of a locomotive and caboose, went out on the "Frisco"

SUMMARY

THE SKY. Clear. Wind at 5 p.m., west; velocity, 7 miles. Thermometer, highest, 68 deg.; lowest, 47 deg. Forecast: Fair Monday; light northwest wind. For complete weather report see last page of Part I.

THE CITY. One person was killed yesterday and fourteen others injured, two perhaps fatally, in thirteen automobile and motorcycle accidents, some of a highly spectacular character.

The father of Ralph Faris, condemned murderer and train bandit, will seek to save his life today by attacking the death sentence on technical grounds. If allowed to plead again Faris will say: "Not guilty."

Plans were made at the Labor Temple last night for a parade of 30,000 I.W.W.'s, Reds and Millers to march under the banner of the "International" to the City Hall and demand their "rights."

Many posters promised optimism for the new year, particularly, touching that lessons of the past will guide in the future.

A motion-picture film became enraged at the prick of a hypodermic needle yesterday and attacked the leading man, the manager and two cowboys shot him before he could inflict injuries.

Enforced lower rates by express companies will go into effect Thursday.

To circumvent the evil effects of "shirking" a local wedding has been postponed from Christmas to a minute after midnight in the new year.

SOUTHERN CALIFORNIA. Fifty thousand people visited Venice yesterday to see the high tides and incidentally

The reader who would do justice to his memory, comprehends though it is, which necessarily cannot be immediately com-
